MINT **ERROR** NEWSTM MAGAZINE

Bringing the latest mint error news to the collector.

Mike Byers, Publisher & Editor, Welcomes You!

Welcome to Mint Error News Magazine, bringing the latest mint error news and information to the collector. This is our thirteenth year bringing you both an online PDF magazine and the Mint Error News website. There are over 950 articles, features, discoveries, news stories with mint error related info from the United States and around the World. Our website, minterrornews.com, has become the most popular and informative Internet resource for mint errors and is read by thousands of dealers and collectors.

Mike Byers (mikebyers.com) is president of Mike Byers Inc. He has been a professional numismatist for over thirty-five years. He is one of the largest dealers handling U.S. Gold Coins, Patterns and Rarities certified by PCGS and NGC. He has handled major coin collections and attends every major coin convention. Mike Byers carries an extensive inventory as well as solicits want lists and is always looking to purchase fresh inventory and collections. You can visit Mike Byers and view his rarities at the ANA, Central States, FUN show and the Long Beach Coin Expo.

Mike Byers was a consultant to ANACS for Mint Errors from 2000 to 2006. He is also the Owner, Publisher and Editor of Mint Error News Magazine and the Mint Error News Website that was founded in 2003. In 2009, Mike Byers published his first book, *World's Greatest Mint Errors*, which received the NLG Award for Best World Coin Book and is available on Amazon.com.

Fred Weinberg is a highly respected numismatist, with 40 years of full time experience in the rare coin marketplace. He deals in numismatic United States Gold & Silver coinage, as well as specializing in buying & selling Major Mint Error coinage of all types. He is one of the original 31 dealers selected as an authorized P.C.G.S. (Professional Coin Grading Service) dealer at its inception in 1986.

Andy Lustig has been dealing in U.S. and World Coins since 1975 and has attended more than 2,000 coin shows and auctions. Andy is the co-founder of the Society of U.S. Pattern Collectors (uspatterns.com). He has been a member of the Professional Numismatists Guild (PNG #614) since 2005. He is a member of NGC and was also a former grader and authenticator for PCGS.

NGC Certifies Unique Pair of Proof Quarters Struck on a Silver Barber Quarter and a Silver Canadian Quarter

by Mike Byers (mikebyers.com)

NGC Certifies Unique Pair of Proof Quarters Struck on a Silver Barber Quarter and a Silver Canadian Quarter

Proof coins are struck by technicians who hand feed the blanks into special presses. They are produced, examined and packaged using extreme quality control. It is very unusual to find major proof errors. A few broadstrikes, off-centers, double strikes in collars and off-metals have been known to be found in sealed proof sets. Proof errors are aggressively sought after by many error collectors.

A very small group of Proof errors recently came from a collection that was auctioned by the State of California. The U.S. Secret Service inspected and released this collection to the State of California determining that it was legal to own. The State of California then auctioned the collection and it has been dispersed since the sale.

Proof Washington Quarters struck in 1970 by the San Francisco Mint were clad. The first coin of this unique pair,

a 1970-S Proof Quarter was overstruck on a Silver Barber Quarter and is one of two known. This mint error was originally discovered in group of San Francisco Proof Errors that was auctioned by the State of California. There is some detail on both sides showing the design of the Barber Quarter. This is one of the most famous U.S. Proof Major Mint Error ever released from the San Francisco Mint.

The second coin of this unique pair is a 1970-S Proof Quarter from the United States that was overstruck on a 1941 Quarter from Canada. This unique mint error was originally discovered in group of San Francisco Proof Errors that was auctioned by the State of California. There is a significant amount of detail on both sides showing the design of the Canadian Quarter. This is one of the most fascinating and intriguing proof mint errors ever discovered.

NGC CERTIFIES COLOMBIA PATTERN ODDITY

BY NGC

*NGC recently certified a 1918 10 Peso
pattern struck over a US WWI-era pin.*

NGC CERTIFIES COLOMBIA PATTERN ODDITY

A highly unusual Colombia 1918 10 Peso pattern was recently certified by NGC. The reason it was so unusual? This pattern coin was struck over a United States 47th Infantry Regiment WW I era pin.

Colombia planned to issue gold 10 peso coins in 1919. During 1918, a small number of brass patterns were struck as a proposed design for this issue. The eventual motif that graced the 1919 issue is only slightly different from the 1918 patterns—most noticeably, the metal content changed from the proposed 0.900 fine to 0.9167 fine. Listed in *Coins of Colombia* by Jorge Emilio Restrepo, the normal 1918 brass pattern is listed as Restrepo-124.

The planchet for the piece recently graded by NGC, however, was a 47th US Infantry Regiment pin. The pin, also of brass composition, was an odd choice for several reasons. First, the 47th regiment was organized in June of 1917 and served overseas in France during World War I. How one of these pins made it to Colombia to serve as the host for the 1918 pattern is currently unknown. Effort was then made to remove the mounting on the back of the pin before striking the coin, but yet no similar effort was made to deface the deeply struck design that originally appeared on the front of the pin. The pin's original design can therefore be seen beneath the pattern design.

This most unusual coin was unfortunately defaced by several deep, long scratches on both sides of the coin. While the scratches are old, there is no way of knowing if they were inflicted at the time of production or were done later. NGC graded it Unc (Uncirculated) Details, Scratches.

COIN SHOW REPORT:

BALTIMORE WHITMAN EXPO APRIL, 2016

by Jon Sullivan

This coin show held every Spring, is one of our regular shows which we attend every year. It is typically one of the very best coin shows of the year for both buying and selling, and we look forward to it to do business, see customers, and also to take the “pulse” of the market. This year we saw a few things stand out, which we will talk about in this report. The show began for us on Thursday and ended Saturday, leaving slightly early since the show goes on through Sunday (although most dealers leave by Saturday afternoon since they have work to get back to on Monday.)

This was a fairly typical show for us in terms of buying, and we picked up a number of rare errors as well as some less expensive error coins. Perhaps our largest

purchase as the show was an 1862 Indian cent obverse die cap, which was somewhere south of \$20,000. A very nice coin, and it went to a happy customer. The more common stuff included cheap off-center Lincoln cents, planchets, minor brockages and the like, which typically are brought to the table 3 or 4 at a time by dealers or collectors trying to get rid of them. Some other coins, including a very rare off-metal showed up as well, which we promptly purchased and sent off to PCGS for grading.

We had a number of sources for buying, which we consider to be a good thing since it indicates a broader overall market of material, as opposed to having one collector bring in their collection, and that be the only purchase at the show—that indicates a small market. So we

would summarize buying as being good overall at the show, and there wasn't anything of note on this front in terms of more inventory or less coming on the market for sale.

Sales were slightly off at the show, and we sold mostly wholesale and did very little retail. Most of the collectors we see at shows either did not show up, or had brought some "non error" coins to sale at the show, and "might be back" if they could sale them. But overall, there were not many error collectors at the show. We sold far more over the phone or internet during the show, than we did at the show itself, and the \$20,000 error went to someone not in attendance at the show. This is often the case, and not unusual.

The fact that the regular U.S. coin market is slow may have contributed to a lack of error coin retail sales. Many non error collectors and dealers are "upside down" with their inventory or collections, and cash is therefore somewhat missing

from that area of the coin market from what we hear (we are not dealers in non-error coins, and so are not very involved in that area of the market.)

Overall we would say the error wholesale market is good. Considering there were no other dealers at the show who deal exclusively in mint errors (as we do), we did a surprising amount of wholesale, and wholesale represented the vast majority of our sales at the show. Why is this? We believe it is in part because the error market is doing quite well, and those dealers (who all do buy and sell errors from time to time) are still moving their error coins. Also, error coins are "something different", and in a world where non-error coins are generally weak, error coins represent something that collectors feel more comfortable buying since values are more stable and tend to move slowly overall.

COIN SHOW REPORT: BALTIMORE WHITMAN EXPO APRIL, 2016

We talked to non-error coin dealers at the show, and overall it was mixed from what we heard. Some dealers had a good show (one dealer said he had his best show ever, selling to many retail customers.) Other dealers said they were having a lousy show with very little business of any kind. The show did not seem very enthusiastic, but seemed to be healthy for a down coin market. We were pleased with the state of the error coin market,

and although the non-error market is down right now, there's no doubt it will rebound sooner than later since as with anything economic in nature, there are always cyclical ups and downs.

This is our opinion on the show, and other dealers would have a different view, so take it for what it is—our opinion. Thanks for reading.

New From Krause Publications:

Strike It Rich With Pocket Change

Error Coins Bring Big Money

by Brian Allen & Ken Potter
NEW 4th Edition

It takes a keen eye to spot them - and a little know-how - but errors on coins produced by the U.S. Mint occur every year. And these errors can be worth a fortune to coin collectors. *Strike It Rich with Pocket Change* shows the reader how to detect errors, what to look for and how to cash in on them. This book has a strong appeal for someone with a mild to dedicated

interest in coins, while drawing upon the treasure hunter in all of us - anyone who is looking for a hobby that does not require a great up-front investment, yet offers the potential of discovering valuable rarities. Any collector who has completed the standard set of a type or series now has an opportunity to broaden the scope of that collection.

Visit krausebooks.com for more information.

PCGS Certifies Unique SPECIMEN Canada ½ oz Maple Leaf \$20 Brass Uniface Die Trials

by Mike Byers (mikebyers.com)

This is a unique pair of SPECIMEN brass die trials for the Canadian \$20 1986 ½ oz Gold Maple Leaf Coin.

PCGS Certifies Unique SPECIMEN Canada 1/2 oz Maple Leaf \$20 Brass Uniface Die Trials

These are the only known Canadian \$20 SPECIMEN brass die trials of any design or series. They are uniface since each die was tested separately. They are in gem specimen condition with original toning. These SPECIMEN die trials are among the most spectacular coins ever released by the Royal Canadian Mint.

These two unique die trials were struck on brass planchets with a diameter of 25 millimeters, specifically produced for testing of the 1/2 oz Maple Leaf. These were Type One planchets that do not have a raised rim. They were struck in the collar and have a plain edge. The authorized issues struck in gold have reeding and were struck on Type Two gold planchets.

The Royal Canadian Mint issued the first 1 oz Maple Leaf gold coins starting in 1979. It was such a success that they added the 1/2 oz Maple Leaf in 1986. The obverse depicts Queen Elizabeth II and the reverse has the Canadian Maple Leaf. The 1/2 oz Maple Leaf has a diameter of 25 millimeters and weighs 7.7850 grams. It was struck in .9999 fine gold and has a gold content of 3.11 grams.

It is incredible that these dramatic and unique SPECIMEN brass die trials were discovered and subsequently sent to PCGS for authentication and grading. They are off-metal (not struck in gold), uniface and have plain edges. This pair of unique SPECIMEN brass die trials rival any U.S. Pattern or Die Trial in rarity, prestige and value.

CONECA

The Combined Organizations of Numismatic Error Collectors of America

CONECA is a national numismatic organization devoted to the education of error and variety coin collectors. CONECA focuses on many error and variety specialties, including doubled dies, Repunched mintmarks, multiple errors, clips, double strikes, off-metals and off-centers -- just to name a few. It publishes an educational magazine, The Errorscope, which is printed and mailed to members bimonthly. CONECA offers a lending library, examination, listing and attribution services; it holds annual meetings at major conventions (referred to as Errorama) around the country, and offers auction services to its members. Please visit conecaonline.org and enjoy!

CONECA Variety Attribution Services

CONECA offers two attribution services. One service enables members and non-members to send their coins directly to an authorized CONECA attributer. The other service is offered through the numismatic grading firm of ICG and enables CONECA members and non-members to have their coins attributed by a CONECA attributer and then graded and slabbed by ICG.

CONECA Error Examination Services

CONECA offers two examination services. One service enables members and non-members to send coins to an authorized CONECA examiner who will return an opinion of each coin's error classification. The other service is offered through the numismatic grading firm of ICG and enables CONECA members and non-members to have their coins examined by a CONECA examiner and then graded and slabbed by ICG.

Error Coins this Summer of 2016

By Rich Schemmer

Let me start off, by saying:
What are YOU waiting for..!

Error Coins in the Numismatic Market have been really heating up. New material, that has not been seen in decades has been entering Auctions and showing up on dealers tables at most of the major Numismatic shows across the country.

This type of material enters the market and is gobbled up by those in the know. That's right "In the Know." These individuals know that these are rare items and will draw TOP prices in the near future. Those buying this material

that are collectors will add these hard to find errors and once again these fabulous errors will disappear from sight for years.

So... if you were looking to get a deal or waiting for a better price, forget it... These better errors are being purchased by dealers and collectors alike. These opportunities only come around a few times in a collector's life. This is one of those times.

So, gather your want list, go to a show or to a Major Auction, view the lots online or in person. While at the show, look up what error dealers are attending and go to their tables. Don't be afraid to ask, if

Error Coins this Summer of 2016

they may have what you may be looking for. Many times they will have additional boxes behind their tables that are out of view.

Yes, I'll be right out there with you viewing these coins. Even if I decide some may be not what I'm looking for, I'll still have the opportunity to view some these fantastic errors.

My only regret is this surge of newer material didn't happen 15 years ago, when I was a little younger. Some fantastic Large denomination/Double Denomination errors, Off Metals, Duel Dated Double Denominations, U.S. on Foreign Double denominations, Proof errors, Multi Bonded errors, Multi Bonded Caps and folded errors.. Many Many Early dated, and Fantastic Type coin errors.

This summer, expect to see many One of a Kind Errors making their preview into the marketplace. I know of at least six major collections that will be released some time this summer and all I can say that these are WOW factor collections.

I've made my plans for this year ANA show in Anaheim and plan to attend "CONECA's Club/dinner. I hope YOU started making your plans, if not for Anaheim, then for some other major shows near you.

WORLD PAPER MONEY ERRORS

World Paper Money Errors Explored!

Odd shapes, upside down prints, intriguing cuts and folds, and missing design elements are only a few of the different printing errors examined in this expansive collection on foreign error notes. World Paper Money Errors is a visually compelling avenue into the fascinating and rarely explored area of numismatics that expands on the hobby of collecting paper currency.

Author Morland Fischer's comprehensive collection reflects the attraction and advantages of exploring foreign printing errors. An overview of collecting paper money errors in today's numismatic market offers insights on the great disparity between domestic and world notes. Market values are discussed, acknowledging what variables make an error note precious in the trade. Incorporating these concepts and more, Fischer expands the method of collecting currency errors by introducing a Foreign Error Note (FEN) scale to gauge price levels based on error type.

With over 200 examples of dramatic, colorful and intriguing foreign paper money errors, collectors and spectators alike are exposed to a new form of collecting currency. The numismatic community will benefit from this thorough guide that is unlike any other on the market.

Error Coin Information Exchange

The Error Coin Information Exchange (ECIE) is a freewheeling forum dedicated to the study of error coins and varieties. Founded and hosted by veteran writer and researcher Mike Diamond, it is a great place to visit, whether you're an established collector or a novice. ECIE is not flashy and doesn't waste your time with a message board clogged with idle chit-chat. It simply provides the best information on error coins available on the web. Here you can read about late-breaking developments; find out about the newest discoveries; listen or participate in spirited debates about how error coins are produced; test your skills with periodic quizzes and brain-teasers. ECIE proudly maintains an atmosphere of skeptical inquiry. Here, no claim goes unchallenged and no theory goes untested. This is the best place to find out what kind of error you really have, how it was created, and the extent to which it is rare or unusual.

Policy Statement: By design, ECIE does not attempt to develop partnerships with dealers, grading services, or auction houses. It neither seeks, nor encourages, discounts, promotions, giveaways, or advertisements. To do otherwise would create a conflict of interest that could compromise the fierce independence and impartiality that distinguishes ECIE from all other on-line error coin clubs.

NGC CERTIFIES FIRST FOREIGN GOLD PATTERN EVER STRUCK BY UNITED STATES

BY NGC

NGC graders have certified a rare 1855 Peruvian Gold Pattern 2 Peso struck at the Philadelphia Mint.

Numismatic Guaranty Corporation (NGC) has graded an 1855 Peruvian Pattern 2 Peso in gold that was the first pattern struck by the United States Mint for a foreign country. “Patterns” are sample coins that were struck to test a new design, composition, denomination or other new feature. They were typically struck in extremely small numbers for test and display purposes.

The Peru 1855 Pattern 2 Peso came about during a turbulent time in that country’s early history. After it gained its independence from Spain in 1824, Peru became part of a short-lived confederation comprised of three states: North Peru, South Peru, and Bolivia. This ended with the War of Confederation in 1839, which resulted in the separate countries of a unified Peru and Bolivia.

After two wars and many internal political issues, Peru faced several serious economic problems. During these wars, many merchants and businessmen had fled the newly founded country, taking with them their wealth. Money shortages developed as a result—any coins that remained in the country were hoarded and a lack of production at silver mines within Peru prevented new coins from being struck.

The shortage of coins resulted in the use of Bolivian coinage, which had lower silver content than the Spanish coinage upon which Peru’s economic system had been developed, causing confusion and price instability.

Peru subsequently opened more mints within its borders – at Cusco, Cerro de Pasco, and Arequipa – to create solid Peruvian money based off of the old Spanish weights and purities. A decision was made, however, to transition the coinage system from the Spanish octal (e.g. 8 Reales) system to the decimal system. The United States made pattern coinage samples for Peru, hoping to receive a

contract for the production of Peruvian coinage. The Peru 1855 2 Peso struck in gold was minted at the Philadelphia Mint, three years prior to the anticipated transition to the decimal system in 1858. Other decimal coinage was struck at Philadelphia in the hopes of obtaining the coinage contract.

Peru, however, opted to continue to produce its own coinage and even modernized the Lima Mint with new steam minting machines from England to replace the aging Spanish colonial equipment. It would be 1863 when Peru finally transitioned to a new system, with the Sol as the replacement for the Spanish peso. A peso was initially valued at 0.8 soles.

The Peru 1855 Gold Pattern 2 Peso is important in the numismatic histories of both the United States and Peru. While the United States had previously produced issues that circulated overseas, this was the first pattern coinage struck at the Philadelphia Mint for a foreign country. This was done before Congress revoked the legal tender status of the Spanish 8 Reales in the Coinage Act of 1857, and it would not be until 1874 when Congress explicitly authorized the United States Mint to contract to manufacture coins for foreign governments (provided that these contracts did not interfere with the required coinage of the United States). For Peru, it marked a transition in their economic history which took years to complete. Ultimately, the foresight that economic reform was needed for financial stability proved to be correct.

The Philadelphia Mint is believed to have struck only six examples of the Peru 1855 Gold Pattern 2 Peso. Of these, NGC has certified two, this example being graded NGC PF 62. The other, formerly from the collection of King Farouk, was graded NGC PF 63. A third example is in the National Numismatic Collection of the Smithsonian Museum and the other three examples are not publicly known today.

MIKE BYERS INC

MIKEBYERS.COM

U.S. & WORLD MAJOR MINT ERRORS

Consign Your Coins to mikebyers.com

Terms and Conditions

We are offering this service for error collectors and dealers alike. In order to post your item on our website you must agree to the following terms and conditions.

1. All coins must be from the United States, certified by PCGS or NGC, have a minimum value of \$25,000 each and should be either Gold Coins (Pre-World War 1), Patterns or Early Type Mint Errors (Pre-1950).
2. Each item must meet our inventory criteria in terms of desirability and market value.
3. Mike Byers Inc charges a 10% Commission on each sale.
4. The minimum time for any listing is thirty days.
5. Seller agrees to a seven day return privilege from date of receipt.
6. Seller agrees to use an escrow service if requested by the buyer.
7. We reserve the right to deny or cancel any listing at any time.
8. All listing are subject to prior sale.

Scanning Specifications

1. Scan both the obverse and reverse of the entire holder.
2. Scan with a resolution of at least 300 dpi.
3. Save the picture in jpeg format (jpg).

Information Requirements

In addition to e-mailing a photo of your item, please include the following information:

1. Name, Address & Phone Number
2. E-Mail Address
3. Asking Price

After your item is listed, we will contact you by e-mail with any offers and questions. Once a price is agreed upon we will handle the entire sale for a 10% transaction fee, which includes all costs (eBay fees, grading fees, webmaster charges, postage and registration fees, insurance, paperwork, etc.).

If you have a collection for sale or would like to sell your duplicates and do not want to consign your coin(s), we can purchase your entire collection outright. Please contact us at mike@mikebyers.com.

PCGS Certifies 1945 Netherlands East Indies 2½ Cent STRUCK IN GOLD At The U.S. Philadelphia Mint

by Mike Byers (mikebyers.com)

PCGS Certifies 1945 Netherlands East Indies 2½ Cent STRUCK IN GOLD At The U.S. Philadelphia Mint

Here is a comparison of this proof gold pattern (left) with the authorized issue in bronze (right).

This is a proof pattern gold striking of KM-316. The regular issued coin was struck in bronze. This proof gold pattern weighs 13.2 grams and is 31 mm wide.

It is unlisted in Krause. There are only 3 known. This specific coin is in gem proof, certified and authenticated by PCGS as Proof 64.

The obverse portrays a crown and shield with a lion and the reverse shows Jawi script that translates to “One fortieth Rupiah.”

The Japanese Empire occupied the

Netherlands East Indies during World War II from 1942 through 1945. Subsequently, the Dutch Government had the U.S. strike bronze coins in the 3 U.S. Mints during this time period.

A 1944 decree authorized the striking of the 2½ cent gold patterns. This half-dollar-sized proof gold pattern of an issued bronze coin is a fascinating part of the history of U.S. Mint.

The dies were produced inside the U.S. Mint in Philadelphia. This is an extremely rare proof gold pattern, with 3 known surviving examples to date.

Mint Error News Price Guide

- Updated April 2016 -

This price guide is brought to you by Mint Error News. It has been compiled by many of the top major mint error dealers.

This price guide is a guide. Prices fluctuate due to the date, grade, eye appeal and how dramatic the striking error is. Rarity is also a factor. The price is sometimes based on the rarity and grade of the type of coin as well as how rare the error is. The price can also vary depending on whether two collectors are bidding for the same rare major mint error. When purchasing a mint error, it is important to use multiple resources to determine value, as there are many mint errors that do not fit into one category.

Proof Errors (Updated April 2016)

Proof coins are struck by technicians who hand feed the blanks into special presses. They are produced, examined, and packaged using extreme quality control. It is very unusual to find major proof errors. A few broadstrikes, off-centers, double strikes in collars and off-metals have been known to be found in sealed proof sets. Proof errors are aggressively sought after by many error collectors.

A very small group of Proof errors recently came from a collection that was auctioned by the State of California. The U.S. Secret Service inspected and released this collection to the State of California determining that it was legal to own. The State of California then auctioned the collection and it has been dispersed since the sale.

Proof Errors

Denomination	Broadstrikes	Die Trials	Double/Triple Strikes	Off-Center Strikes	Partial Collar Errors
Proof Lincoln Cent	\$1,500 - \$2,500	N/A	\$4,000	\$1,500 - \$3,000	\$750
Proof Jefferson Nickel	\$2,500 - \$4,000	\$4,000	\$6,000	\$2,000 - \$5,000	\$1,000
Proof Clad Dime	\$3,000 - \$5,000	N/A	\$6,000	\$2,500 - \$5,000	\$1,250

Proof Clad Half	\$5,000 - \$7,000	\$4,000 - \$5,000	\$7,500	\$4,000 - \$7,500	\$2,000

Mint Error News Price Guide

Broadstrikes (Updated April 2016)

A broadstruck error occurs when a coin is struck without the collar to form the rim and edge that is part of the shape of the coin. Coins can be broadstruck on either type one or type two planchets. When a coin is broadstruck the blank being fed into the collar will spread and distort outward as it is being struck because the collar isn't in the correct position to retain it.

Broadstrikes

Denomination	(Small) XF/AU	(Small) Unc	(Large) XF/AU	(Large) Unc

Mint Error News Price Guide

Partial Collars (Updated April 2016)

Partial collar strikes occur when there is a malfunction of the striking press. This causes the collar to be in an incorrect position. The lower die (usually the reverse die) is recessed in the collar. This allows the coin which is going to be struck to have a formed rim. After a coin is struck the lower die raises upwards, pushing the struck coin out of the collar and ejecting it. If a blank entering the collar is not properly seated, it will only have partial reeding as it is struck. The edge of this coin will have a partial reeding and a partial blank surface area. Recently, the Mint has installed new machinery where either die can be installed in either position.

Partial Collar Errors

Uniface Strikes (Updated April 2016)

Uniface coins occur when there have been two blank planchets in the press at the same time. The other blank will obstruct the die on either the obverse or reverse side, which will prevent it from having that design on the coin. There are many different variations involving uniface errors. In addition to having a 100% blank obverse or reverse, a coin can be struck off-center, with a blank planchet in the collar which will obstruct one side of the off-center. There are also mated pairs which have a combination of multiple errors which can include a side which is uniface. Finally, there are uniface strikes due to a die cap which adhered to the die, forming itself in the shape of a die and striking blank planchets.

Uniface

Bonded Coins

(Updated April 2016)

Bonded coins occur when the feeder system, which supplies blank planchets to the coin press, malfunctions and jams. When this occurs, a struck coin is not properly ejected and another planchet is fed into the collar and is struck. This struck coin will land on top of the previously unejected strike. These coins will then crush and bond together. This may occur many times as more coins bond.

Bonded Coins

Struck Fragments

(Updated April 2016)

The blanking press takes the coils of metal strips and punches blanks out of it, ejecting the webbing at the other end. The webbing is cut into small scrap pieces to be melted and recycled. Occasionally a scrap piece will be mixed with the blank planchets and struck by the dies. Struck fragments are rare in the larger denominations. These can be uniface or die struck both sides and are very rare on type coins.

Struck Fragments

Mated Pairs (Updated April 2016)

Mated pairs involve two individual coins with different errors that were struck together at the same time. Mated pair error combinations can be found in most error types and come in many shapes and sizes. Mated pairs can be overlapped when one of the coins is struck off-center on top of another coin. Another type involves a brockage where a struck coin was perfectly centered on a blank and restruck. Some mated pairs involve a die cap where the cap and brockage coin are discovered together, but this is a scarce find.

The rarest mated pair type involves two die caps (obverse and reverse) where both dies were capped at the same time and both die caps are mated. This last type is extremely rare and there are only a few known examples of mated pairs involving an obverse die cap and reverse die cap. There are several of these mated pairs known on Kennedy Halves including two dated 1976, which is the Bicentennial year. One of the most spectacular mated pairs involve two Barber Dimes, an obverse die cap mated to a reverse die cap and are unique.

Mated pairs can also involve an off-metal where a smaller blank planchet or smaller struck coin was struck on top of a larger coin. This type is extremely rare. The most spectacular pair known is a double struck Franklin Half which was mated to a Lincoln Cent. The Lincoln Cent blank was on top of the obverse of the struck Franklin Half. This pair was then struck together. It is unique.

Transitional Errors (Updated April 2016)

A transitional error occurs when a coin is struck on a planchet from a previous year with different metal composition. The most famous transitional is a 1943 copper cent struck on a 1942 copper blank. 1943 cents were struck in steel because of the copper shortage during World War II. Other famous transitionals include 1965 coinage struck in silver instead of clad.

There are also transitionals struck on blanks for the next year. An example is 1964 coinage in clad instead of silver. Most recently, transitionals were discovered involving the SBA and Sacagawea Dollars of 1999 and 2000. There are eight known 1999 SBA Dollars struck on the brass planchet for the 2000 Sacagawea Dollar, and four known 2000 Sacagawea Dollars struck on a clad planchet for the 1999 SBA Dollar.

Transitional Errors

U.S. Gold Errors (Updated April 2016)

Major mint errors on U.S. Gold coins are the most prized category of all mint errors. Gold errors are very rare and a few have traded in the \$75,000 to \$100,000 range. Even a broadstruck U.S. Gold coin can easily sell for \$15,000 to \$30,000 compared to a broadstruck Cent, Nickel, Dime or Quarter which all sell for well under \$10. Many serious collectors of Gold Errors have to wait patiently for months and sometimes even years to acquire that one special piece for their collection.

The prices listed here are for common dates in AU-Unc. Better dates and errors that are in gem condition are worth considerably more.

U.S. Gold Errors

Denomination	Partial Collar	Broadstruck	Clipped Planchet	3% - 5% Off-Center	10% - 15% Off-Center
\$1 Gold Type 1	\$5,000	\$10,000	\$5,000	\$12,500	\$20,000

Indents (Updated April 2016)

An indent error occurs when two blanks are fed inadvertently into the same collar, with one blank partly overlaying on top of the other. When the hammer die strikes this combination, the upper blank will be forced into the lower blank, creating a depression which is shaped similar to the upper blank. A scarce type of indent occurs when a blank intended for one denomination lands on top of a blank from a different denomination.

Die Caps (Updated April 2016)

Die caps are caused when a struck coin sticks to the upper hammer die. Once the coin is struck to the die face, the reverse of the struck coin becomes the new die face. When the next blank is fed into the collar and the strike occurs, the reverse design of the adhered struck coin impresses itself into the new blank. This struck coin is a brockage strike. The coin that adhered to the upper die is known as a die cap. This process repeats itself as more coins are struck by the cap. The greater the number of strikes, the higher the cap metal will be pushed around the upper die shaft. Eventually, the cap brakes away from the die in the shape of a thimble.

Die Adjustment Strikes (Updated April 2016)

Die adjustment strikes are also known as die trials. This error occurs when a coin is struck from the press with very little pressure. When the press is being set up and adjusted, extremely weak strikes occur as the strike pressure reaches its optimum level. These die trials are destroyed after being struck and are rarely found in circulation.

Double Denominations (Updated April 2016)

One of the most expensive, popular, and desired types of errors are the double denominations. This error happens when a coin is struck on a previously struck coin of a smaller denomination. Examples are a cent on a struck dime, and a nickel on a struck cent. The most dramatic are those with considerable design visible from the original strike. There are a few known double denominations with different dates.

Brockages (Updated April 2016)

A brockage error can only occur when there are two coins involved. One of the coins involved will always be a struck coin which has not ejected properly. That struck coin will find its way back between the dies and will be struck next to a blank planchet which was fed into the collar. The image of that first struck coin will be impressed into that side of the blank planchet. The result will be a second coin which has images of the first coin impressed into it. Those images will be pressed into the coin and the image will be in reverse. This incuse sunken image is known as a brockage.

Double & Multiple Strikes (Updated April 2016)

When a blank planchet is struck by the dies, the normal procedure is for the feeders to eject the struck coin out of the collar and into a chute. If there is a malfunction and the struck coin isn't ejected, it may receive a second or third strike by the dies. A multiple struck coin can happen in many ways and have many combinations of errors.

(Since each double and multiple strike can vary from being 10% off-center to 90% off-center, the prices listed below can be substantially more based on the percent off-center and dramatic overall look.)

Off-Center Strikes (Updated April 2016)

Off-center coins are one of the most common and best known types of errors. This happens when a blank which is supposed to be fed into the press, lands in the collar improperly. When this occurs only part of the blank is between the upper and lower dies. When the dies strike the blank, only that part will be struck with a design.

Denomination	10% - 15% XF/AU	25% - 60% XF/AU	10% - 15% Unc	25% - 60% Unc

Off-Metals (Updated April 2016)

Off-metal and wrong planchet errors occur when a correctly made blank from one denomination is accidentally fed into a press for another denomination. Examples are a nickel struck on a cent planchet and a cent struck on a dime planchet. The coin struck on an incorrect blank will weigh exactly what the denomination of that blank would have been. An even more dramatic wrong planchet error is a coin struck on a previously struck coin of a different metal.

Mint Error News Price Guide

Counterbrockages

(Updated April 2016)

A counterbrockage error involves a cap die and a previously struck coin. When a cap die strikes a previously struck coin, the obverse design from that struck coin will be impressed into the cap. The result will be a design where the cap face will be an incuse brockage. When a new blank is struck by this cap die with an incuse brockage image, the obverse will have a raised and spread image from that incuse design of the cap. This brockage impression is known as a counterbrockage.

Mint Error News Price Guide

Fold-Over Strikes (Updated April 2016)

A fold-over coin is one of the most dramatic types of errors. It occurs when the blank is standing vertically between the dies. During the strike, the force is so great that it bends and folds the blank. These fold-overs can be on-center or off-center, and come in many different shapes. There are a few fold-overs with multiple errors, either with an additional strike or fold-over. Denominations above quarters are very scarce.

Denomination	AU	AU Dated	Unc	Unc Dated
Indian Cent Memorial Copper	\$1,000	\$1,250	\$1,250	\$1,500
Lincoln Cent Memorial Zinc	\$750	\$1,000	\$1,000	\$1,250

Martha Washington Test Pieces (Updated April 2016)

There is one set of a Dime, Quarter and Half struck by Martha Washington dies that are permanently housed in the Smithsonian Institute, embedded in blocks of lucite. According to United States Pattern and Related Issues, by Andrew W. Pollock III, “the only trial pieces purported to have survived metallurgical testing in 1965 were the Dime, Quarter Dollar, and Half Dollar equivalent strikes in copper-nickel clad over copper.”

Mike Byers’ discovery of the Martha Washington Test Piece on a copper-zinc Cent planchet struck 10% off-center with a uniface reverse was a front page Coin World article on August 7th, 2000.

Denomination	Unc	Choice	Gem
Martha Cent	\$4,000	\$5,000	\$6,000
Martha Nickel	\$4,500	\$6,000	\$7,500
Martha Dime	\$7,500	\$10,000	\$12,500
Martha Quarter	\$5,000	\$7,500	\$10,000
Martha Half Dollar	\$5,000	\$7,500	\$10,000
Martha Dollar (SBA Planchet)	\$10,000	\$12,500	\$15,000
Martha Dollar (Sac Planchet)	\$6,000	\$7,500	\$10,000

Issues of Mint Error News Magazine are available for you to read online at:

minterrornews.com

Mike Byers is the Publisher & Editor of Mint Error News Magazine

COINWeek

The CoinWeek Mission:

Our mission is a simple one, to inform, entertain and educate our readers about coins, paper money, and every other area of numismatic pursuit.

We accomplish that mission by having the best numismatic writers and contributors in the industry. In fact since 2011, CoinWeek writers and contributors have won over 40 Numismatic Literary Guild Awards and CoinWeek itself has been named the “Best Online News Site” for the last 4 years straight.

CoinWeek provides the facts that collectors can use. We tell the back stories about coins and the people that collect and sell them. We provide perspective commentary and analysis on the issues that effect the industry and the hobby we love.... **And we do it all for FREE.**

Why You Should Read CoinWeek:

- CoinWeek is independent and unafraid of tackling important issues that face the hobby.
- CoinWeek and its representatives attend almost all of the major Coin & Currency conventions in order to bring the most current print and video news from the numismatic marketplace to our readers.
- CoinWeek offers innovative coverage of modern coin issues, auction houses, and the world mints. We go beyond the surface information you usually find elsewhere.
- CoinWeek maintains the largest numismatic video library accessible on the web to offer our subscribers the most comprehensive educational video available with information about rare coin and currency news, seminars, interviews, collecting tips and more.

New Edition of Bart's United States Paper Money Errors Available Now

UNITED STATES PAPER MONEY ERRORS

A Comprehensive Catalog & Price Guide

DR. FREDERICK J. BART

FOURTH EDITION

Comprehensive Catalog and Price Guide makes first appearance since 2008

By Coin & Currency Institute....

After a lapse of seven years, a new edition of United States Paper Money Errors, Fred Bart's ground-breaking book is now available. The fourth edition is more than just an update to the third: Bureau of Engraving and Printing (BEP) errors have been added, nearly all the illustrations have been changed, there is a rarity guide for each note—which additionally are now priced in four grades (EF, AU, Choice CU and Gem CU)—and, for the first time, there is a section showing some notes in color.

This has always been an enormously popular book, not only among established collectors but also with newcomers seeking to learn more about their "find." There is no other book like it on the market. More than a price guide, its 296 pages contain a wealth of information on what to look for and what mistakes to avoid. It is a necessity for all dealers, collectors, and anyone who comes into regular contact with paper money.

- The new and improved must-have book for U.S. paper money errors
- Rarity guide for each note
- Prices in four conditions
- The universally-used Friedberg Numbering System™—The standard method for describing U.S. currency
- Invaluable appendices with data found nowhere else
- Hundreds of photos
- 296 pages, 20+ with new info
- Convenient & handy 5.75 x inch format

Sullivan Numismatics

(3) Piece Set
1972-S Proof Kennedy Half Mated Set
NGC PF-64
\$15,000

This is an incredible 3-piece set of proof 1972-S Kennedy halves. There are actually (2) coins which make up this set as follows:

Coin #1 Double-struck in-collar, and indented on 2nd strike from elliptical strike clipped coin (coin #2)

Coin #2 Elliptical strike clipped coin, with mirror brockage from being indented (into coin #1.)

Coin #3 This is the other half of Coin #2, and it is the mate to that coin. It separated during the strike from Coin #2 due to its having been sheared in half by the rim of the collar die and the hammer die.

Sullivan Numismatics

The error occurred in a sequence of fairly straight forward events. The 1972-S half (coin #1) was struck in collar, not ejected due to the collar being stuck in the “up” position. Another planchet was fed into the striking chamber, and rested off-center on top of it. The coins were then struck together, with the “stuck collar” and the downward movement of the hammer (upper) die shearing the off-center coin in half, and striking an elliptically shaped piece of the planchet into the underlying coin.

This is the only set of this kind we have ever seen, and although elliptical strike clips can be found, particularly for the Lincoln cent series, this is the only Kennedy half dollar elliptical strike clip we know of, and it’s also the only elliptical strike clip and it’s mate (the sheared off piece of planchet) which we’ve ever seen together for any coin series! A truly unique set, and this would be the centerpiece of a fine Kennedy half dollar error collection.

MINTERRORNEWS GLOSSARY

What are Gold Off-Metal Strikes?

Gold off-metal strikings are among the most coveted and fascinating coins known. Occasionally, a regular issued coin struck in a lower base metal is struck in gold for presentation purposes or possibly struck unofficially.

The most famous examples are the United States Indian Cents struck in gold, the two known United States Pan Pac Commemorative Half Dollars struck in gold and this unique Canadian \$15 Olympic Commemorative struck in gold.
