# MINT **ERROR** NEWS<sup>TM</sup> MAGAZINE

Bringing the latest mint error news to the collector.

Mike Byers, Publisher & Editor, Welcomes You!

**W**elcome to Mint Error News Magazine, bringing the latest mint error news and information to the collector. This is our 15th year bringing you both an online PDF magazine and the Mint Error News website. There are over 1,200 articles, features, discoveries, news stories with mint error related info from the United States and around the World. Our website, [minterrornews.com](http://minterrornews.com), has become the most popular and informative Internet resource for mint errors and is read by thousands of dealers and collectors.

Over the last 20 years with the advent of the internet millions of collectors have flocked to online auctions and dealer websites. Many people connect to various online forums and clubs to share knowledge and learn about Mint Errors. Everyone, including dealers, collectors and even investors have instant access to information as never before. The Mint Error market has experienced an explosion in collector interest over the last 20 years.

Time and again, rare and unique Mint Errors in the numismatic market have made headline news. Authentication and certification of Mint Errors is now commonplace. In 1991, ANACS was the first to authenticate, grade and encapsulate major Mint Errors. In 1999, PCGS and NGC began certifying Mint Errors. Major Mint Errors are now pursued, collected and traded just like patterns, territorial Gold, colonials and other interesting segments of numismatics.

In 1975, I purchased a 1900 Indian Head Cent struck on a \$2 1/2 Indian Gold blank planchet for \$7,750 at a major coin auction. That price ranked among the top five ever realized for a Mint Error that few dealers or serious collectors would even consider. At that time price guides for Mint Errors were nonexistent and today that Indian Head Cent struck in Gold is certified MS65 by PCGS and is valued at six figures.

# MINT **ERROR** NEWS<sup>TM</sup> MAGAZINE

Bringing the latest mint error news to the collector.

Mike Byers (mikebyers.com) is president of Mike Byers Inc. He has been a professional numismatist for over thirty-five years. He is one of the largest dealers handling U.S. Gold Coins, Patterns and Rarities certified by PCGS and NGC. He has handled major coin collections and attends every major coin convention. Mike Byers carries an extensive inventory as well as solicits want lists and is always looking to purchase fresh inventory and collections. You can visit Mike Byers and view his rarities at the ANA, Central States, FUN show and the Long Beach Coin Expo.

Mike Byers was a consultant to ANACS for Mint Errors from 2000 to 2006. He is also the Owner, Publisher and Editor of Mint Error News Magazine and the Mint Error News Website that was founded in 2003. In 2009, Mike Byers published his first book, *World's Greatest Mint Errors*, which received the NLG Award for Best World Coin Book and is available on Amazon.

Jeff Ylitalo has collected Mint Error coins since 1993. He has avidly researched & written about this area of numismatics since 2006 contributing dozens of articles to CONECAs bi-monthly publication "ErrorScope" and Mike Byers "Mint Error News". Jeff is the former editor for the "ErrorScope" 2008-2017. Jeff's research and collecting focus is now primarily centered on World Error coins. Jeff can be reached via e-mail at: [jylitalo@yahoo.com](mailto:jylitalo@yahoo.com)

Fred Weinberg is a highly respected numismatist, with 40 years of full time experience in the rare coin marketplace. He deals in numismatic United States Gold & Silver coinage, as well as specializing in buying & selling Major Mint Error coinage of all types. He is one of the original 31 dealers selected as an authorized P.C.G.S. (Professional Coin Grading Service) dealer at it's inception in 1986.

Andy Lustig has been dealing in U.S. and World Coins since 1975 and has attended more than 2,000 coin shows and auctions. Andy is the co-founder of the Society of U.S. Pattern Collectors ([uspatterns.com](http://uspatterns.com)). He has been a member of the Professional Numismatists Guild (PNG #614) since 2005. He is a member of NGC and was also a former grader and authenticator for PCGS.

# PCGS Certifies Unique Proof Canadian \$100 Struck in Platinum & Rhodium

by Mike Byers (mikebyers.com)

This is the only known Canadian \$100 platinum striking of any design or series.

This is one of the most spectacular coins ever released by the Royal Canadian Mint. It is certified by PCGS as an “Unofficial Platinum Strike Uniface.” Lab analysis determined that the metal composition is 90% platinum and 10% rhodium and weighs 16.73 grams. In 1985, the Royal Canadian Mint experimented with platinum coins and began issuing them in 1988. This is the only known platinum mint error or pattern/die trial.

The Royal Canadian Mint issued the \$100 National Park Commemorative Coin in 1985. This coin was issued in gold for one year only in 1985.

The obverse depicts Queen Elizabeth II and the reverse has a Bighorn mountain sheep. Starting in 1988, the Royal Canadian Mint produced platinum coins that were made of .9995 pure platinum in four denominations of different sizes, consisting of 1 troy ounce (oz), 1/2 oz, 1/4 oz, and 1/10 oz. bearing the face values of \$50, \$20, \$10, and \$5, respectively. Since then they have also struck platinum coins with various designs in \$8 and \$300 denominations. The Royal Canadian Mint did not strike any \$100 denomination coins in platinum of any design or series.

## PCGS Certifies Unique Proof Canadian \$100 Struck in Platinum & Rhodium

It is incredible that this dramatic and unique platinum striking was discovered and subsequently sent to PCGS for authentication and grading. This proof Canadian \$100 Commemorative Coin struck in platinum combines several major mint errors. It is an off-metal (not struck in gold) and is also uniface. Whether it is a mint error or a pattern/die trial only adds mystique to this

world-class proof platinum uniface striking. It is in gem proof condition and is on a perfectly centered full size planchet with full reeding, specifically produced to strike this platinum proof uniface coin. This unique proof platinum striking rivals any U.S. Major Mint Error, Pattern or Die Trial in rarity, prestige and value.

Here is a comparison of this platinum proof striking (left) with the authorized issue in gold (right).

# PCGS Certifies 1875 20 Cent Die Trial

by Mike Byers

The only known U.S. coin, pattern or die trial that  
says *UNITED STATES OF NORTH AMERICA*.

# PCGS Certifies 1875 20 Cent Die Trial

This reverse uniface die trial shows UNITED STATES OF NORTH AMERICA on the obverse with the date below. It is the only known U.S. coin, pattern or die trial that says UNITED STATES OF NORTH AMERICA. It is struck in white metal with a plain edge. This very rare 20 Cent die trial has a famous pedigree since it is Ex Nagy, and Ex Kosoff. It is also the plate coin on page 305 in the 10th Edition of United States Pattern Coins.

There is one other 20 Cent reverse die trial known with the same design. It was struck on a larger planchet and was purchased by the Library Company of Philadelphia from Maxwell Whiteman.

Die Trials are usually uniface (struck on one side) impressions using either the obverse or reverse die. These Die Trials can be from finished or unfinished dies. These are deliberate strikes to test a certain design or example.

Metals other than the adopted composition are frequently used to strike hub trials and die trials. They are sometimes struck in copper and white metal. Other times they are struck in

softer metals like tin or lead. There are even some examples struck in wax and on cardboard.

These trial strikes are listed in the 10th Edition of Judd and also in Pollock. Technically hub trials and die trials are part of the pattern family. However, in the last 5 years the coin market has drastically changed directions.

Many pattern enthusiasts have always wanted a hub trial or a die trial piece to go along with the specific type or denomination of pattern(s) that they collect. A new demand has emerged for hub trials, die trials and splashers. Collectors of major mint errors are placing these in their collections because they are unusual, exotic and unique.

Even though they are not mint errors, they are aggressively sought after by people who collect off-metals, broadstrikes, uniface strikes and coins struck on larger planchets. In addition, since many of these hub trials, die trials and splashers are struck from incomplete hubs and dies, the design may be only a partial portrait or with parts of the legend and date missing.

## BUYING MAJOR ERROR COINS & CURRENCY

If you have a single major mint error coin, either a recent issue or an older type coin, or 1,000 Off-Center Cents, please contact us. We stock over 60,000 Major Mint Error Coins and constantly need to purchase Major Error Coins for our clientele (please note that we do not deal in or buy Die Varieties, Damaged Coins, Doubled Dies, Filled Dies, or Die Cracks).

We do buy Major Mint Errors - such as Off-Center, Off-Metals, Double Strikes, Clad Layers missing, Die Caps, Double Denomination, etc.

Because of the many differences in each Error Coin we request that you send scans of your coin(s) to us for our examination and firm offer.

# LONG BEACH EXPO

## JUNE 2018

by Jon Sullivan

We have not had any coin shows now for a few months, and are looking forward to setting up at the Long Beach Expo this week at our table, #633, "Sullivan Numismatics." The show is held in Long Beach, California June 14-16, 2018, and is one of the better shows of the year, held 3 times annually in the same location.

The nice thing about this show is that it attracts the West Coast coin collectors, which is a somewhat different crowd from the collectors attending the East Coast shows. There are collectors and dealers who attend both, but about half of the crowd are

different dealers and collectors, which is nice.

If you've not attended this show and live on the West Coast, consider taking the time to spend a day at the show. The chance to see coins in-hand, talk to dealers, see various exhibits, and look at the Heritage auction is something worthwhile. A lot of fun, and a good opportunity to find coins for your collection.

We hope to have some nice mint errors to offer in the coming weeks after we get back from the show, so keep your eyes peeled.

# NGC CERTIFIES 2016 SILVER EAGLE WITH VERY RARE MINT ERROR

BY NGC

*The severity of the die clash is among the most dramatic ever seen on a US Mint bullion coin.*

A collector recently submitted a very rare and dramatic Silver Eagle mint error to NGC.

The error, known as a die clash, occurs when the obverse and reverse dies come together without a planchet between them. This transfers design elements from one die to the other. These transferred designs are then visible on the coins struck by that die pair.

This 2016 Bullion Silver Eagle, graded NGC MS 69, shows extensive die clashes on the obverse and reverse.

As can be seen in the photos, the design transfer is much more noticeable on the obverse, where a great deal of detail from the eagle's feathers has been

transferred. Even the "LUR" and "BUS" in "E PLURIBUS UNUM" has been transferred from reverse to obverse.

According to NGC researchers, this is the most severe example of clashed dies they have found on a U.S. bullion coin of any metal. This particular coin was graded NGC MS 69 and its label recognizes the Clashed Dies Mint Error.

Interestingly, 20 examples of the 2017 bullion eagle with slightly less severe clashing were discovered by an NGC grader last year in a single roll. However, this newly discovered example shows more dramatic clashing than the 2017 pieces do and is currently unique.

# NGC EXPERTS IDENTIFY MINT ERROR ON 2014 5 OZ SILVER ATB COINS

BY NGC

*The Great Smoky Mountains coins are missing a “P” mintmark that ought to accompany their matte finish.*

**N**umismatic Guaranty Corporation® (NGC®) has identified five 2014 Great Smoky Mountains Five-Ounce Specimen coins with a significant mint error: they are missing the “P” mintmark.

Issued since 2000, the America the Beautiful Quarters series honors America’s national parks, forests and other federally recognized sites. Each US state and territory gets one site recognized, and five sites are honored on quarters each year.

Besides the quarters, the US Mint also issues five-ounce silver America the Beautiful Quarters, which feature the same designs and 25-cent

denomination. There are two versions of these five-ounce issues: a Mint State version, with a reflective finish and no mintmark, and a Specimen version with a “vapor-blasted” matte finish and a “P” mintmark. The Mint State versions are sold through US Mint Authorized Purchasers, while the Specimen versions are sold directly to consumers by the US Mint.

A sharp-eyed NGC grader was surprised to find four 2014 Great Smoky Mountains Five-Ounce Specimen coins that were missing the “P” mintmark; they were submitted by Modern Coin Mart, an NGC Authorized Dealer, as part of a larger group of Great Smoky Mountains Five-Ounce Specimen coins.

All of the coins had arrived at NGC in the standard US Mint packaging for the Specimen issues and the error was unnoticed until the first NGC grader examined the coins. A fifth example was discovered in a separate submission.

“It is exciting to find such a significant mint error several years after these coins were issued,” said David J. Camire, NGC Finalizer and mint error specialist. “This shows that you should always look closely at your coins, even special issues sold by the US Mint.”

Camire believes the error happened when coins intended to be sold as Mint State versions (and therefore without the “P”

mintmark) were accidentally mixed with coins designated to be vapor-blasted, which happens after the coins are struck. The vapor-blasted missing mintmark coins were then individually packaged along with the other Specimen issues and sold by the US Mint. It is not known how many of these errors were released, or if others await discovery.

The missing mintmark coins have been attributed as 2014 No “P” with the Mint Error designation on the NGC certification label.

NGC recognizes most major mint errors under its Mint Error service tier.

# WORLD PAPER MONEY ERRORS

## World Paper Money Errors Explored!

Odd shapes, upside down prints, intriguing cuts and folds, and missing design elements are only a few of the different printing errors examined in this expansive collection on foreign error notes. World Paper Money Errors is a visually compelling avenue into the fascinating and rarely explored area of numismatics that expands on the hobby of collecting paper currency.

Author Morland Fischer's comprehensive collection reflects the attraction and advantages of exploring foreign printing errors. An overview of collecting paper money errors in today's numismatic market offers insights on the great disparity between domestic and world notes. Market values are discussed, acknowledging what variables make an error note precious in the trade. Incorporating these concepts and more, Fischer expands the method of collecting currency errors by introducing a Foreign Error Note (FEN) scale to gauge price levels based on error type.

With over 200 examples of dramatic, colorful and intriguing foreign paper money errors, collectors and spectators alike are exposed to a new form of collecting currency. The numismatic community will benefit from this thorough guide that is unlike any other on the market.

U.S. & WORLD MAJOR MINT ERRORS

## Consign Your Coins to mikebyers.com

### Terms and Conditions

We are offering this service for error collectors and dealers alike. In order to post your item on our website you must agree to the following terms and conditions.

1. All coins must be from the United States, certified by PCGS or NGC, have a minimum value of \$25,000 each and should be either Gold Coins (Pre-World War 1), Patterns or Early Type Mint Errors (Pre-1950).
2. Each item must meet our inventory criteria in terms of desirability and market value.
3. Mike Byers Inc charges a 10% Commission on each sale.
4. The minimum time for any listing is thirty days.
5. Seller agrees to a seven day return privilege from date of receipt.
6. Seller agrees to use an escrow service if requested by the buyer.
7. We reserve the right to deny or cancel any listing at any time.
8. All listing are subject to prior sale.

### Scanning Specifications

1. Scan both the obverse and reverse of the entire holder.
2. Scan with a resolution of at least 300 dpi.
3. Save the picture in jpeg format (jpg).

### Information Requirements

In addition to e-mailing a photo of your item, please include the following information:

1. Name, Address & Phone Number
2. E-Mail Address
3. Asking Price

After your item is listed, we will contact you by e-mail with any offers and questions. Once a price is agreed upon we will handle the entire sale for a 10% transaction fee, which includes all costs (eBay fees, grading fees, webmaster charges, postage and registration fees, insurance, paperwork, etc.).

If you have a collection for sale or would like to sell your duplicates and do not want to consign your coin(s), we can purchase your entire collection outright. Please contact us at [mike@mikebyers.com](mailto:mike@mikebyers.com).

# PCGS CoinFacts

Your Online Reference for U.S. Coins

Welcome to PCGS CoinFacts. Our site includes comprehensive information on nearly 30,000 U.S. coins. It offers everything from basic, startup information for new collectors, to a wealth of detailed information the seasoned collector, buyer or seller can't afford to be without.

From the PCGS CoinFacts Home Page, you can access all denominations and major types of U.S. coins. The link will take you to a Series Page, which offers images of the finest PCGS-graded coin in the series, and a nice explanation including the history and why the coins in the series are important.

The real “business end” of PCGS CoinFacts begins with the individual coin pages, which are loaded with photos and information. To view the essential features of PCGS CoinFacts, you can click on them one at a time, or go straight to a particular feature of interest.

# STRIKE CLIPS

by Jeff Ylitalo

**A**mong the different kinds of clipped coins is a rare type called a Strike Clip. It occurs when a planchet is sheared into two pieces by a collar die that is stuck in the up position (frozen collar) and acts as a Guillotine. When struck,

one piece of the coin results in a *Curved Strike Clip* while the other becomes an *Elliptical Strike Clip*. These types of clipped coins are not conventional (where most clipped coins are a result of the blanking process which happens far earlier in the minting process).

# STRIKE CLIPS

Here is a fantastic specimen that illustrates both types of striking clips and how it happens. It is a 2007 Egyptian 50 Piastres that was nearly sheared in half.

2007 Egyptian 50 Piastres Strike Clip (Obverse)

# STRIKE CLIPS

2007 Egyptian 50 Piastres Strike Clip (Reverse)

# STRIKE CLIPS

In this case the 50 Piastres was positioned 30% off-center when struck. The imparted reeding from the frozen collar die after impact is impressive. Had the collar die cut completely through, that portion of the coin that is unstruck would be our *Curved Strike Clip* while the

other portion with the die-struck design of Cleopatra would be our *Elliptical Strike Clip*. If not for both the thickness and very hard composition, (a brass plated steel planchet), it most assuredly would have separated into two pieces.

# STRIKE CLIPS

It is important to understand differences between the many types of clips, and Strike Clips are the rarest of them all.

# **CONECA**

The Combined Organizations of Numismatic Error Collectors of America

**CONECA is a national numismatic organization devoted to the education of error and variety coin collectors. CONECA focuses on many error and variety specialties, including doubled dies, Repunched mintmarks, multiple errors, clips, double strikes, off-metals and off-centers -- just to name a few. It publishes an educational magazine, The Errorscope, which is printed and mailed to members bimonthly. CONECA offers a lending library, examination, listing and attribution services; it holds annual meetings at major conventions (referred to as Errorama) around the country, and offers auction services to its members. Please visit [conecaonline.org](http://conecaonline.org) and enjoy!**

#### **CONECA Variety Attribution Services**

CONECA offers two attribution services. One service enables members and non-members to send their coins directly to an authorized CONECA attributer. The other service is offered through the numismatic grading firm of ICG and enables CONECA members and non-members to have their coins attributed by a CONECA attributer and then graded and slabbed by ICG.

#### **CONECA Error Examination Services**

CONECA offers two examination services. One service enables members and non-members to send coins to an authorized CONECA examiner who will return an opinion of each coin's error classification. The other service is offered through the numismatic grading firm of ICG and enables CONECA members and non-members to have their coins examined by a CONECA examiner and then graded and slabbed by ICG.

New From Krause Publications:

# Strike It Rich With Pocket Change

## *Error Coins Bring Big Money*

by Brian Allen & Ken Potter  
NEW 4th Edition

It takes a keen eye to spot them - and a little know-how - but errors on coins produced by the U.S. Mint occur every year. And these errors can be worth a fortune to coin collectors. *Strike It Rich with Pocket Change* shows the reader how to detect errors, what to look for and how to cash in on them. This book has a strong appeal for someone with a mild to dedicated

interest in coins, while drawing upon the treasure hunter in all of us - anyone who is looking for a hobby that does not require a great up-front investment, yet offers the potential of discovering valuable rarities. Any collector who has completed the standard set of a type or series now has an opportunity to broaden the scope of that collection.

Visit [krausebooks.com](http://krausebooks.com) for more information.

# Mint Error News Price Guide

*- Updated May 2018 -*

This price guide is brought to you by Mint Error News. It has been compiled by many of the top major mint error dealers.

This price guide is a guide. Prices fluctuate due to the date, grade, eye appeal and how dramatic the striking error is. Rarity is also a factor. The price is sometimes based on the rarity and grade of the type of coin as well as how rare the error is. The price can also vary depending on whether two collectors are bidding for the same rare major mint error. When purchasing a mint error, it is important to use multiple resources to determine value, as there are many mint errors that do not fit into one category.

## Proof Errors (Updated May 2018)

**P**roof coins are struck by technicians who hand feed the blanks into special presses. They are produced, examined, and packaged using extreme quality control. It is very unusual to find major proof errors. A few broadstrikes, off-centers, double strikes in collars and off-metals have been known to be found in sealed proof sets. Proof errors are aggressively sought after by many error collectors.

A very small group of Proof errors recently came from a collection that was auctioned by the State of California. The U.S. Secret Service inspected and released this collection to the State of California determining that it was legal to own. The State of California then auctioned the collection and it has been dispersed since the sale.

Denomination	Broadstrikes	Die Trials	Double/Triple Strikes	Off-Center Strikes	Partial Collar Errors
Proof Lincoln Cent	\$1,000 - \$1,500	\$1,000	\$3,000	\$1,500 - \$3,000	\$500

## Broadstrikes (Updated May 2018)

A broadstruck error occurs when a coin is struck without the collar to form the rim and edge that is part of the shape of the coin. Coins can be broadstruck on either type one or type two planchets. When a coin is broadstruck the blank being fed into the collar will spread and distort outward as it is being struck because the collar isn't in the correct position to retain it.

# Mint Error News Price Guide

## Partial Collars (Updated May 2018)

**P**artial collar strikes occur when there is a malfunction of the striking press. This causes the collar to be in an incorrect position. The lower die (usually the reverse die) is recessed in the collar. This allows the coin which is going to be struck to have a formed rim. After a coin is struck the lower die raises upwards, pushing the struck coin out of the collar and ejecting it. If a blank entering the collar is not properly seated, it will only have partial reeding as it is struck. The edge of this coin will have a partial reeding and a partial blank surface area. Recently, the Mint has installed new machinery where either die can be installed in either position.

Denomination	XF/AU	Unc

## Uniface Strikes (Updated May 2018)

Uniface coins occur when there have been two blank planchets in the press at the same time. The other blank will obstruct the die on either the obverse or reverse side, which will prevent it from having that design on the coin. There are many different variations involving uniface errors. In addition to having a 100% blank obverse or reverse, a coin can be struck off-center, with a blank planchet in the collar which will obstruct one side of the off-center. There are also mated pairs which have a combination of multiple errors which can include a side which is uniface. Finally, there are uniface strikes due to a die cap which adhered to the die, forming itself in the shape of a die and striking blank planchets.

Denomination	Uniface Obverse XF	Uniface Obverse Unc	Uniface Reverse XF	Uniface Reverse Unc
Large Cent	\$1,500	\$4,000	\$1,250	\$2,000

## Bonded Coins

(Updated May 2018)

**B**onded coins occur when the feeder system, which supplies blank planchets to the coin press, malfunctions and jams. When this occurs, a struck coin is not properly ejected and another planchet is fed into the collar and is struck. This struck coin will land on top of the previously unejected strike. These coins will then crush and bond together. This may occur many times as more coins bond.

Denomination	2 Planchets	3-4 Planchets	5-10 Planchets
Lincoln Cent Wheat Ears	\$5,000	\$15,000	–
Lincoln Cent Memorial	\$600	\$2,000	\$5,000 - \$10,000

## Struck Fragments

(Updated May 2018)

The blanking press takes the coils of metal strips and punches blanks out of it, ejecting the webbing at the other end. The webbing is cut into small scrap pieces to be melted and recycled. Occasionally a scrap piece will be mixed with the blank planchets and struck by the dies. Struck fragments are rare in the larger denominations. These can be uniface or die struck both sides and are very rare on type coins.

Denomination	Uniface	Die Struck Both Sides
Indian Cent	\$1,000	\$2,000
Lincoln Cent Wheat Ears	\$750	\$2,000
Lincoln Cent Memorial	\$75	\$125
3 Cent Nickel	\$3,000	\$3,500
Jefferson Nickel	\$100	\$200

## Mated Pairs (Updated May 2018)

**M**ated pairs involve two individual coins with different errors that were struck together at the same time. Mated pair error combinations can be found in most error types and come in many shapes and sizes. Mated pairs can be overlapped when one of the coins is struck off-center on top of another coin. Another type involves a brockage where a struck coin was perfectly centered on a blank and restruck. Some mated pairs involve a die cap where the cap and brockage coin are discovered together, but this is a scarce find.

The rarest mated pair type involves two die caps (obverse and reverse) where both dies were capped at the same time and both die caps are mated. This last type is extremely rare and there are only a few known examples of mated pairs involving an obverse die cap and reverse die cap. There are several of these mated pairs known on Kennedy Halves including two dated 1976, which is the Bicentennial year. One of the most spectacular mated pairs involve two Barber Dimes, an obverse die cap mated to a reverse die cap and are unique.

Mated pairs can also involve an off-metal where a smaller blank planchet or smaller struck coin was struck on top of a larger coin. This type is extremely rare. The most spectacular pair known is a double struck Franklin Half which was mated to a Lincoln Cent. The Lincoln Cent blank was on top of the obverse of the struck Franklin Half. This pair was then struck together. It is unique.

Denomination	Overlapping	Full Brockage	Die Cap	2 Die Caps
Lincoln Cent Wheat Ears	\$3,500	\$4,500	\$7,500	–
Lincoln Cent Memorial	\$500	\$750	\$750	\$1,250

## Transitional Errors (Updated May 2018)

A transitional error occurs when a coin is struck on a planchet from a previous year with different metal composition. The most famous transitional is a 1943 copper cent struck on a 1942 copper blank. 1943 cents were struck in steel because of the copper shortage during World War II. Other famous transitionals include 1965 coinage struck in silver instead of clad.

There are also transitionals struck on blanks for the next year. An example is 1964 coinage in clad instead of silver. Most recently, transitionals were discovered involving the SBA and Sacagawea Dollars of 1999 and 2000. There are eight known 1999 SBA Dollars struck on the brass planchet for the 2000 Sacagawea Dollar, and four known 2000 Sacagawea Dollars struck on a clad planchet for the 1999 SBA Dollar.

## U.S. Gold Errors (Updated May 2018)

Major mint errors on U.S. Gold coins are the most prized category of all mint errors. Gold errors are very rare and a few have traded in the \$75,000 to \$100,000 range. Even a broadstruck U.S. Gold coin can easily sell for \$15,000 to \$30,000 compared to a broadstruck Cent, Nickel, Dime or Quarter which all sell for well under \$10. Many serious collectors of Gold Errors have to wait patiently for months and sometimes even years to acquire that one special piece for their collection.

The prices listed here are for common dates in AU-Unc. Better dates and errors that are in gem condition are worth considerably more.

Denomination	Partial Collar	Broadstruck	Clipped Planchet	3% - 5% Off-Center	10% - 15% Off-Center
\$1 Gold Type 1	\$1,000	\$5,000	\$2,000	\$10,000	\$25,000
\$1 Gold Type 2	\$5,000	\$10,000	\$10,000	\$20,000	\$35,000

## Indents (Updated May 2018)

An indent error occurs when two blanks are fed inadvertently into the same collar, with one blank partly overlaying on top of the other. When the hammer die strikes this combination, the upper blank will be forced into the lower blank, creating a depression which is shaped similar to the upper blank. A scarce type of indent occurs when a blank intended for one denomination lands on top of a blank from a different denomination.

## Die Caps (Updated May 2018)

**D**ie caps are caused when a struck coin sticks to the upper hammer die. Once the coin is struck to the die face, the reverse of the struck coin becomes the new die face. When the next blank is fed into the collar and the strike occurs, the reverse design of the adhered struck coin impresses itself into the new blank. This struck coin is a brockage strike. The coin that adhered to the upper die is known as a die cap. This process repeats itself as more coins are struck by the cap. The greater the number of strikes, the higher the cap metal will be pushed around the upper die shaft. Eventually, the cap brakes away from the die in the shape of a thimble.

## Die Adjustment Strikes (Updated May 2018)

Die adjustment strikes are also known as die trials. This error occurs when a coin is struck from the press with very little pressure. When the press is being set up and adjusted, extremely weak strikes occur as the strike pressure reaches its optimum level. These die trials are destroyed after being struck and are rarely found in circulation.

## Double Denominations (Updated May 2018)

One of the most expensive, popular, and desired types of errors are the double denominations. This error happens when a coin is struck on a previously struck coin of a smaller denomination. Examples are a cent on a struck dime, and a nickel on a struck cent. The most dramatic are those with considerable design visible from the original strike. There are a few known double denominations with different dates.

Denomination	Struck On	Circulated	AU	Unc
Lincoln Cent Wheat Ears	Mercury Dime	\$6,000	\$12,500	\$20,000

## Brockages (Updated May 2018)

A brockage error can only occur when there are two coins involved. One of the coins involved will always be a struck coin which has not ejected properly. That struck coin will find its way back between the dies and will be struck next to a blank planchet which was fed into the collar. The image of that first struck coin will be impressed into that side of the blank planchet. The result will be a second coin which has images of the first coin impressed into it. Those images will be pressed into the coin and the image will be in reverse. This incuse sunken image is known as a brockage.

## Double & Multiple Strikes (Updated May 2018)

When a blank planchet is struck by the dies, the normal procedure is for the feeders to eject the struck coin out of the collar and into a chute. If there is a malfunction and the struck coin isn't ejected, it may receive a second or third strike by the dies. A multiple struck coin can happen in many ways and have many combinations of errors.

(Since each double and multiple strike can vary from being 10% off-center to 90% off-center, the prices listed below can be substantially more based on the percent off-center and dramatic overall look.)

## Off-Center Strikes (Updated May 2018)

Off-center coins are one of the most common and best known types of errors. This happens when a blank which is supposed to be fed into the press, lands in the collar improperly. When this occurs only part of the blank is between the upper and lower dies. When the dies strike the blank, only that part will be struck with a design.

Denomination	10% - 15% XF/AU	25% - 60% XF/AU	10% - 15% Unc	25% - 60% Unc

## Off-Metals (Updated May 2018)

Off-metal and wrong planchet errors occur when a correctly made blank from one denomination is accidentally fed into a press for another denomination. Examples are a nickel struck on a cent planchet and a cent struck on a dime planchet. The coin struck on an incorrect blank will weigh exactly what the denomination of that blank would have been. An even more dramatic wrong planchet error is a coin struck on a previously struck coin of a different metal.

Denomination	Off-Metal Planchet	Circulated	AU	Unc	Choice Unc – Gem
Indian Cent	Foreign Planchet	\$1,000	\$1,500	\$5,000	\$7,500

## Counterbrockages

(Updated May 2018)

A counterbrockage error involves a cap die and a previously struck coin. When a cap die strikes a previously struck coin, the obverse design from that struck coin will be impressed into the cap. The result will be a design where the cap face will be an incuse brockage. When a new blank is struck by this cap die with an incuse brockage image, the obverse will have a raised and spread image from that incuse design of the cap. This brockage impression is known as a counterbrockage.

Denomination	Circulated	AU	Unc	Choice Unc - Gem

## Fold-Over Strikes (Updated May 2018)

A fold-over coin is one of the most dramatic types of errors. It occurs when the blank is standing vertically between the dies. During the strike, the force is so great that it bends and folds the blank. These fold-overs can be on-center or off-center, and come in many different shapes. There are a few fold-overs with multiple errors, either with an additional strike or fold-over. Denominations above quarters are very scarce.

Denomination	AU	AU Dated	Unc	Unc Dated
Indian Cent Memorial Copper	\$1,000	\$1,250	\$1,250	\$1,500
Lincoln Cent Memorial Zinc	\$750	\$1,000	\$1,000	\$1,250
Jefferson Nickel	\$2,500	\$3,000	\$3,000	\$4,000

## Martha Washington Test Pieces (Updated May 2018)

There is one set of a Dime, Quarter and Half struck by Martha Washington dies that are permanently housed in the Smithsonian Institute, embedded in blocks of lucite. According to United States Pattern and Related Issues, by Andrew W. Pollock III, “the only trial pieces purported to have survived metallurgical testing in 1965 were the Dime, Quarter Dollar, and Half Dollar equivalent strikes in copper-nickel clad over copper.”

Mike Byers’ discovery of the Martha Washington Test Piece on a copper-zinc Cent planchet struck 10% off-center with a uniface reverse was a front page Coin World article on August 7th, 2000.

Denomination	Unc	Choice	Gem
Martha Cent	\$4,000	\$5,000	\$6,000
Martha Nickel	\$4,500	\$6,000	\$7,500
Martha Dime	\$7,500	\$10,000	\$12,500
Martha Quarter	\$5,000	\$7,500	\$10,000
Martha Half Dollar	\$5,000	\$7,500	\$10,000
Martha Dollar (SBA Planchet)	\$10,000	\$12,500	\$15,000
Martha Dollar (Sac Planchet)	\$6,000	\$7,500	\$10,000

# COINWeek

## **The CoinWeek Mission:**

Our mission is a simple one, to inform, entertain and educate our readers about coins, paper money, and every other area of numismatic pursuit.

We accomplish that mission by having the best numismatic writers and contributors in the industry. In fact since 2011, CoinWeek writers and contributors have won over 40 Numismatic Literary Guild Awards and CoinWeek itself has been named the “Best Online News Site” for the last 4 years straight.

CoinWeek provides the facts that collectors can use. We tell the back stories about coins and the people that collect and sell them. We provide perspective commentary and analysis on the issues that effect the industry and the hobby we love.... **And we do it all for FREE.**

## **Why You Should Read CoinWeek:**

- CoinWeek is independent and unafraid of tackling important issues that face the hobby.
- CoinWeek and its representatives attend almost all of the major Coin & Currency conventions in order to bring the most current print and video news from the numismatic marketplace to our readers.
- CoinWeek offers innovative coverage of modern coin issues, auction houses, and the world mints. We go beyond the surface information you usually find elsewhere.
- CoinWeek maintains the largest numismatic video library accessible on the web to offer our subscribers the most comprehensive educational video available with information about rare coin and currency news, seminars, interviews, collecting tips and more.

*New Edition of Bart's United States Paper Money Errors Available Now*

# UNITED STATES PAPER MONEY ERRORS

A Comprehensive Catalog & Price Guide

**DR. FREDERICK J. BART**

FOURTH EDITION

Comprehensive Catalog and Price Guide makes first appearance since 2008

By Coin & Currency Institute....

After a lapse of seven years, a new edition of United States Paper Money Errors, Fred Bart's ground-breaking book is now available. The fourth edition is more than just an update to the third: Bureau of Engraving and Printing (BEP) errors have been added, nearly all the illustrations have been changed, there is a rarity guide for each note—which additionally are now priced in four grades (EF, AU, Choice CU and Gem CU)—and, for the first time, there is a section showing some notes in color.

This has always been an enormously popular book, not only among established collectors but also with newcomers seeking to learn more about their "find." There is no other book like it on the market. More than a price guide, its 296 pages contain a wealth of information on what to look for and what mistakes to avoid. It is a necessity for all dealers, collectors, and anyone who comes into regular contact with paper money.

- The new and improved must-have book for U.S. paper money errors
- Rarity guide for each note
- Prices in four conditions
- The universally-used Friedberg Numbering System™—The standard method for describing U.S. currency
- Invaluable appendices with data found nowhere else
- Hundreds of photos
- 296 pages, 20+ with new info
- Convenient & handy 5.75 x inch format

1857 Paquet Half Dollar Uniface Die Trial

## What are Uniface Die Trials?

Uniface Die Trials are deliberate, one sided impressions using either the obverse or reverse die. These Die Trials can be from finished or unfinished dies. Sometimes hubs are used, rather than the actual finished die. Metals other than the adopted composition are frequently used to strike Uniface Die Trials.

Above is a unique 1857 U.S. Half Dollar Uniface Die Trial in white metal. It is designed by Paquet, who created many of the patterns during that time period for the U.S. Mint. This design shows an eagle with a ribbon in its mouth with 13 stars above, and the denomination "Half Dollar" below. This is a fascinating piece of Numismatic History because it is an unfinished die trial. It is uniface (being struck by only one die on one side) on white metal which was not adopted as an official composition by the U.S. Mint.
