MINT **ERROR** NEWSTM MAGAZINE

Bringing the latest mint error news to the collector.

Mike Byers, Publisher & Editor, Welcomes You!

Welcome to Mint Error News Magazine, bringing the latest mint error news and information to the collector. This is our thirteenth year bringing you both an online PDF magazine and the Mint Error News website. There are over 1,000 articles, features, discoveries, news stories with mint error related info from the United States and around the World. Our website, minterrornews.com, has become the most popular and informative Internet resource for mint errors and is read by thousands of dealers and collectors.

Mike Byers (mikebyers.com) is president of Mike Byers Inc. He has been a professional numismatist for over thirty-five years. He is one of the largest dealers handling U.S. Gold Coins, Patterns and Rarities certified by PCGS and NGC. He has handled major coin collections and attends every major coin convention. Mike Byers carries an extensive inventory as well as solicits want lists and is always looking to purchase fresh inventory and collections. You can visit Mike Byers and view his rarities at the ANA, Central States, FUN show and the Long Beach Coin Expo.

Mike Byers was a consultant to ANACS for Mint Errors from 2000 to 2006. He is also the Owner, Publisher and Editor of Mint Error News Magazine and the Mint Error News Website that was founded in 2003. In 2009, Mike Byers published his first book, *World's Greatest Mint Errors*, which received the NLG Award for Best World Coin Book and is available on Amazon.com.

Fred Weinberg is a highly respected numismatist, with 40 years of full time experience in the rare coin marketplace. He deals in numismatic United States Gold & Silver coinage, as well as specializing in buying & selling Major Mint Error coinage of all types. He is one of the original 31 dealers selected as an authorized P.C.G.S. (Professional Coin Grading Service) dealer at its inception in 1986.

Andy Lustig has been dealing in U.S. and World Coins since 1975 and has attended more than 2,000 coin shows and auctions. Andy is the co-founder of the Society of U.S. Pattern Collectors (uspatterns.com). He has been a member of the Professional Numismatists Guild (PNG #614) since 2005. He is a member of NGC and was also a former grader and authenticator for PCGS.

NGC Certifies Unique 1943 Lincoln Cent 13-Piece Set Including an Experimental Antimony Test Piece

by Mike Byers (mikebyers.com)

Included in this unique 1943 Lincoln Cent 13-piece set is an experimental 1943 Lincoln cent and 12 blanks and planchets with different compositions that were part of the metallurgical testing done by the Philadelphia Mint for an alternative to the pre-1943 bronze cent.

NGC Certifies Unique 1943 Lincoln Cent 13-Piece Set Including an Experimental Antimony Test Piece

The experimental 1943 Lincoln cent was struck in steel but was coated with a combination of 90% zinc, 4% antimony and 6% iron. It is similar to Judd-2085 although no Judd designation is on the NGC holder.

The only other known piece was featured in an article in the September 21, 2009 edition of Coin World. The article, written by Coin World reporter Paul Gilkes, identified the owners as “the children of a former Philadelphia Mint metallurgist [now deceased] who worked on finding an alternative to the pre-1943 bronze cent.”

The 1943 Judd-2085 Lincoln cent is part of a 5-piece NGC certified set and was authenticated and certified AU58. The accompanying envelope is annotated: “Experimental Zinc & Antimony on steel. Dec. 1942.” According to David Camire, an NGC consultant, this pattern for the 1943 cent was “subjected to nondestructive, X-ray fluorescence.” Camire continued that “the testing determined the composition to be 90 percent zinc, 4 percent antimony, 6 percent iron plating” according to the Coin World article.

The USPatterns.com website reports that “It differs from

NGC Certifies Unique 1943 Lincoln Cent 13-Piece Set Including an Experimental Antimony Test Piece

the regular zinc coated steel cent of this year in that the plating includes antimony and iron. According to researcher Roger Burdette, it is probable that the antimony was added to make the coin darker in color in order to make it less likely to be confused with a dime which, apparently happened often.”

The 5-piece NGC set from The Geyer Family Collection included an experimental antimony test piece, a pattern and 3 blanks. It originally sold for \$161,000.00 in the Heritage January 2010 FUN US Coin Auction in Orlando, FL. It later sold for \$58,750.00 in the Heritage November 2013 US Coin

Signature Auction in New York. In comparison, the 13-piece set featured here includes a similar antimony test piece as well as several experimental blanks and planchets that were not part of the 5-piece set, making it a much more interesting and comprehensive collection.

This unique 13-piece set represents a fascinating part of the Mint’s history and production of experimental coinage. This exciting and historic set clearly illustrates the U.S. Mint’s process in developing an alternative to the bronze cent due to the shortage of copper during World War II.

NGC and PCGS Certify Previously Unknown Experimental Blanks & Planchets

by Mike Byers (mikebyers.com)

Recently PCGS and NGC have authenticated and certified experimental blanks and planchets struck at the U.S. Mint. These include Clad Ike dollar planchets with an experimental upset rim, a group of 1943 Lincoln cents including experimental blanks and planchets, unique experimental Ike dollar planchets with notations by the Mint on the planchets, a few Jefferson nickel planchets with an experimental finish and a unique Jefferson nickel planchet with an experimental rinse and a notation by the Mint on the planchet.

This is part of the U.S. Mint's history and production of experimental coinage. These experimental blanks and planchets were previously unknown to the numismatic community.

A COLLECTION OF STATE QUARTERS STRUCK ON ELLIPTICAL PLANCHETS

Editor's Note: Jon Sullivan recently purchased an amazing collection of State Quarter major mint errors. Included were a large group of State Quarters struck on elliptical planchets. U.S. coins struck on elliptical planchets are scarce, making this an impressive collection.

2007-D IDAHO QUARTER ELLIPTICAL CLIP NGC MS-63

Elliptical clip with an oval shape. The coin weighs 4.9 grams.

2006-D NEVADA QUARTER ELLIPTICAL CLIP NGC MS-66

Elliptical clip, with the coin having a perfect "football" shape.

A COLLECTION OF STATE QUARTERS STRUCK ON ELLIPTICAL PLANCHETS

2004-D TEXAS QUARTER ELLIPTICAL CLIP NGC MS-64

Elliptical clip with an oval shape to the coin, and with a weight of 4.8 grams.

2002-D INDIANA QUARTER ELLIPTICAL CLIP PCGS AU-55

Elliptical clip and with an oval shape to the coin. A scarce state for elliptical clips.

2002-D OHIO QUARTER ELLIPTICAL CLIP NGC AU-58

Elliptical clip with the coin having an oval shape. A scarcer state for elliptical clips.

A COLLECTION OF STATE QUARTERS STRUCK ON ELLIPTICAL PLANCHETS

2001-P VERMONT QUARTER ELLIPTICAL CLIP NGC MS-65

Elliptical clip with the coin having an oval shape. The coin weighs 4.9 grams. Very scarce.

2001-P NORTH CAROLINA QUARTER ELLIPTICAL CLIP NGC MS-65

Elliptical clip, with a perfect "football" shape to the coin. A beautiful example!

2000-D NEW HAMPSHIRE QUARTER ELLIPTICAL CLIP NGC MS-65

Elliptical clip, with the coin having a perfect "football shape." Beautiful example!

A COLLECTION OF STATE QUARTERS STRUCK ON ELLIPTICAL PLANCHETS

1999-D DELAWARE QUARTER ELLIPTICAL CLIP PCGS MS-62

An elliptical clip with an oval shape to the coin. Very scarce on Delaware Quarters.

2002-D MISSISSIPPI QUARTER ELLIPTICAL CLIP & 5% OFF-CENTER PCGS MS-66

The elliptical clip is an oval shape, and the off-center strike is quite obvious.

2000-P MASSACHUSETTS QUARTER ELLIPTICAL CLIP & BROADSTRUCK NGC MS-64

Scarce Massachusetts Quarter broadstruck and elliptical clip.

A COLLECTION OF STATE QUARTERS STRUCK ON ELLIPTICAL PLANCHETS

2006-D SOUTH DAKOTA QUARTER ELLIPTICAL CLIP NGC MS-64

Elliptical clip and with a nice football shape. Very scarce.

2006-D COLORADO QUARTER ELLIPTICAL CLIP NGC MS-64

Elliptical clip and with an oval shape. The coins weighs 4.6 grams.

2000-P SOUTH CAROLINA QUARTER ELLIPTICAL CLIP NGC MS-66

Elliptical clip with an oval shape.

A COLLECTION OF STATE QUARTERS STRUCK ON ELLIPTICAL PLANCHETS

2000-P NEW HAMPSHIRE QUARTER ELLIPTICAL CLIP PCGS MS-64

Elliptical Clip with an oval shape.

1999-P CONNECTICUT QUARTER ELLIPTICAL CLIP NGC MS-64

Elliptical clip with a oval shape. 4.8 Grams.

1999-D GEORGIA QUARTER ELLIPTICAL CLIP NGC AU-58

Elliptical clip with an oval shape.

A COLLECTION OF STATE QUARTERS STRUCK ON ELLIPTICAL PLANCHETS

2007-D UTAH QUARTER ELLIPTICAL CLIP NGC MS-62

This is about as nice an example as is likely to exist for Utah ellipticals.

2007-D WYOMING QUARTER ELLIPTICAL CLIP NGC MS-65

Elliptical clip Wyoming Quarter. The coin has an oval shape, and weighs 4.7 grams.

2006-D NEBRASKA QUARTER ELLIPTICAL CLIP 4.9 GRAMS NGC MS-62

Elliptical clip and with an oval shape. A rare state for elliptical clips.

A COLLECTION OF STATE QUARTERS STRUCK ON ELLIPTICAL PLANCHETS

2005-D KANSAS QUARTER ELLIPTICAL CLIP NGC MS-62

The coin has superb eye-appeal, and is a scarce state for ellipticals.

2005-P KANSAS QUARTER ELLIPTICAL CLIP PCGS MS-64

The coin is an oval shape, but is still an obvious elliptical clip.

2005-D WEST VIRGINIA ELLIPTICAL CLIP NGC MS-65

Elliptical clip with a perfect "football" shape to it. Scarce.

A COLLECTION OF STATE QUARTERS STRUCK ON ELLIPTICAL PLANCHETS

2008-D ARIZONA QUARTER ELLIPTICAL CLIP NGC AU-58

Elliptical clip, with an oval shape. Scarce state.

2007-D MONTANA QUARTER ELLIPTICAL CLIP NGC MS-64

Montana Quarter elliptical clip, with a perfect football shape. The coin weighs 4.2 grams.

2001-P NEW YORK QUARTER ELLIPTICAL CLIP PCGS MS-66

Elliptical clip with an oval shape to the coin.

A COLLECTION OF STATE QUARTERS STRUCK ON ELLIPTICAL PLANCHETS

2000-D VIRGINIA QUARTER ELLIPTICAL CLIP 4.2 GRAMS NGC AU-58

Elliptical clip with an oval shape. The coin weighs 4.2 grams.

2000-P VIRGINIA QUARTER ELLIPTICAL CLIP NGC MS-66

Struck on an elliptically clipped planchet. The coin has an oval shape.

2006-D NORTH DAKOTA QUARTER ELLIPTICAL CLIP NGC MS-64

A rare state for elliptical clips.

A COLLECTION OF STATE QUARTERS STRUCK ON ELLIPTICAL PLANCHETS

2002-D TENNESSEE QUARTER ELLIPTICAL CLIP NGC MS-64

Elliptical clip, with the coin having a slightly oval “football” shape. 4.7 grams. Scarce.

2002-D MISSISSIPPI QUARTER ELLIPTICAL CLIP NGC MS-63

Elliptical clip, with the coin having a fairly nice “football” shape. 4.5 grams.

2008-D OKLAHOMA QUARTER ELLIPTICAL CLIP NGC MS-63

Elliptical clip with a somewhat oval football shape. Very scarce state for elliptical clips.

A COLLECTION OF STATE QUARTERS STRUCK ON ELLIPTICAL PLANCHETS

2004-D WISCONSIN QUARTER ELLIPTICAL CLIP NGC MS-65

Elliptical clip, with an oval shape. The coin weighs 5.0 grams. A scarce state for elliptical clips.

2007-D WYOMING QUARTER ELLIPTICAL CLIP PCGS MS-62

The coin is struck on an elliptically clipped planchet, and has an oval shape to it.

2008-P ALASKA QUARTER ELLIPTICAL CLIP 5.08 GRAMS ANACS MS-64

A scarcer state for major mint errors.

A COLLECTION OF STATE QUARTERS STRUCK ON ELLIPTICAL PLANCHETS

2007-D WASHINGTON QUARTER ELLIPTICAL CLIP NGC AU-58

2007-D MONTANA QUARTER ELLIPTICAL CLIP NGC MS-64

2007-D UTAH QUARTER ELLIPTICAL CLIP NGC MS-62

Almost a football shape! Scarcer state for errors.

A COLLECTION OF STATE QUARTERS STRUCK ON ELLIPTICAL PLANCHETS

2008-P ARIZONA QUARTER ELLIPTICAL CLIP NGC AU-55

Scarcer state for errors.

2007-D WYOMING ELLIPTICAL CLIP NGC MS-61

Oval shaped elliptical clip.

2007-D MONTANA ELLIPTICAL CLIP AU-58

This Montana Quarter is an elliptical clip, and weighs 4.97 grams (normal is 5.67.) Scarce.

NGC Certifies Pair of Unique 1880 Spain 50 Centimos Coins

by Mike Byers (mikebyers.com)

NGC Certifies Pair of Unique 1880 Spain 50 Centimos Coins

The unique proof was struck in silver at the Madrid Mint. It is in gem condition and has beautiful original toning and is pedigreed to the world famous Huntington Collection. It weighs 2.5 grams, has a diameter of 18 mm and was struck in .835 silver. This proof striking is not listed in Krause or any other references and is the only one known to the numismatic community.

The unique obverse die trial was also struck at the Madrid Mint, in copper gilt. Only the obverse die was used so the reverse is uniface. The design of this obverse die trial was adopted as the official design to strike the silver 50 Centimos for circulation and

to strike this unique silver proof coin as well. A few minor modifications were made to the portrait after this unique obverse die trial was struck.

This incredible pair of unique Spanish 1880 50 Centimos are authenticated and certified by NGC. These two striking were most likely presented to King Alfonso XII, whose portrait appears on the obverse.

Having dealt in mint errors, patterns and die trials for over 40 years as a professional numismatist, It is my opinion that both of these unique striking are part of the history of the production of the Spanish 1880 50 Centimos coinage.

New From Krause Publications:

Strike It Rich With Pocket Change

Error Coins Bring Big Money

by Brian Allen & Ken Potter
NEW 4th Edition

It takes a keen eye to spot them - and a little know-how - but errors on coins produced by the U.S. Mint occur every year. And these errors can be worth a fortune to coin collectors. *Strike It Rich with Pocket Change* shows the reader how to detect errors, what to look for and how to cash in on them. This book has a strong appeal for someone with a mild to dedicated

interest in coins, while drawing upon the treasure hunter in all of us - anyone who is looking for a hobby that does not require a great up-front investment, yet offers the potential of discovering valuable rarities. Any collector who has completed the standard set of a type or series now has an opportunity to broaden the scope of that collection.

Visit krausebooks.com for more information.

Unique “Two Tailed” Off-Metal

by Mike Byers (mikebyers.com)

This is one of two known U.S. or World Coins in numismatic history that were struck by either two obverse or two reverse dies and struck on an off-metal planchet. It is a Chile 2003 5 Peso struck with two reverse

dies on a Ni-Brass 1 Peso planchet certified by PCGS. The only other coin which fits this criteria is a Great Britain 1971 Halfpence struck with two obverse dies on a Copper-Nickel planchet that was certified by NGC.

CONECA

The Combined Organizations of Numismatic Error Collectors of America

CONECA is a national numismatic organization devoted to the education of error and variety coin collectors. CONECA focuses on many error and variety specialties, including doubled dies, Repunched mintmarks, multiple errors, clips, double strikes, off-metals and off-centers -- just to name a few. It publishes an educational magazine, The Errorscope, which is printed and mailed to members bimonthly. CONECA offers a lending library, examination, listing and attribution services; it holds annual meetings at major conventions (referred to as Errorama) around the country, and offers auction services to its members. Please visit conecaonline.org and enjoy!

CONECA Variety Attribution Services

CONECA offers two attribution services. One service enables members and non-members to send their coins directly to an authorized CONECA attributer. The other service is offered through the numismatic grading firm of ICG and enables CONECA members and non-members to have their coins attributed by a CONECA attributer and then graded and slabbed by ICG.

CONECA Error Examination Services

CONECA offers two examination services. One service enables members and non-members to send coins to an authorized CONECA examiner who will return an opinion of each coin's error classification. The other service is offered through the numismatic grading firm of ICG and enables CONECA members and non-members to have their coins examined by a CONECA examiner and then graded and slabbed by ICG.

conecaonline.org

WORLD PAPER MONEY ERRORS

World Paper Money Errors Explored!

Odd shapes, upside down prints, intriguing cuts and folds, and missing design elements are only a few of the different printing errors examined in this expansive collection on foreign error notes. World Paper Money Errors is a visually compelling avenue into the fascinating and rarely explored area of numismatics that expands on the hobby of collecting paper currency.

Author Morland Fischer's comprehensive collection reflects the attraction and advantages of exploring foreign printing errors. An overview of collecting paper money errors in today's numismatic market offers insights on the great disparity between domestic and world notes. Market values are discussed, acknowledging what variables make an error note precious in the trade. Incorporating these concepts and more, Fischer expands the method of collecting currency errors by introducing a Foreign Error Note (FEN) scale to gauge price levels based on error type.

With over 200 examples of dramatic, colorful and intriguing foreign paper money errors, collectors and spectators alike are exposed to a new form of collecting currency. The numismatic community will benefit from this thorough guide that is unlike any other on the market.

Error Coin Information Exchange

The Error Coin Information Exchange (ECIE) is a freewheeling forum dedicated to the study of error coins and varieties. Founded and hosted by veteran writer and researcher Mike Diamond, it is a great place to visit, whether you're an established collector or a novice. ECIE is not flashy and doesn't waste your time with a message board clogged with idle chit-chat. It simply provides the best information on error coins available on the web. Here you can read about late-breaking developments; find out about the newest discoveries; listen or participate in spirited debates about how error coins are produced; test your skills with periodic quizzes and brain-teasers. ECIE proudly maintains an atmosphere of skeptical inquiry. Here, no claim goes unchallenged and no theory goes untested. This is the best place to find out what kind of error you really have, how it was created, and the extent to which it is rare or unusual.

Policy Statement: By design, ECIE does not attempt to develop partnerships with dealers, grading services, or auction houses. It neither seeks, nor encourages, discounts, promotions, giveaways, or advertisements. To do otherwise would create a conflict of interest that could compromise the fierce independence and impartiality that distinguishes ECIE from all other on-line error coin clubs.

NGC CERTIFIES PAIR OF RARE, HISTORIC FRENCH MINT ERRORS

BY NGC

*Two mirror brockages were likely the very first
(or only) coins struck with the reverse die cap.*

NGC recently certified a pair of rare and extremely significant 19th century mint errors from France. These errors, known as mirror brockages, show the coin's normal obverse design on one side, and an incuse mirror-image of the obverse design on the reverse.

A brockage occurs when an already-struck coin sticks to one of the dies. This coin, now called a "die cap" in numismatic terminology, is then struck into the next planchet that is fed into the press.

Under normal circumstances, the die, which is a mirror image of the coin, would impart a raised and correctly oriented design on the planchet. When a coin sticks to the die, however, the raised design of that coin is impressed into the next planchet. As a result, that newly struck coin has an incuse, mirror image design—just like the die.

A mirror brockage shows the

correct design on one side and an opposite design on the other side. These are quite rare although they are a bit more common from this era than they are from the modernized mints of today. It is quite possible that some were intentionally made by mint employees.

These two coins are beautiful examples of essentially perfect mirror brockages. They were likely the very first (or only) coins struck with the reverse die cap. This is evident due to the sharp and centered designs. In late state die caps, the design would begin to distort and spread out as the coin is flattened by the force of each successive blow.

Both pieces circulated for quite a while before being noticed, or perhaps they were kept as pocket pieces. The first, an 1816-24 Five Francs, is graded NGC AU 53. The other, an 1832-48 Five Francs is graded NGC XF 45.

MIKE BYERS INC

MIKEBYERS.COM

U.S. & WORLD MAJOR MINT ERRORS

Consign Your Coins to mikebyers.com

Terms and Conditions

We are offering this service for error collectors and dealers alike. In order to post your item on our website you must agree to the following terms and conditions.

1. All coins must be from the United States, certified by PCGS or NGC, have a minimum value of \$25,000 each and should be either Gold Coins (Pre-World War 1), Patterns or Early Type Mint Errors (Pre-1950).
2. Each item must meet our inventory criteria in terms of desirability and market value.
3. Mike Byers Inc charges a 10% Commission on each sale.
4. The minimum time for any listing is thirty days.
5. Seller agrees to a seven day return privilege from date of receipt.
6. Seller agrees to use an escrow service if requested by the buyer.
7. We reserve the right to deny or cancel any listing at any time.
8. All listing are subject to prior sale.

Scanning Specifications

1. Scan both the obverse and reverse of the entire holder.
2. Scan with a resolution of at least 300 dpi.
3. Save the picture in jpeg format (jpg).

Information Requirements

In addition to e-mailing a photo of your item, please include the following information:

1. Name, Address & Phone Number
2. E-Mail Address
3. Asking Price

After your item is listed, we will contact you by e-mail with any offers and questions. Once a price is agreed upon we will handle the entire sale for a 10% transaction fee, which includes all costs (eBay fees, grading fees, webmaster charges, postage and registration fees, insurance, paperwork, etc.).

If you have a collection for sale or would like to sell your duplicates and do not want to consign your coin(s), we can purchase your entire collection outright. Please contact us at mike@mikebyers.com.

PCGS CoinFacts

Your Online Reference for U.S. Coins

Welcome to PCGS CoinFacts. Our site includes comprehensive information on nearly 30,000 U.S. coins. It offers everything from basic, startup information for new collectors, to a wealth of detailed information the seasoned collector, buyer or seller can't afford to be without.

From the PCGS CoinFacts Home Page, you can access all denominations and major types of U.S. coins. The link will take you to a Series Page, which offers images of the finest PCGS-graded coin in the series, and a nice explanation including the history and why the coins in the series are important.

The real “business end” of PCGS CoinFacts begins with the individual coin pages, which are loaded with photos and information. To view the essential features of PCGS CoinFacts, you can click on them one at a time, or go straight to a particular feature of interest.

PCGS Certifies TRANSITIONAL 1989-D Lincoln Cent Struck on a 3.1 Gram Copper Planchet (Pre-1983 Cent Planchet)

by Mike Byers (mikebyers.com)

PCGS Certifies TRANSITIONAL 1989-D Lincoln Cent Struck on a 3.1 Gram Copper Planchet (Pre-1983 Cent Planchet)

Coin World and Numismatic News have written articles on the discovery of a few 1983 Lincoln Cents struck on pre-1983 95 percent copper planchets (transitional mint errors). Heritage Auctions sold a 1983-P Lincoln Cent struck on a 95 percent copper planchet in AU 55 PCGS for \$16,450 in August of 2014. Stack's Bowers sold a 1989-D struck on a Pre-1983 cent planchet in MS 62 BN for \$22,325 in February of 2014. A regular 1983 Cent is copper-plated zinc and weighs 2.5 grams. These 95 percent copper planchet transitional mint errors are creating tremendous interest since they are similar to the world famous 1943 Copper Cents.

Cents struck from 1963 through mid-1982 are made up of 95 percent copper and 5 percent zinc. They weigh 3.1 grams.

The cents struck from mid-1982 to the present are struck on planchets made up of a solid zinc core (with a trace of copper) that are plated with pure copper and weigh 2.5 grams.

Here is an authenticated, certified and graded transitional Lincoln Cent struck in 1989. PCGS noted on the insert that it is on a pre-1983 Cent Planchet. This transitional striking is in gem mint state condition with beautiful original copper toning. It is incredible that a 95 percent copper planchet was used in 1989 to strike this coin. This transitional is dated 6 years after the 1983 transitional mint errors and is in a class by itself. It encompasses not only the popularity of the 1983 copper transitional Lincoln Cents but also the excitement and mystique of being struck by the Denver Mint 6 years later.

PCGS Certifies TRANSITIONAL 1989-D Lincoln Cent Struck on a 3.1 Gram Copper Planchet (Pre-1983 Cent Planchet)

PCGS Certifies TRANSITIONAL 1989-D Lincoln Cent Struck on a 3.1 Gram Copper Planchet (Pre-1983 Cent Planchet)

ANACS is the Collector's Choice because we know what counts: knowledge, integrity, and service. How much we value coin collecting is evident in our work.

The ANACS team enthusiastically works to advance coin collecting by offering unequaled expertise and developing new services.

This makes ANACS the choice of hobbyists, professional numismatists, and dealers. We are the coin grading service to contact when you want to know all the details about your coin's authenticity and grading.

Mint Error News Price Guide

- Updated December 2016 -

This price guide is brought to you by Mint Error News. It has been compiled by many of the top major mint error dealers.

This price guide is a guide. Prices fluctuate due to the date, grade, eye appeal and how dramatic the striking error is. Rarity is also a factor. The price is sometimes based on the rarity and grade of the type of coin as well as how rare the error is. The price can also vary depending on whether two collectors are bidding for the same rare major mint error. When purchasing a mint error, it is important to use multiple resources to determine value, as there are many mint errors that do not fit into one category.

Proof Errors (Updated December 2016)

Proof coins are struck by technicians who hand feed the blanks into special presses. They are produced, examined, and packaged using extreme quality control. It is very unusual to find major proof errors. A few broadstrikes, off-centers, double strikes in collars and off-metals have been known to be found in sealed proof sets. Proof errors are aggressively sought after by many error collectors.

A very small group of Proof errors recently came from a collection that was auctioned by the State of California. The U.S. Secret Service inspected and released this collection to the State of California determining that it was legal to own. The State of California then auctioned the collection and it has been dispersed since the sale.

Denomination	Broadstrikes	Die Trials	Double/Triple Strikes	Off-Center Strikes	Partial Collar Errors
Proof Lincoln Cent	\$1,000 - \$1,500	\$1,000	\$3,000	\$1,500 - \$3,000	\$500

Broadstrikes (Updated December 2016)

A broadstruck error occurs when a coin is struck without the collar to form the rim and edge that is part of the shape of the coin. Coins can be broadstruck on either type one or type two planchets. When a coin is broadstruck the blank being fed into the collar will spread and distort outward as it is being struck because the collar isn't in the correct position to retain it.

Partial Collars (Updated December 2016)

Partial collar strikes occur when there is a malfunction of the striking press. This causes the collar to be in an incorrect position. The lower die (usually the reverse die) is recessed in the collar. This allows the coin which is going to be struck to have a formed rim. After a coin is struck the lower die raises upwards, pushing the struck coin out of the collar and ejecting it. If a blank entering the collar is not properly seated, it will only have partial reeding as it is struck. The edge of this coin will have a partial reeding and a partial blank surface area. Recently, the Mint has installed new machinery where either die can be installed in either position.

Uniface Strikes (Updated December 2016)

Uniface coins occur when there have been two blank planchets in the press at the same time. The other blank will obstruct the die on either the obverse or reverse side, which will prevent it from having that design on the coin. There are many different variations involving uniface errors. In addition to having a 100% blank obverse or reverse, a coin can be struck off-center, with a blank planchet in the collar which will obstruct one side of the off-center. There are also mated pairs which have a combination of multiple errors which can include a side which is uniface. Finally, there are uniface strikes due to a die cap which adhered to the die, forming itself in the shape of a die and striking blank planchets.

Bonded Coins

(Updated December 2016)

Bonded coins occur when the feeder system, which supplies blank planchets to the coin press, malfunctions and jams. When this occurs, a struck coin is not properly ejected and another planchet is fed into the collar and is struck. This struck coin will land on top of the previously unejected strike. These coins will then crush and bond together. This may occur many times as more coins bond.

Denomination	2 Planchets	3-4 Planchets	5-10 Planchets

Struck Fragments (Updated December 2016)

The blanking press takes the coils of metal strips and punches blanks out of it, ejecting the webbing at the other end. The webbing is cut into small scrap pieces to be melted and recycled. Occasionally a scrap piece will be mixed with the blank planchets and struck by the dies. Struck fragments are rare in the larger denominations. These can be uniface or die struck both sides and are very rare on type coins.

Denomination	Uniface	Die Struck Both Sides
Indian Cent	\$1,000	\$2,000
Lincoln Cent Wheat Ears	\$750	\$2,000

Mated Pairs (Updated December 2016)

Mated pairs involve two individual coins with different errors that were struck together at the same time. Mated pair error combinations can be found in most error types and come in many shapes and sizes. Mated pairs can be overlapped when one of the coins is struck off-center on top of another coin. Another type involves a brockage where a struck coin was perfectly centered on a blank and restruck. Some mated pairs involve a die cap where the cap and brockage coin are discovered together, but this is a scarce find.

The rarest mated pair type involves two die caps (obverse and reverse) where both dies were capped at the same time and both die caps are mated. This last type is extremely rare and there are only a few known examples of mated pairs involving an obverse die cap and reverse die cap. There are several of these mated pairs known on Kennedy Halves including two dated 1976, which is the Bicentennial year. One of the most spectacular mated pairs involve two Barber Dimes, an obverse die cap mated to a reverse die cap and are unique.

Mated pairs can also involve an off-metal where a smaller blank planchet or smaller struck coin was struck on top of a larger coin. This type is extremely rare. The most spectacular pair known is a double struck Franklin Half which was mated to a Lincoln Cent. The Lincoln Cent blank was on top of the obverse of the struck Franklin Half. This pair was then struck together. It is unique.

Denomination	Overlapping	Full Brockage	Die Cap	2 Die Caps
Lincoln Cent Wheat Ears	\$3,500	\$4,500	\$7,500	–

Transitional Errors (Updated December 2016)

A transitional error occurs when a coin is struck on a planchet from a previous year with different metal composition. The most famous transitional is a 1943 copper cent struck on a 1942 copper blank. 1943 cents were struck in steel because of the copper shortage during World War II. Other famous transitionals include 1965 coinage struck in silver instead of clad.

There are also transitionals struck on blanks for the next year. An example is 1964 coinage in clad instead of silver. Most recently, transitionals were discovered involving the SBA and Sacagawea Dollars of 1999 and 2000. There are eight known 1999 SBA Dollars struck on the brass planchet for the 2000 Sacagawea Dollar, and four known 2000 Sacagawea Dollars struck on a clad planchet for the 1999 SBA Dollar.

Denomination	Off-Metal Planchet	Circulated	AU	Unc	Choice Unc – Gem

U.S. Gold Errors (Updated December 2016)

Major mint errors on U.S. Gold coins are the most prized category of all mint errors. Gold errors are very rare and a few have traded in the \$75,000 to \$100,000 range. Even a broadstruck U.S. Gold coin can easily sell for \$15,000 to \$30,000 compared to a broadstruck Cent, Nickel, Dime or Quarter which all sell for well under \$10. Many serious collectors of Gold Errors have to wait patiently for months and sometimes even years to acquire that one special piece for their collection.

The prices listed here are for common dates in AU-Unc. Better dates and errors that are in gem condition are worth considerably more.

Denomination	Partial Collar	Broadstruck	Clipped Planchet	3% - 5% Off-Center	10% - 15% Off-Center
\$1 Gold Type 1	\$1,000	\$5,000	\$2,000	\$10,000	\$25,000

Indents (Updated December 2016)

An indent error occurs when two blanks are fed inadvertently into the same collar, with one blank partly overlaying on top of the other. When the hammer die strikes this combination, the upper blank will be forced into the lower blank, creating a depression which is shaped similar to the upper blank. A scarce type of indent occurs when a blank intended for one denomination lands on top of a blank from a different denomination.

Die Caps (Updated December 2016)

Die caps are caused when a struck coin sticks to the upper hammer die. Once the coin is struck to the die face, the reverse of the struck coin becomes the new die face. When the next blank is fed into the collar and the strike occurs, the reverse design of the adhered struck coin impresses itself into the new blank. This struck coin is a brockage strike. The coin that adhered to the upper die is known as a die cap. This process repeats itself as more coins are struck by the cap. The greater the number of strikes, the higher the cap metal will be pushed around the upper die shaft. Eventually, the cap brakes away from the die in the shape of a thimble.

Die Adjustment Strikes (Updated December 2016)

Die adjustment strikes are also known as die trials. This error occurs when a coin is struck from the press with very little pressure. When the press is being set up and adjusted, extremely weak strikes occur as the strike pressure reaches its optimum level. These die trials are destroyed after being struck and are rarely found in circulation.

Double Denominations (Updated December 2016)

One of the most expensive, popular, and desired types of errors are the double denominations. This error happens when a coin is struck on a previously struck coin of a smaller denomination. Examples are a cent on a struck dime, and a nickel on a struck cent. The most dramatic are those with considerable design visible from the original strike. There are a few known double denominations with different dates.

Brockages (Updated December 2016)

A brockage error can only occur when there are two coins involved. One of the coins involved will always be a struck coin which has not ejected properly. That struck coin will find its way back between the dies and will be struck next to a blank planchet which was fed into the collar. The image of that first struck coin will be impressed into that side of the blank planchet. The result will be a second coin which has images of the first coin impressed into it. Those images will be pressed into the coin and the image will be in reverse. This incuse sunken image is known as a brockage.

Double & Multiple Strikes (Updated December 2016)

When a blank planchet is struck by the dies, the normal procedure is for the feeders to eject the struck coin out of the collar and into a chute. If there is a malfunction and the struck coin isn't ejected, it may receive a second or third strike by the dies. A multiple struck coin can happen in many ways and have many combinations of errors.

(Since each double and multiple strike can vary from being 10% off-center to 90% off-center, the prices listed below can be substantially more based on the percent off-center and dramatic overall look.)

Off-Center Strikes (Updated December 2016)

Off-center coins are one of the most common and best known types of errors. This happens when a blank which is supposed to be fed into the press, lands in the collar improperly. When this occurs only part of the blank is between the upper and lower dies. When the dies strike the blank, only that part will be struck with a design.

Denomination	10% - 15% XF/AU	25% - 60% XF/AU	10% - 15% Unc	25% - 60% Unc

Off-Metals

(Updated December 2016)

Off-metal and wrong planchet errors occur when a correctly made blank from one denomination is accidentally fed into a press for another denomination. Examples are a nickel struck on a cent planchet and a cent struck on a dime planchet. The coin struck on an incorrect blank will weigh exactly what the denomination of that blank would have been. An even more dramatic wrong planchet error is a coin struck on a previously struck coin of a different metal.

Denomination	Off-Metal Planchet	Circulated	AU	Unc	Choice Unc – Gem

Mint Error News Price Guide

Counterbrockages (Updated December 2016)

A counterbrockage error involves a cap die and a previously struck coin. When a cap die strikes a previously struck coin, the obverse design from that struck coin will be impressed into the cap. The result will be a design where the cap face will be an incuse brockage. When a new blank is struck by this cap die with an incuse brockage image, the obverse will have a raised and spread image from that incuse design of the cap. This brockage impression is known as a counterbrockage.

Mint Error News Price Guide

Fold-Over Strikes (Updated December 2016)

A fold-over coin is one of the most dramatic types of errors. It occurs when the blank is standing vertically between the dies. During the strike, the force is so great that it bends and folds the blank. These fold-overs can be on-center or off-center, and come in many different shapes. There are a few fold-overs with multiple errors, either with an additional strike or fold-over. Denominations above quarters are very scarce.

Denomination	AU	AU Dated	Unc	Unc Dated
Indian Cent Memorial Copper	\$1,000	\$1,250	\$1,250	\$1,500
Lincoln Cent Memorial Zinc	\$750	\$1,000	\$1,000	\$1,250

Martha Washington Test Pieces (Updated December 2016)

There is one set of a Dime, Quarter and Half struck by Martha Washington dies that are permanently housed in the Smithsonian Institute, embedded in blocks of lucite. According to United States Pattern and Related Issues, by Andrew W. Pollock III, “the only trial pieces purported to have survived metallurgical testing in 1965 were the Dime, Quarter Dollar, and Half Dollar equivalent strikes in copper-nickel clad over copper.”

Mike Byers’ discovery of the Martha Washington Test Piece on a copper-zinc Cent planchet struck 10% off-center with a uniface reverse was a front page Coin World article on August 7th, 2000.

Denomination	Unc	Choice	Gem
Martha Cent	\$4,000	\$5,000	\$6,000
Martha Nickel	\$4,500	\$6,000	\$7,500
Martha Dime	\$7,500	\$10,000	\$12,500
Martha Quarter	\$5,000	\$7,500	\$10,000
Martha Half Dollar	\$5,000	\$7,500	\$10,000
Martha Dollar (SBA Planchet)	\$10,000	\$12,500	\$15,000
Martha Dollar (Sac Planchet)	\$6,000	\$7,500	\$10,000

MINT ERROR NEWS MAGAZINE

minterrornews.com

Mike Byers is the Publisher & Editor of Mint Error News Magazine

COINWeek

The CoinWeek Mission:

Our mission is a simple one, to inform, entertain and educate our readers about coins, paper money, and every other area of numismatic pursuit.

We accomplish that mission by having the best numismatic writers and contributors in the industry. In fact since 2011, CoinWeek writers and contributors have won over 40 Numismatic Literary Guild Awards and CoinWeek itself has been named the “Best Online News Site” for the last 4 years straight.

CoinWeek provides the facts that collectors can use. We tell the back stories about coins and the people that collect and sell them. We provide perspective commentary and analysis on the issues that effect the industry and the hobby we love.... **And we do it all for FREE.**

Why You Should Read CoinWeek:

- CoinWeek is independent and unafraid of tackling important issues that face the hobby.
- CoinWeek and its representatives attend almost all of the major Coin & Currency conventions in order to bring the most current print and video news from the numismatic marketplace to our readers.
- CoinWeek offers innovative coverage of modern coin issues, auction houses, and the world mints. We go beyond the surface information you usually find elsewhere.
- CoinWeek maintains the largest numismatic video library accessible on the web to offer our subscribers the most comprehensive educational video available with information about rare coin and currency news, seminars, interviews, collecting tips and more.

New Edition of Bart's United States Paper Money Errors Available Now

UNITED STATES PAPER MONEY ERRORS

A Comprehensive Catalog & Price Guide

DR. FREDERICK J. BART

FOURTH EDITION

Comprehensive Catalog and Price Guide makes first appearance since 2008

By Coin & Currency Institute....

After a lapse of seven years, a new edition of United States Paper Money Errors, Fred Bart's ground-breaking book is now available. The fourth edition is more than just an update to the third: Bureau of Engraving and Printing (BEP) errors have been added, nearly all the illustrations have been changed, there is a rarity guide for each note—which additionally are now priced in four grades (EF, AU, Choice CU and Gem CU)—and, for the first time, there is a section showing some notes in color.

This has always been an enormously popular book, not only among established collectors but also with newcomers seeking to learn more about their "find." There is no other book like it on the market. More than a price guide, its 296 pages contain a wealth of information on what to look for and what mistakes to avoid. It is a necessity for all dealers, collectors, and anyone who comes into regular contact with paper money.

- The new and improved must-have book for U.S. paper money errors
- Rarity guide for each note
- Prices in four conditions
- The universally-used Friedberg Numbering System™—The standard method for describing U.S. currency
- Invaluable appendices with data found nowhere else
- Hundreds of photos
- 296 pages, 20+ with new info
- Convenient & handy 5.75 x inch format

MINT *ERROR* NEWS GLOSSARY

What Are Experimental Blanks?

Recently PCGS and NGC have authenticated and certified experimental blanks and planchets struck at the U.S. Mint. These include Clad Ike dollar planchets with an experimental upset rim, a group of 1943 Lincoln cents including experimental blanks and planchets, unique experimental Ike dollar planchets with notations by the Mint on the planchets, a few Jefferson nickel planchets with an experimental finish and a unique Jefferson nickel planchet with an experimental rinse and a notation by the Mint on the planchet.

This is part of the U.S. Mint's history and production of experimental coinage. These experimental blanks and planchets were previously unknown to the numismatic community.
