# MINT **ERROR** NEWS<sup>TM</sup> MAGAZINE

Bringing the latest mint error news to the collector.

Mike Byers, Publisher & Editor, Welcomes You!

**W**elcome to Mint Error News Magazine, bringing the latest mint error news and information to the collector. This is our 15th year bringing you both an online PDF magazine and the Mint Error News website. There are over 1,200 articles, features, discoveries, news stories with mint error related info from the United States and around the World. Our website, [minterrornews.com](http://minterrornews.com), has become the most popular and informative Internet resource for mint errors and is read by thousands of dealers and collectors.

Over the last 20 years with the advent of the internet millions of collectors have flocked to online auctions and dealer websites. Many people connect to various online forums and clubs to share knowledge and learn about Mint Errors. Everyone, including dealers, collectors and even investors have instant access to information as never before. The Mint Error market has experienced an explosion in collector interest over the last 20 years.

Time and again, rare and unique Mint Errors in the numismatic market have made headline news. Authentication and certification of Mint Errors is now commonplace. In 1991, ANACS was the first to authenticate, grade and encapsulate major Mint Errors. In 1999, PCGS and NGC began certifying Mint Errors. Major Mint Errors are now pursued, collected and traded just like patterns, territorial Gold, colonials and other interesting segments of numismatics.

In 1975, I purchased a 1900 Indian Head Cent struck on a \$2 1/2 Indian Gold blank planchet for \$7,750 at a major coin auction. That price ranked among the top five ever realized for a Mint Error that few dealers or serious collectors would even consider. At that time price guides for Mint Errors were nonexistent and today that Indian Head Cent struck in Gold is certified MS65 by PCGS and is valued at six figures.

# NGC Certifies Unique Gold \$1 1852 Judd #138 On A Cut-Down Gold Plated Seated 10c

by Mike Byers

This recent discovery was previously  
unknown to the numismatic community.

## **NGC Certifies Unique Gold \$1 1852 Judd #138 On A Cut-Down Gold Plated Seated 10c**

**N**GC authenticated and certified this unique pattern and CAC approved it. It is the only known U.S. pattern or coin that was gold plated (gilt) at the Mint and then overstruck. It was originally a silver Seated Dime that was cut down (trimmed to size), perforated creating a hole in the center, gold plated (gilt) at the Mint, and then struck by the 1852 gold \$1 pattern dies.

This unique pattern should not be confused with U.S. patterns that were struck first, then gilded either inside the Mint or by collectors after they were released. This discovery pattern was manufactured in a completely different way inside the U.S. Mint. It was gold plated (gilt) on a cut-down Seated Dime prior to being struck by pattern dies. To date, this is the only known authenticated and certified by NGC or PCGS, pattern struck on

a coin that was gold plated (gilt) first!

It was determined that the gold plating (gilt) was applied at the U.S. Mint prior to striking this pattern. Careful examination of the cut-down edge, the striations around the center hole that was perforated and the overall surfaces confirm that it was gold plated (gilt) first, then struck as a pattern.

Gold plating is the process of applying a thin layer of gold to the surface of the coin through a process called electroplating. Gilt is a process of applying a fine gold powder or gold leaf to the surface of the struck coin, without the use of electric current.

The 1852 Gold Dollars were struck in various metals: Gold, Silver, Copper, Copper-Nickel, Nickel and Brass. There are also (2) known Judd #147 Gold Dollar

## **NGC Certifies Unique Gold \$1 1852 Judd #138 On A Cut-Down Gold Plated Seated 10c**

patterns that were gilt after they were struck, a MS-62 PCGS and a PR-65 PCGS.

This unique pattern, Judd #138, struck on a gold plated (gilt) cut-down silver Seated Dime, clearly demonstrates that the U.S. Mint was experimenting with the manufacturing methods and production to strike these Gold Dollar patterns. Different metals were used as blank planchets, they were perforated, and a few were struck on silver dimes instead of blank planchets.

This new unique discovery is an important part of numismatic history because it proves that the U.S. Mint gold plated (gilt) a struck coin first, prior to using it to strike a pattern and gives insight into the experiments used at the time.

Fred Weinberg is the PCGS authenticator for mint errors and has handled as many patterns,

experimental strikes, overstrikes and unique pieces as anyone, making him a world renowned expert. Fred was one of a handful of experts that authenticated all (5) known 1913 Liberty Head Nickels at the 2003 ANA. In 1974, while at Numismatics Ltd., he purchased most of the Kosoff Judd Pattern Collection from Abe Kosoff. Fred said that there were a few mint errors and experimental strikes, but nothing that compared to this pattern. He stated that:

“It’s the first U.S. Mint gold plated (gilt) pattern that has been certified and authenticated by either PCGS or NGC, that was struck over another U.S. coin.”

This unique pattern would be the highlight and centerpiece of a collection of U.S. patterns, experimental coins or cherished as a unique rarity and discovery coin.

# EXTREMELY RARE BUFFALO NICKEL ON AN ELLIPTICAL PLANCHET

by Fred Weinberg

This is an extremely rare Buffalo Nickel struck on an elliptical planchet. There are only 2 known for the entire series from 1916 to 1938. Both were in my Mint Error Collection for 40 years. I sold the other one in a MS 63 holder for \$11,500 a decade ago.

This mint error was authenticated and certified by PCGS as Mint State 62. U.S. type coins struck on elliptical planchets are extremely rare.

# MARTHA WASHINGTON

## 5¢ DISCOVERY

by Jon Sullivan

**We recently acquired a remarkable Martha Washington test coin, which although it was known to exist, none were privately owned until now. The example we purchased has been waffle cancelled at the Mint.**

# NGC CERTIFIES THE KING OF MINT ERRORS

BY NGC

*The first 1943 bronze cent to be discovered is now graded by NGC and was on display at the NGC booth at the ANA World's Fair of Money.*

# NGC CERTIFIES THE KING OF MINT ERRORS

**N**umismatic Guaranty Corporation® (NGC®) has certified the most famous of all mint errors: the Don Lutes, Jr. Philadelphia 1943 Bronze Cent. This legendary coin was the first discovery of a 1943 bronze cent, which is considered by many to be the King of Mint Errors.

The Lutes specimen is now graded NGC AU 53 BN and will be on display at the ANA World's Fair of Money in Philadelphia, August 14-17, 2018.

All 1943 cents were supposed to have been struck on zinc-coated steel planchets to save precious copper for more

critical wartime production needs. In prior years, cents were struck on planchets made of bronze (95% copper and 5% zinc).

Before long, rumors circulated that Ford Motor Company would offer a new car in exchange for a copper penny dated 1943. This bit of whimsy had an unanticipated effect: in 1947, a newspaper reported that someone had indeed found a 1943 cent coined in bronze: 16-year-old Donald Lutes, Jr. of Pittsfield, Massachusetts. Lutes, a coin collector himself, had found his example in change from the school cafeteria.

# NGC CERTIFIES THE KING OF MINT ERRORS

While the numismatic community debated the merits of the Lutes report, the placement of another 1943 bronze cent at the 1958 ANA convention auction (this one discovered by Marvin Beyer sometime after the Lutes discovery) received nationwide attention. The interest only increased after Beyer pulled his coin from the sale at the last minute, which resulted in a lawsuit.

This media attention prompted Lutes to seek confirmation of his coin's genuineness. He loaned it to prominent numismatic researcher and authenticator Walter Breen

in 1959, and Breen declared unhesitatingly that the cent was real.

Over the years since 1947 the legend of Lutes' 1943 bronze cent has only grown. It was never offered for sale, and the numismatic community was not able to see this amazing specimen until recently. Now elderly and living in a nursing home, Lutes has finally decided to pass on his prized discovery coin to a new owner: the coin, now certified by NGC, will be sold by Heritage Auctions.

A lustrous and glossy brown, the Lutes Discovery Specimen is just faintly

# NGC CERTIFIES THE KING OF MINT ERRORS

worn and is among the more attractive of the 17 Philadelphia 1943 bronze cents that have since been confirmed. The NGC certification label features the pedigree “Don Lutes, Jr. Discovery Specimen,” preserving this coin’s important place in numismatic history.

“Like so many other young coin collectors growing up in the 1970s, there was always the dream of finding a 1943 copper cent,” said David J. Camire, NGC Grading Finalizer and a mint error expert. “This coin, for me,

is certainly the ‘Holy Grail’ of mint errors. Rarely today does a discovery piece come to market, after all these years, still in the possession of the original owner. A ‘dream coin’ to many, soon someone will become only the second owner of this legendary rarity.”

Heritage Auctions President Greg Rohan added: “NGC’s expertise in error coins is well-known in the numismatic community. After conferring with the consignor, the decision was clear to submit the coin to NGC.”

# NGC CERTIFIES UNIQUE ARGENTINA 8 ESCUDOS SILVER DIE TRIAL

by Mike Byers

This is an incredible and unique 1842  
Argentina 8 Escudos struck in silver.

## NGC CERTIFIES UNIQUE ARGENTINA 8 ESCUDOS SILVER DIE TRIAL

**T**his is an obverse die trial with a uniface reverse. NGC authenticated and certified it AU-58. It is unlisted in Krause and is referenced to CJ-10.2. It is the obverse design for Krause KM 14 (the 8 Escudos struck in gold).

It is fascinating that this unique obverse silver die trial exists for the already excessively rare gold 8 Escudos. It features the portrait of Juan Manuel de Rosas. There are only 5 known gold 8 Escudos on this 1 year type, in private

hands. In 2012, Heritage Auctions sold a NGC XF 40 for \$51,750.

The gold 8 Escudos is not priced in Krause and this silver 8 Escudos is not listed. This silver 8 Escudos is literally *as struck* with no adverse marks or handling wear. It is fully struck with grey and blue hues and original luster.

This unique silver 8 Escudos obverse die trial struck in 1842 at the La Rioja Mint is one of the most spectacular coins from Latin America.

U.S. & WORLD MAJOR MINT ERRORS

## Consign Your Coins to mikebyers.com

### Terms and Conditions

We are offering this service for error collectors and dealers alike. In order to post your item on our website you must agree to the following terms and conditions.

1. All coins must be from the United States, certified by PCGS or NGC, have a minimum value of \$25,000 each and should be either Gold Coins (Pre-World War 1), Patterns or Early Type Mint Errors (Pre-1950).
2. Each item must meet our inventory criteria in terms of desirability and market value.
3. Mike Byers Inc charges a 10% Commission on each sale.
4. The minimum time for any listing is thirty days.
5. Seller agrees to a seven day return privilege from date of receipt.
6. Seller agrees to use an escrow service if requested by the buyer.
7. We reserve the right to deny or cancel any listing at any time.
8. All listing are subject to prior sale.

### Scanning Specifications

1. Scan both the obverse and reverse of the entire holder.
2. Scan with a resolution of at least 300 dpi.
3. Save the picture in jpeg format (jpg).

### Information Requirements

In addition to e-mailing a photo of your item, please include the following information:

1. Name, Address & Phone Number
2. E-Mail Address
3. Asking Price

After your item is listed, we will contact you by e-mail with any offers and questions. Once a price is agreed upon we will handle the entire sale for a 10% transaction fee, which includes all costs (eBay fees, grading fees, webmaster charges, postage and registration fees, insurance, paperwork, etc.).

If you have a collection for sale or would like to sell your duplicates and do not want to consign your coin(s), we can purchase your entire collection outright. Please contact us at [mike@mikebyers.com](mailto:mike@mikebyers.com).

# NGC CERTIFIES UNIQUE “MINT CANCELLED” ERROR COIN

BY NGC

*This 2007-D Washington quarter was originally struck on a Sacagawea \$1 planchet before being cancelled by the US Mint.*

## NGC CERTIFIES UNIQUE “MINT CANCELLED” ERROR COIN

The mint has been “cancelling” coins since 2004, resulting in a big cost savings, considering the complications and costs associated with transporting rejected blanks and coins to recycling facilities. The mint uses a machine that flattens and distorts the blanks and coins. The resulting pieces have a distinct shape that has been likened to that of a “waffle.”

Example of Mint Cancelling (“waffle”)

## NGC CERTIFIES UNIQUE “MINT CANCELLED” ERROR COIN

NGC has been certifying these “mint cancelled” items since the program’s inception. To date, it has seen all types of cancelled blanks and coins including uncirculated and proof coins. Major mint errors are usually severely cancelled to reduce the possibility of retaining any numismatic value. Thus, it was a shock to come across this mint cancelled error recently. The unique error “was” a 2007-D Washington quarter originally

struck on a Sacagawea \$1 planchet!

“A lot of the detail is still visible, allowing for identification of the coin. It is remarkable to see such an error, even under the cancelling. It would be interesting to know if this was a single occurrence or part of a larger batch,” said David J. Camire, NGC Finalizer and Mint error specialist.

2007-D Washington Quarter Struck on a Sacagawea \$1 planchet, Mint cancelled.

# WORLD PAPER MONEY ERRORS

## World Paper Money Errors Explored!

Odd shapes, upside down prints, intriguing cuts and folds, and missing design elements are only a few of the different printing errors examined in this expansive collection on foreign error notes. World Paper Money Errors is a visually compelling avenue into the fascinating and rarely explored area of numismatics that expands on the hobby of collecting paper currency.

Author Morland Fischer's comprehensive collection reflects the attraction and advantages of exploring foreign printing errors. An overview of collecting paper money errors in today's numismatic market offers insights on the great disparity between domestic and world notes. Market values are discussed, acknowledging what variables make an error note precious in the trade. Incorporating these concepts and more, Fischer expands the method of collecting currency errors by introducing a Foreign Error Note (FEN) scale to gauge price levels based on error type.

With over 200 examples of dramatic, colorful and intriguing foreign paper money errors, collectors and spectators alike are exposed to a new form of collecting currency. The numismatic community will benefit from this thorough guide that is unlike any other on the market.

# NGC GRADERS DISCOVER “LIGHT FINISH” 2018-S SILVER REVERSE PROOF SET HALF DOLLARS

BY NGC

*NGC will attribute this new variety by request through its VarietyPlus service.*

**N**umismatic Guaranty Corporation graders have discovered a “light finish” variety of 2018-S Silver Reverse Proof Set Half Dollars. This variety results from an obverse die that was not properly prepared, imparting a significantly lower-contrast finish on the coin’s fields as compared to the white fields typically seen on Reverse Proof coins.

## NGC GRADERS DISCOVER “LIGHT FINISH” 2018-S SILVER REVERSE PROOF SET HALF DOLLARS

To create the Reverse Proof finish, the US Mint polishes the die’s design elements and vapor blasts the fields. This imparts a highly reflective finish on the coin’s design elements and a matte finish on the fields, which is the opposite of the Ultra Cameo contrast typically seen on Proof coins. This variety appears to have been caused when the US Mint did not vapor blast one or more of the obverse dies.

The 2018-S Silver Reverse Proof Sets were released by the US Mint on July 23, 2018, to celebrate the 50th anniversary of the production of Proof coins at the San Francisco Mint. Only 200,000 sets were made and they are now sold out at the US Mint.

NGC has graded more than 9,000 Silver Reverse Proof Set Half Dollars as of August 31, 2018. Fewer than 10% of these have been attributed “light finish.”

“The US Mint is a highly sophisticated operation, so it is always fascinating when varieties such as these occur,” said NGC President and Finalizer Rick Montgomery. “This is just another example of how dynamic the world of modern coins is.”

The variety is reminiscent of the light finish seen on some America the Beautiful Silver 5 Ounce Specimen coins. On those varieties, however, it is the coin that is not vapor blasted, rather than the dies.

# NGC GRADERS DISCOVER "LIGHT FINISH" 2018-S SILVER REVERSE PROOF SET HALF DOLLARS

**LEFT:** A normal 2018-S Silver Reverse Proof Set Half Dollar. **RIGHT:** A "light finish" variety of the 2018-S Silver Reverse Proof Set Half Dollar, which has a lower-contrast finish on the obverse, likely due to its die not being properly prepared.

# NGC GRADERS DISCOVER “LIGHT FINISH” 2018-S SILVER REVERSE PROOF SET HALF DOLLARS

**LEFT:** A normal 2018-S Silver Reverse Proof Set Half Dollar. **RIGHT:** A “Light Finish” variety of the 2018-S Silver Reverse Proof Set Half Dollar, with the variety noted on the NGC certification label.

# PCGS CoinFacts

Your Online Reference for U.S. Coins

Welcome to PCGS CoinFacts. Our site includes comprehensive information on nearly 30,000 U.S. coins. It offers everything from basic, startup information for new collectors, to a wealth of detailed information the seasoned collector, buyer or seller can't afford to be without.

From the PCGS CoinFacts Home Page, you can access all denominations and major types of U.S. coins. The link will take you to a Series Page, which offers images of the finest PCGS-graded coin in the series, and a nice explanation including the history and why the coins in the series are important.

The real “business end” of PCGS CoinFacts begins with the individual coin pages, which are loaded with photos and information. To view the essential features of PCGS CoinFacts, you can click on them one at a time, or go straight to a particular feature of interest.

# “TWO TAILED” DUAL DATE DOUBLE DENOMINATION MULE

by Jeff Ylitalo

This unique error is a two tailed, dual date, double denomination Mule from Chile.

In this case a 2006 Chilean 5 Pesos reverse die was mismatched with a 2006 Chilean

1 Peso reverse die. A normal 5 Pesos coin is comprised of brass while a normal 1 Peso coin is struck on an aluminum planchet. Both dies were paired and then struck an octagonal (8 sided) 5 Pesos brass planchet.

# “TWO TAILED” DUAL DATE, DOUBLE DENOMINATION MULE

This side was struck with a 2006 Chilean 1 Peso reverse die.

# **CONECA**

The Combined Organizations of Numismatic Error Collectors of America

**CONECA is a national numismatic organization devoted to the education of error and variety coin collectors. CONECA focuses on many error and variety specialties, including doubled dies, Repunched mintmarks, multiple errors, clips, double strikes, off-metals and off-centers -- just to name a few. It publishes an educational magazine, The Errorscope, which is printed and mailed to members bimonthly. CONECA offers a lending library, examination, listing and attribution services; it holds annual meetings at major conventions (referred to as Errorama) around the country, and offers auction services to its members. Please visit [conecaonline.org](http://conecaonline.org) and enjoy!**

#### **CONECA Variety Attribution Services**

CONECA offers two attribution services. One service enables members and non-members to send their coins directly to an authorized CONECA attributer. The other service is offered through the numismatic grading firm of ICG and enables CONECA members and non-members to have their coins attributed by a CONECA attributer and then graded and slabbed by ICG.

#### **CONECA Error Examination Services**

CONECA offers two examination services. One service enables members and non-members to send coins to an authorized CONECA examiner who will return an opinion of each coin's error classification. The other service is offered through the numismatic grading firm of ICG and enables CONECA members and non-members to have their coins examined by a CONECA examiner and then graded and slabbed by ICG.

New From Krause Publications:

# Strike It Rich With Pocket Change

## *Error Coins Bring Big Money*

by Brian Allen & Ken Potter  
NEW 4th Edition

It takes a keen eye to spot them - and a little know-how - but errors on coins produced by the U.S. Mint occur every year. And these errors can be worth a fortune to coin collectors. *Strike It Rich with Pocket Change* shows the reader how to detect errors, what to look for and how to cash in on them. This book has a strong appeal for someone with a mild to dedicated

interest in coins, while drawing upon the treasure hunter in all of us - anyone who is looking for a hobby that does not require a great up-front investment, yet offers the potential of discovering valuable rarities. Any collector who has completed the standard set of a type or series now has an opportunity to broaden the scope of that collection.

Visit [krausebooks.com](http://krausebooks.com) for more information.

# Mint Error News Price Guide

*- Updated September 2018 -*

This price guide is brought to you by Mint Error News. It has been compiled by many of the top major mint error dealers.

This price guide is a guide. Prices fluctuate due to the date, grade, eye appeal and how dramatic the striking error is. Rarity is also a factor. The price is sometimes based on the rarity and grade of the type of coin as well as how rare the error is. The price can also vary depending on whether two collectors are bidding for the same rare major mint error. When purchasing a mint error, it is important to use multiple resources to determine value, as there are many mint errors that do not fit into one category.

## Proof Errors (Updated September 2018)

**P**roof coins are struck by technicians who hand feed the blanks into special presses. They are produced, examined, and packaged using extreme quality control. It is very unusual to find major proof errors. A few broadstrikes, off-centers, double strikes in collars and off-metals have been known to be found in sealed proof sets. Proof errors are aggressively sought after by many error collectors.

A very small group of Proof errors recently came from a collection that was auctioned by the State of California. The U.S. Secret Service inspected and released this collection to the State of California determining that it was legal to own. The State of California then auctioned the collection and it has been dispersed since the sale.

Denomination	Broadstrikes	Die Trials	Double/Triple Strikes	Off-Center Strikes	Partial Collar Errors
Proof Lincoln Cent	\$1,000 - \$1,500	\$1,000	\$3,000	\$1,500 - \$3,000	\$500

## Broadstrikes (Updated September 2018)

A broadstruck error occurs when a coin is struck without the collar to form the rim and edge that is part of the shape of the coin. Coins can be broadstruck on either type one or type two planchets. When a coin is broadstruck the blank being fed into the collar will spread and distort outward as it is being struck because the collar isn't in the correct position to retain it.

# Mint Error News Price Guide

## Partial Collars (Updated September 2018)

**P**artial collar strikes occur when there is a malfunction of the striking press. This causes the collar to be in an incorrect position. The lower die (usually the reverse die) is recessed in the collar. This allows the coin which is going to be struck to have a formed rim. After a coin is struck the lower die raises upwards, pushing the struck coin out of the collar and ejecting it. If a blank entering the collar is not properly seated, it will only have partial reeding as it is struck. The edge of this coin will have a partial reeding and a partial blank surface area. Recently, the Mint has installed new machinery where either die can be installed in either position.

Denomination	X/AU	Unc

## Uniface Strikes (Updated September 2018)

Uniface coins occur when there have been two blank planchets in the press at the same time. The other blank will obstruct the die on either the obverse or reverse side, which will prevent it from having that design on the coin. There are many different variations involving uniface errors. In addition to having a 100% blank obverse or reverse, a coin can be struck off-center, with a blank planchet in the collar which will obstruct one side of the off-center. There are also mated pairs which have a combination of multiple errors which can include a side which is uniface. Finally, there are uniface strikes due to a die cap which adhered to the die, forming itself in the shape of a die and striking blank planchets.

Denomination	Uniface Obverse XF	Uniface Obverse Unc	Uniface Reverse XF	Uniface Reverse Unc
Large Cent	\$1,500	\$4,000	\$1,250	\$2,000

## Bonded Coins (Updated September 2018)

**B**onded coins occur when the feeder system, which supplies blank planchets to the coin press, malfunctions and jams. When this occurs, a struck coin is not properly ejected and another planchet is fed into the collar and is struck. This struck coin will land on top of the previously unejected strike. These coins will then crush and bond together. This may occur many times as more coins bond.

Denomination	2 Planchets	3-4 Planchets	5-10 Planchets
Lincoln Cent Wheat Ears	\$5,000	\$15,000	–
Lincoln Cent Memorial	\$600	\$2,000	\$5,000 - \$10,000

## Struck Fragments (Updated September 2018)

The blanking press takes the coils of metal strips and punches blanks out of it, ejecting the webbing at the other end. The webbing is cut into small scrap pieces to be melted and recycled. Occasionally a scrap piece will be mixed with the blank planchets and struck by the dies. Struck fragments are rare in the larger denominations. These can be uniface or die struck both sides and are very rare on type coins.

Denomination	Uniface	Die Struck Both Sides
Indian Cent	\$1,000	\$2,000
Lincoln Cent Wheat Ears	\$750	\$2,000
Lincoln Cent Memorial	\$75	\$125
3 Cent Nickel	\$3,000	\$3,500

## Mated Pairs (Updated September 2018)

**M**ated pairs involve two individual coins with different errors that were struck together at the same time. Mated pair error combinations can be found in most error types and come in many shapes and sizes. Mated pairs can be overlapped when one of the coins is struck off-center on top of another coin. Another type involves a brockage where a struck coin was perfectly centered on a blank and restruck. Some mated pairs involve a die cap where the cap and brockage coin are discovered together, but this is a scarce find.

The rarest mated pair type involves two die caps (obverse and reverse) where both dies were capped at the same time and both die caps are mated. This last type is extremely rare and there are only a few known examples of mated pairs involving an obverse die cap and reverse die cap. There are several of these mated pairs known on Kennedy Halves including two dated 1976, which is the Bicentennial year. One of the most spectacular mated pairs involve two Barber Dimes, an obverse die cap mated to a reverse die cap and are unique.

Mated pairs can also involve an off-metal where a smaller blank planchet or smaller struck coin was struck on top of a larger coin. This type is extremely rare. The most spectacular pair known is a double struck Franklin Half which was mated to a Lincoln Cent. The Lincoln Cent blank was on top of the obverse of the struck Franklin Half. This pair was then struck together. It is unique.

Denomination	Overlapping	Full Brockage	Die Cap	2 Die Caps
Lincoln Cent Wheat Ears	\$3,500	\$4,500	\$7,500	–
Lincoln Cent Memorial	\$500	\$750	\$750	\$1,250

# Mint Error News Price Guide

## Transitional Errors (Updated September 2018)

A transitional error occurs when a coin is struck on a planchet from a previous year with different metal composition. The most famous transitional is a 1943 copper cent struck on a 1942 copper blank. 1943 cents were struck in steel because of the copper shortage during World War II. Other famous transitionals include 1965 coinage struck in silver instead of clad.

There are also transitionals struck on blanks for the next year. An example is 1964 coinage in clad instead of silver. Most recently, transitionals were discovered involving the SBA and Sacagawea Dollars of 1999 and 2000. There are eight known 1999 SBA Dollars struck on the brass planchet for the 2000 Sacagawea Dollar, and four known 2000 Sacagawea Dollars struck on a clad planchet for the 1999 SBA Dollar.

Denomination	Off-Metal Planchet	Circulated	AU	Unc	Choice Unc – Gem
Lincoln Cent 1943 Transitional	Copper Cent Planchet	\$75,000	\$100,000	\$200,000	\$250,000

## U.S. Gold Errors (Updated September 2018)

Major mint errors on U.S. Gold coins are the most prized category of all mint errors. Gold errors are very rare and a few have traded in the \$75,000 to \$100,000 range. Even a broadstruck U.S. Gold coin can easily sell for \$15,000 to \$30,000 compared to a broadstruck Cent, Nickel, Dime or Quarter which all sell for well under \$10. Many serious collectors of Gold Errors have to wait patiently for months and sometimes even years to acquire that one special piece for their collection.

The prices listed here are for common dates in AU-Unc. Better dates and errors that are in gem condition are worth considerably more.

Denomination	Partial Collar	Broadstruck	Clipped Planchet	3% - 5% Off-Center	10% - 15% Off-Center
\$1 Gold Type 1	\$1,000	\$5,000	\$2,000	\$10,000	\$25,000
\$1 Gold Type 2	\$5,000	\$10,000	\$10,000	\$20,000	\$35,000

## Indents (Updated September 2018)

An indent error occurs when two blanks are fed inadvertently into the same collar, with one blank partly overlaying on top of the other. When the hammer die strikes this combination, the upper blank will be forced into the lower blank, creating a depression which is shaped similar to the upper blank. A scarce type of indent occurs when a blank intended for one denomination lands on top of a blank from a different denomination.

## Die Caps (Updated September 2018)

**D**ie caps are caused when a struck coin sticks to the upper hammer die. Once the coin is struck to the die face, the reverse of the struck coin becomes the new die face. When the next blank is fed into the collar and the strike occurs, the reverse design of the adhered struck coin impresses itself into the new blank. This struck coin is a brockage strike. The coin that adhered to the upper die is known as a die cap. This process repeats itself as more coins are struck by the cap. The greater the number of strikes, the higher the cap metal will be pushed around the upper die shaft. Eventually, the cap brakes away from the die in the shape of a thimble.

## Die Adjustment Strikes (Updated September 2018)

Die adjustment strikes are also known as die trials. This error occurs when a coin is struck from the press with very little pressure. When the press is being set up and adjusted, extremely weak strikes occur as the strike pressure reaches its optimum level. These die trials are destroyed after being struck and are rarely found in circulation.

## Double Denominations (Updated September 2018)

One of the most expensive, popular, and desired types of errors are the double denominations. This error happens when a coin is struck on a previously struck coin of a smaller denomination. Examples are a cent on a struck dime, and a nickel on a struck cent. The most dramatic are those with considerable design visible from the original strike. There are a few known double denominations with different dates.

Denomination	Struck On	Circulated	AU	Unc

## Brockages (Updated September 2018)

A brockage error can only occur when there are two coins involved. One of the coins involved will always be a struck coin which has not ejected properly. That struck coin will find its way back between the dies and will be struck next to a blank planchet which was fed into the collar. The image of that first struck coin will be impressed into that side of the blank planchet. The result will be a second coin which has images of the first coin impressed into it. Those images will be pressed into the coin and the image will be in reverse. This incuse sunken image is known as a brockage.

## Double & Multiple Strikes (Updated September 2018)

When a blank planchet is struck by the dies, the normal procedure is for the feeders to eject the struck coin out of the collar and into a chute. If there is a malfunction and the struck coin isn't ejected, it may receive a second or third strike by the dies. A multiple struck coin can happen in many ways and have many combinations of errors.

(Since each double and multiple strike can vary from being 10% off-center to 90% off-center, the prices listed below can be substantially more based on the percent off-center and dramatic overall look.)

## Off-Center Strikes (Updated September 2018)

Off-center coins are one of the most common and best known types of errors. This happens when a blank which is supposed to be fed into the press, lands in the collar improperly. When this occurs only part of the blank is between the upper and lower dies. When the dies strike the blank, only that part will be struck with a design.

Denomination	10% - 15% XF/AU	25% - 60% XF/AU	10% - 15% Unc	25% - 60% Unc

## Off-Metals

(Updated September 2018)

Off-metal and wrong planchet errors occur when a correctly made blank from one denomination is accidentally fed into a press for another denomination. Examples are a nickel struck on a cent planchet and a cent struck on a dime planchet. The coin struck on an incorrect blank will weigh exactly what the denomination of that blank would have been. An even more dramatic wrong planchet error is a coin struck on a previously struck coin of a different metal.

Denomination	Off-Metal Planchet	Circulated	AU	Unc	Choice Unc – Gem

## Counterbrockages (Updated September 2018)

A counterbrockage error involves a cap die and a previously struck coin. When a cap die strikes a previously struck coin, the obverse design from that struck coin will be impressed into the cap. The result will be a design where the cap face will be an incuse brockage. When a new blank is struck by this cap die with an incuse brockage image, the obverse will have a raised and spread image from that incuse design of the cap. This brockage impression is known as a counterbrockage.

Denomination	Circulated	AU	Unc	Choice Unc - Gem

## Fold-Over Strikes (Updated September 2018)

A fold-over coin is one of the most dramatic types of errors. It occurs when the blank is standing vertically between the dies. During the strike, the force is so great that it bends and folds the blank. These fold-overs can be on-center or off-center, and come in many different shapes. There are a few fold-overs with multiple errors, either with an additional strike or fold-over. Denominations above quarters are very scarce.

Denomination	AU	AU Dated	Unc	Unc Dated
Indian Cent Memorial Copper	\$1,000	\$1,250	\$1,250	\$1,500
Lincoln Cent Memorial Zinc	\$750	\$1,000	\$1,000	\$1,250

## Martha Washington Test Pieces (Updated September 2018)

There is one set of a Dime, Quarter and Half struck by Martha Washington dies that are permanently housed in the Smithsonian Institute, embedded in blocks of lucite. According to United States Pattern and Related Issues, by Andrew W. Pollock III, “the only trial pieces purported to have survived metallurgical testing in 1965 were the Dime, Quarter Dollar, and Half Dollar equivalent strikes in copper-nickel clad over copper.”

Mike Byers’ discovery of the Martha Washington Test Piece on a copper-zinc Cent planchet struck 10% off-center with a uniface reverse was a front page Coin World article on August 7th, 2000.

Denomination	Unc	Choice	Gem
Martha Cent	\$4,000	\$5,000	\$6,000
Martha Nickel	\$4,500	\$6,000	\$7,500
Martha Dime	\$7,500	\$10,000	\$12,500
Martha Quarter	\$5,000	\$7,500	\$10,000
Martha Half Dollar	\$5,000	\$7,500	\$10,000
Martha Dollar (SBA Planchet)	\$10,000	\$12,500	\$15,000
Martha Dollar (Sac Planchet)	\$6,000	\$7,500	\$10,000

# COINWeek

## **The CoinWeek Mission:**

Our mission is a simple one, to inform, entertain and educate our readers about coins, paper money, and every other area of numismatic pursuit.

We accomplish that mission by having the best numismatic writers and contributors in the industry. In fact since 2011, CoinWeek writers and contributors have won over 40 Numismatic Literary Guild Awards and CoinWeek itself has been named the “Best Online News Site” for the last 4 years straight.

CoinWeek provides the facts that collectors can use. We tell the back stories about coins and the people that collect and sell them. We provide perspective commentary and analysis on the issues that effect the industry and the hobby we love.... **And we do it all for FREE.**

## **Why You Should Read CoinWeek:**

- CoinWeek is independent and unafraid of tackling important issues that face the hobby.
- CoinWeek and its representatives attend almost all of the major Coin & Currency conventions in order to bring the most current print and video news from the numismatic marketplace to our readers.
- CoinWeek offers innovative coverage of modern coin issues, auction houses, and the world mints. We go beyond the surface information you usually find elsewhere.
- CoinWeek maintains the largest numismatic video library accessible on the web to offer our subscribers the most comprehensive educational video available with information about rare coin and currency news, seminars, interviews, collecting tips and more.

*New Edition of Bart's United States Paper Money Errors Available Now*

# UNITED STATES PAPER MONEY ERRORS

A Comprehensive Catalog & Price Guide

**DR. FREDERICK J. BART**

FOURTH EDITION

Comprehensive Catalog and Price Guide makes first appearance since 2008

By Coin & Currency Institute....

After a lapse of seven years, a new edition of United States Paper Money Errors, Fred Bart's ground-breaking book is now available. The fourth edition is more than just an update to the third: Bureau of Engraving and Printing (BEP) errors have been added, nearly all the illustrations have been changed, there is a rarity guide for each note—which additionally are now priced in four grades (EF, AU, Choice CU and Gem CU)—and, for the first time, there is a section showing some notes in color.

This has always been an enormously popular book, not only among established collectors but also with newcomers seeking to learn more about their "find." There is no other book like it on the market. More than a price guide, its 296 pages contain a wealth of information on what to look for and what mistakes to avoid. It is a necessity for all dealers, collectors, and anyone who comes into regular contact with paper money.

- The new and improved must-have book for U.S. paper money errors
- Rarity guide for each note
- Prices in four conditions
- The universally-used Friedberg Numbering System™—The standard method for describing U.S. currency
- Invaluable appendices with data found nowhere else
- Hundreds of photos
- 296 pages, 20+ with new info
- Convenient & handy 5.75 x inch format

# MINTERRORNEWS GLOSSARY

Euro 50 Cent/20 Cent Mule

## What are Mules?

A mule occurs when a coin is produced with mismatched dies. In some countries, the Mints use dies for different denominations with the same dimensions. In these instances, mules have been known to exist and are not that rare.

An example would be a New Zealand/Bahama mule where thousands were struck and they are worth \$50 each. The obverse of a Bahama 5 Cent piece was muled with the reverse of a New Zealand 2 Cent piece.

On the other end of the spectrum are the extremely rare mules including a few from the United States. An example would be a mule with a Sacagawea Dollar reverse and a State Quarter obverse.

The photo shown above is a rare example of a Euro 50 Cent reverse that was muled with a Euro 20 Cent reverse. This rare piece is also a “two-tailed” coin because both dies were reverse designs and both are denominations of Euro coinage.
