MINT**ERROR**NEWSTM MAGAZINE

Bringing the latest mint error news to the collector.

Mike Byers, Publisher & Editor, Welcomes You!

Welcome to Mint Error News Magazine, bringing the latest mint error news and information to the collector. This is our 20th year bringing you both an online PDF magazine and the Mint Error News website. There are over 1,400 articles, features, discoveries, news stories with mint error related info from the United States and around the World. Our website, minterrornews.com, has become the most popular and informative Internet resource for mint errors and is read by thousands of dealers and collectors.

Over the last 20 years with the advent of the internet millions of collectors have flocked to online auctions and dealer websites. Many people connect to various online forums and clubs to share knowledge and learn about Mint Errors. Everyone, including dealers, collectors and even investors have instant access to information as never before. The Mint Error market has experienced an explosion in collector interest over the last 20 years.

Time and again, rare and unique Mint Errors in the numismatic market have made headline news. Authentication and certification of Mint Errors is now commonplace. In 1991, ANACS was the first to authenticate, grade and encapsulate major Mint Errors. In 1999, PCGS and NGC began certifying Mint Errors. Major Mint Errors are now pursued, collected and traded just like patterns, territorial Gold, colonials and other interesting segments of numismatics.

In 1975, I purchased a 1900 Indian Head Cent struck on a \$2 1/2 Indian Gold blank planchet for \$7,750 at a major coin auction. That price ranked among the top five ever realized for a Mint Error that few dealers or serious collectors would even consider. At that time price guides for Mint Errors were nonexistent and today that Indian Head Cent struck in Gold is certified MS65 by PCGS and is valued at six figures.

MINTERRORNEWSTM

PUBLISHER & EDITOR

Mike Byers

Mike Byers (mikebyers.com) is president of Mike Byers Inc. He has been a professional numismatist for over forty years. He is one of the largest dealers handling U.S. Gold Coins, Patterns and Rarities certified by PCGS and NGC. He has handled major coin collections and attends every major coin convention. Mike Byers carries an extensive inventory as well as solicits want lists and is always looking to purchase fresh inventory and collections. You can visit Mike Byers and view his rarities at the ANA, Central States, FUN show and the Long Beach Coin Expo.

Mike Byers was a consultant to ANACS for Mint Errors from 2000 to 2006. He is also the Owner, Publisher and Editor of Mint Error News Magazine and the Mint Error News Website that was founded in 2003. In 2009, Mike Byers published his first book, *World's Greatest Mint Errors*, which received the NLG Award for Best World Coin Book and is available on Amazon. In 2016, Mike Byers was featured on Fox News in an interview with one of his unique mint errors.

Jim Stoutjesdyk

Jim Stoutjesdyk was named Vice President of Heritage Rare Coin Galleries in 2004. Since coming to Heritage in 1993, Jim has assumed a wide variety of responsibilities. He initially was hired as the Gallery Manager for Heritage's retail showroom. For several years he helped to develop Heritage's retail clientele and placed millions of dollars worth of rare coins with collectors. Jim's interest turned to wholesale trading and he quickly became a familiar face at coin shows across the nation. As Vice President, Jim's duties include buying and selling millions of dollars worth of rare coins each month, pricing all of the new coins available for sale each day, and overseeing the daily operations of the rare coin department. In 2019 the American Numismatic Association awarded Jim the very prestigious Doctor of Numismatics honorary degree.

Jim Stoutjesdyk is a Consultant to Mint Error News for U.S. Coins, Unique Items, Patterns and Mint Errors.

Heritage Auctions is the largest collectibles auctioneer and third largest auction house in the world, as well as the largest auction house founded in the U.S. We are also the undisputed Internet leader in our field, with more than 1.75 million online bidder-members registered on HA.com from all 195 countries. This loyal and growing community of collectors is a testament to the usefulness of our website, our reputation for professional business practices and our vast expertise in the field of art and collectibles.

Established in 1976, Heritage offers a wide range of U.S. & World Coins, Rare Currency, Fine & Decorative Art, American Art, Illustration Art, Modern & Contemporary Art, Urban Art, Comic Books & Comic Art, Movie Posters, Entertainment & Music Memorabilia, Jewelry & Timepieces, Luxury Handbags, Sports Collectibles, Historical & Political

Memorabilia, Rare Books & Manuscripts, Ethnographic Art, & Space Exploration Memorabilia, Civil War Memorabilia, Photographs, Nature & Science, Fine and Rare Wine, Luxury Real Estate, Pop Culture Collectibles, and more.

MINT**ERROR**NEWSTM CONSULTANTS

Dave Camire is considered an authority on modern minting technology and production, specializing in mint errors and Chinese coins. He has visited many mints, both domestically and internationally, which is not only insightful but useful in his role as NGC Modern World Coin Grader and Finalizer. His knowledge of the minting process is helpful in distinguishing mint defects from damaged coins and establishing a coin's authenticity and grade.

Dave Camire

Dave co-authored *100 Greatest U.S. Error Coins* and has contributed to such numismatic publications as *Coin World* (honored with being listed as one of the 100 Most Influential People), *COINage*, *Numismatic News*, *The Numismatist* and the *Red Book*. He has been featured on National Public Radio (NPR) and seen on *Good Morning America* and the *Discovery Channel*.

Dave is also President of Numismatic Conservation Services (NCS). With his knowledge and expertise in coin conservation, he has been an active volunteer at the Smithsonian Institution's Museum of American History, helping to preserve the National Numismatic Collection and establishing key numismatic displays at the museum. A collector at heart, he has been collecting since he was 13 years old.

Dave Camire is a Consultant to Mint Error News for Mint Errors, Patterns and Die Trials.

Mike Faraone

Mike Faraone is the owner of Mike Faraone Rare Coins in Las Vegas, Nevada. He previously was a grader at PCGS for 12 years after 11 years at ANACS.

He has taught grading at the ANA Summer Seminar for twenty years. Mike has lectured on Mint errors and Counterfeit protection at numerous coin shows across the country. He is a previous president of the National Silver Dollar Roundtable and served as editor of the NSDR Journal for over twenty years. Mike can be reached via e-mail at: mfaraone@hotmail.com.

Mike Faraone is a Consultant to Mint Error News for Mint Errors, Patterns and Die Trials.

MINTERRORNEWSTM

CONSULTANTS

Ron Guth is a recognized authority on United States and German coins. He is a licensed Certified Public Accountant who has been involved professionally in numismatics for over fifty years as a collector, dealer, researcher, and writer. His books and articles have earned numerous awards, including the American Numismatic Association's Heath Literary award and the Olga & Wayte Raymond awards, the Numismatic Literary Guild's Best Numismatic Investment Book and Best Book of the Year awards, and the Professional Numismatic Guild's Best Book of the Year award. In 2003, Ron received the prestigious President's Award from the American Numismatic Association in recognition of his numerous contributions to numismatics. In 2021, Coin World named Ron as one of the Top Ten Most Influential People in Numismatics for the sixty-year period from 1960-2020.

Ron Guth

Ron created the CoinFacts website (now PCGS CoinFacts) in 1999 and sold the website to Collectors Universe in 2004 (where it is now presented as PCGS CoinFacts). Ron served in various capacities at Collectors Universe, including Director of Numismatic Research, President of the Professional Coin Grading Service, and President of PCGS CoinFacts.

Currently, Ron serves as proprietor of GermanCoins.com and as Chief Investigator at the Numismatic Detective Agency, where he provides expert provenance on high-end coins. Ron Guth is a Consultant to Mint Error News for Patterns and Die Trials.

Marc Crane

Marc Crane is a dealer specializing in rare U.S. coins and U.S. patterns. He started Marc One Numismatics, Inc. in 1991. He is a member of the PNG (#565).

Marc tied for 1st place in a PCGS grading contest and is considered a world-class grader and authenticator. He is a contributor to the Red Book and is permanently listed in the pattern section. His coin store in Rancho Mirage, CA is open to the public and he regularly attends coin shows and auctions across the country.

Marc Crane is a Consultant to Mint Error News for Patterns and Die Trials.

MINT**ERROR**NEWSTM CONSULTANTS

Andy Lustig has been dealing in U.S. and World Coins since 1975 and has attended more than 2,000 coin shows and auctions.

Andy is the co-founder of the Society of U.S. Pattern Collectors (uspatterns.com). He has been a member of the Professional Numismatists Guild (PNG #614) since 2005. He is a member of NGC and was also a former grader and authenticator for PCGS.

Andy was a speaker at the annual CSNS convention, presenting "Collecting Pattern Coinage." Andy was a major contributor to the 8th Edition of the Judd book.

Andy Lustig is a Consultant to Mint Error News for Mint Errors, Patterns and Die Trials.

Andy Lustig

Saul Teichman

Saul Teichman is a co-founder and primary contributor/editor of the Society of U.S. Pattern Collectors (uspatterns.com) as well as contributor to the 8th Edition of the Judd book and Andrew Pollock's *United States Patterns and Related Issues* as well as many other books. He has been collecting primarily off-metal U.S. Mint errors for over 20 years and maintains extensive pedigree information for many error issues which have been published here in the past.

Saul Teichman is a Consultant to Mint Error News for Mint Errors, Patterns and Die Trials.

Rare Coin Wholesalers has the largest inventory of U.S. Rare Coins.

Founded in 2001, Rare Coin Wholesalers has transacted over \$2 billion in U.S. rare coin business and is a recognized leader in acquiring, managing, and selling U.S. rare coins positioned for wealth preservation and capital growth.

Steven L. Contursi is a Consultant to Mint Error News for U.S. Patterns.

Steven L. Contursi

Jeff Ylitalo

Jeff Ylitalo has collected Mint Error coins since 1993. He has avidly researched & written about this area of numismatics since 2006 contributing dozens of articles to CONECAs bi-monthly publication ErrorScope and Mint Error News. Jeff is the former editor for the ErrorScope 2008-2017.

Jeff's research and collecting focus is now primarily centered on World Error coins. Jeff can be reached via e-mail at: jylitalo@yahoo.com.

Jeff Ylitalo is a Consultant to Mint Error News for Mint Errors.

John Wang is an avid numismatic researcher and collector. His research focus is on absolute rarities including patterns, mint errors and exonomia, with particular interest in coin census, pedigrees, coin designers and minters. A historian at heart, John enjoys tracing coins and people through time.

John writes for Mint Error News, the So-Called Dollar Fellowship and Wikipedia. He is also a top contributor to Collectors Universe Message Forums. Beyond writing, John enjoys creating coins, including co-creating a 2021 Morgan Dollar commemorative with Moonlight Mint, and inspiring a Frank Gasparro Liberty Dollar pattern design commemorative with Grove Minting Company. A collector at heart, John maintains a set of So-Called Dollar rarities in the PCGS Set Registry. John is founder and editor at PrivateMintNews.com.

John Wang

John Wang is a Consultant to Mint Error News for Mint Errors and Patterns.

Fred Weinberg

Fred Weinberg is a highly respected numismatist, with 40 years of full time experience in the rare coin marketplace.

He deals in numismatic United States Gold & Silver coinage, as well as specializing in buying & selling Major Mint Error coinage of all types.

He is one of the original 31 dealers selected as an authorized PCGS (Professional Coin Grading Service) dealer at it's inception in 1986.

Fred Weinberg has now retired and was a Consultant to Mint Error News for Mint Errors and Die Trials.

MINT**ERROR**NEWSTM

CONSULTANTS

Christopher Talbot Frank is an error coin dealer of over 25 years and is doing business as CTF Error Coins. Christopher specializes in superior eye appealing error coinage with a wide variety of dramatic specimens. He has an artistic background as a professional photographer and now specializes in high end numismatic photography. Christopher handpicks every coin in his inventory based on eye appeal first and rarity second.

Chris's 800 plus certified coin inventory is basically an error coin type set in many dates and denominations. Although he carries all error types and dates, he specializes in mint state modern and the very rare ultra modern (2002-present) error coins. Christopher has authored many articles on error coins for Mint Error News over the last few years.

Christopher Talbot Frank is a consultant to Mint Error News for modern and dramatic Major Mint Errors.

Christopher Talbot Frank

Greg Bennick

Greg Bennick is a collector and researcher of major mint errors and has been actively involved in the hobby since 1981 when he made his first major error purchase, a Liberty nickel on a cent planchet, at the age of ten.

A professional keynote speaker on the topic of Build a Better Now® for the corporate and association markets (gregbennick.com) Greg writes for multiple print outlets on major errors. He maintains an extensive personal library of error-related books, pamphlets, magazines, and ephemera going back to the dawn of the hobby in the 1950's.

Greg is a board member of CONECA, and focuses his study on major US and Canadian error coins, significant ancient and world errors, and the minting process.

Greg Bennick is a consultant to Mint Error News for Mint Errors and trends in the error market.

MINT**ERROR**NEWSTM CONSULTANTS

Silvano DiGenova

Tangible Investments founder and president Silvano DiGenova is an authority on the rare coin market, grading, authenticity, and appraisals. In fact, since Silvano co-founded the renowned Professional Coin Grading Service (PCGS) and designed the PCGS coin grading standards, you could actually say he wrote the book on coin grading.

Millions of collectors and investors depend on Silvano DiGenova's expertise every day. He has been featured in Fortune Magazine's "People to Watch," quoted on the front page of The Wall Street Journal, interviewed in hundreds of U.S. newspapers, and has appeared several times as a commentator on CNN, FNN, CNBC, the Discovery Channel, the History Channel, and more.

Silvano DiGenova is a consultant to Mint Error News for Patterns and Unique & Esoteric U.S. Coinage.

Brian Hodge is a Partner and the President of Numismatics at Minshull Trading. Over the last three decades years they have been a leader in the numismatic industry and have grown into a formidable market maker, garnering the respect of every major market player.

He is a member of every major numismatic organization in the country, including PNG, ICTA, FUN, CSNS, and a life member of the ANA. He is a regular Red Book contributor and maintains consistent and up-to-date pricing to sustain healthy markets.

Brian Hodge is a consultant to Mint Error News for Specimen Coinage and Unique U.S. Coins.

Ian is president and co-founder of GreatCollections Coin & Paper Money Auctions. From a young age, Ian was interested in collectibles and started working on weekends for a stamp dealer in Sydney, Australia at age 14. From there he learned about auctions at Stanley Gibbons Australia, personally handling many important sales including the Purcell Collection of Kangaroo and Map Series, the Mackey Collection of Australian States/Pacific Islands and the Morrison Hill China Collection. Ian also put together the company's first paper money auction featuring one of the finest New Zealand bank note collections ever formed.

Ian is a member of the prestigious Professional Numismatists Guild, member 785 and abides by the PNG Code of Ethics. In 2021, CoinWorld Magazine named Ian one of the most influential people in numismatics. Contact Ian Russell at ian@greatcollections.com.

Ian Russell

Great Collections holds the record auctioning the famous \$1 Sacagawea obverse muled with a Quarter reverse for \$194,062.50.

Ian Russell is a consultant to Mint Error News for Error Coins and Patterns.

Jim Gately

Jim Gately is the owner of the #1 ranked PCGS registry set of Buffalo Nickels. He also has other registry sets with PCGS.

He purchased the unique 1913 Gold Buffalo Nickel from Mike Byers for \$400,000 and proudly included it in his set.

Jim is an expert on 20th Century U.S. coinage with an emphasis on Buffalo Nickels. He is a consultant to Mint Error News for Double Dies and Overdates.

Rare Australia Florin Struck on a U.S. Silver Wartime Nickel Planchet

by Mike Byers (mikebyers.com)

Rare Australia Florin Struck on a U.S. Silver Wartime Nickel Planchet

This is a new discovery and is one of only two known. Just authenticated and certified by NGC, this Australia Florin was struck at the San Francisco Mint on a U.S. Silver Wartime Nickel Planchet.

Australia Florins were struck at the San Francisco Mint from 1938 to 1945. The composition is .925 silver with a weight of 11.31g, a diameter of 28.5mm, and a thickness of 2.3mm. These coins have a small "S" mint mark for San Francisco below the Australian Coat of Arms.

U.S. Wartime Nickels were struck in San Francisco from 1942 to 1945, during World War II. The composition is 35% Silver, 56% Copper and 9% Manganese. The weight is 5g with a diameter of 21.2mm.

Wartime Mint Errors from 1942-1945 are among the most coveted

and sought after by mint error collectors. Obviously the most famous are the 1943 copper Lincoln Cents that sell for \$300,000 and the 1944 steel Lincoln Cents that sell for \$50,000 to \$100,000. Even a 1943 Lincoln cent struck on a Curacao 25 Centstukken planchet sold in a Heritage auction for \$31,200.

There are only a handful of world coins struck on U.S. planchets known during this wartime period. This amazing new discovery is the second known Australian coin struck on a U.S. Silver Wartime Nickel planchet. Also known is a 1942 Bolivia 50 Centavos struck on a U.S. Wartime Nickel Planchet that was struck at the Philadelphia Mint.

This historic off-metal belongs in a collection of unique Australian coins, U.S. wartime coinage, or unique mint errors.

Rare Australia Florin Struck on a U.S. Silver Wartime Nickel Planchet

A regular Australia Florin has a diameter of 28.5mm.

Rare Australia Florin Struck on a U.S. Silver Wartime Nickel Planchet

Rare Australia Florin Struck on a U.S. Silver Wartime Nickel Planchet

Rare Australia Florin Struck on a U.S. Silver Wartime Nickel Planchet

Another foreign coin known that was struck on a U.S. Silver Wartime Nickel planchet is a 1942 Bolivia 50 Centavos struck at the Philadelphia Mint.

COINWeek

The CoinWeek Mission:

Our mission is a simple one, to inform, entertain and educate our readers about coins, paper money, and every other area of numismatic pursuit.

We accomplish that mission by having the best numismatic writers and contributors in the industry. In fact since 2011, CoinWeek writers and contributors have won over 40 Numismatic Literary Guild Awards and CoinWeek itself has been named the “Best Online News Site” for the last 4 years straight.

CoinWeek provides the facts that collectors can use. We tell the back stories about coins and the people that collect and sell them. We provide perspective commentary and analysis on the issues that effect the industry and the hobby we love.... **And we do it all for FREE.**

Why You Should Read CoinWeek:

- CoinWeek is independent and unafraid of tackling important issues that face the hobby.
- CoinWeek and its representatives attend almost all of the major Coin & Currency conventions in order to bring the most current print and video news from the numismatic marketplace to our readers.
- CoinWeek offers innovative coverage of modern coin issues, auction houses, and the world mints. We go beyond the surface information you usually find elsewhere.
- CoinWeek maintains the largest numismatic video library accessible on the web to offer our subscribers the most comprehensive educational video available with information about rare coin and currency news, seminars, interviews, collecting tips and more.

INCREDIBLE TREASURES ARE OUT THERE

Amazing Major Proof Ike Dollar Error Revealed at FUN 2025

by Greg Bennick

For anyone who doesn't think that there are error coins still out in the wild to be found, this story of a brand new, major discovery will help to quickly change your mind.

I have been at the 2025 FUN show in Orlando Florida all week, serving in two roles. First, I am a Board Member

for CONECA and am here at the show to sit behind the CONECA table, answering questions and analyzing potential error coins which people bring to us for examination. The other role I fulfill is as a Mint Error News Consultant. I attend most major coin shows nationally scouring the bourse floor for new-to-market, exciting, fresh

INCREDIBLE TREASURES ARE OUT THERE

Amazing Major Proof Ike Dollar Error Revealed at FUN 2025

mint errors. This show came through magnificently in this regard.

As you can imagine, many of the coins one sees at a major show are items that have been on the market before, and if you learn or know your history (from reading auction catalogs and older mint error publications, which I highly recommend doing), then you know when you see a coin that it has been sold before, or maybe one that has been owned by you before! You also come to know when a coin is fresh to the market and that you're looking at an exciting new discovery.

The other group of coins are ones I tend to see far more often. A majority of the coins we examine that come to the CONECA table are minor errors, or are not errors at all. So when something important comes along, its tremendous to experience.

This was the case today (yes, I am excited enough that I am writing this article same day!). I was approached at the CONECA table by Alabama coin dealer and jeweler Robert Bradley. Robert explained that he had an error coin he'd like to show me. He said

it had come from a proof set that a customer had brought into the shop for sale. Before I could even formulate a guess as to what it might be, he put down on the case a single proof Eisenhower dollar in a 2x2. I instantly saw, even from over two feet away, that this coin was wildly important. It was clearly double struck. I picked it up immediately.

Robert smiled as I looked in awe at what I held in my hands. It was even better than it first seemed. This was a 1976 Bicentennial, in collar, flip over double struck proof Eisenhower dollar!

The eye appeal is tremendous with clear evidence on both sides of the coin of the double strike. Robert could see that I was stunned. This was a major new discovery and one that certainly merited an article to inform the community, and to inspire you as a reader that fantastic finds are still out there waiting for you to discover. Yes, you might need to look through proof sets for a very long time to even hope of finding something remotely like this, but that's the fun of the search. Robert is the owner of an incredible coin.

INCREDIBLE TREASURES ARE OUT THERE

Amazing Major Proof Ike Dollar Error Revealed at FUN 2025

The coin immediately brought to mind the fantastic double struck proof Ike dollar owned by Mike Byers that appeared on the cover of Mint Error News, Issue #67. Mike's coin, a double

strike with the second strike off center, is also Bicentennial and is the only known double struck example with the second strike being off center.

[Click here for more information on Mike Byers' Proof Double Struck Bicentennial Ike Dollar.](#)

INCREDIBLE TREASURES ARE OUT THERE

Amazing Major Proof Ike Dollar Error Revealed at FUN 2025

Overall, very few Ike dollars date 1976 are known with spectacular errors. Robert's coin is only the fourth known of the date, denomination, and series. Given a cumulative mintage of around 7 million proof Ike dollars (adding the mintage of both varieties together), and considering the extremely low number of such fantastic rarities known, it becomes obvious that these truly are less than one in a million.

Thanks to Robert Bradley for sharing this wonderful coin with me, and for offering Mint Error News to release the story of its existence to the world as the first media outlet to report on this important discovery. The error community is better for it. We all need

reminders that luck can happen to anyone, and in fact, often will to those who put in the time to search for new error coins.

If you have questions about this or any other mint error coin, please contact us via email anytime: editor@minterrornews.com. Your email can be forwarded depending on what you put in the subject line (example: "Attn: Greg Bennick"). On behalf of the CONECA team who looked at and gave opinions on the coin, Chris Pilliod who gave further analysis, and Mike Byers for being enthusiastic about the find and offering space in Mint Error News to report on it... thank you!

UNIQUE OFF-METAL DISCOVERY: GREAT BRITAIN 2023 5 POUND 2oz .999 SILVER STRUCK ON A 2 POUND 1oz PLANCHET

by Mike Byers (mikebyers.com)

UNIQUE OFF-METAL DISCOVERY: GREAT BRITAIN 2023

5 POUND 2oz .999 SILVER STRUCK ON A 2 POUND 1oz PLANCHET

This is a discovery coin and a unique off-metal mint error. This 5 Pound 2oz Silver bullion coin, produced at the Royal Mint in London, was accidentally struck on a 2 Pound 1oz planchet.

The 5 Pound 2oz Silver bullion coin was individually packaged in a single coin capsule by the Royal Mint. An eagle-eyed collector

noticed that the weight was approximately 50% and realized that he had an off-metal major mint error.

Authenticated and certified by NGC as Struck on a 2 Pound Planchet, it is unique to date. It is amazing how the Royal Mint accidentally released this unique off-metal.

The obverse features the official coinage portrait of King Charles. The reverse, designed by David Lawrence, portrays the mythical bull.

An Exciting Lincoln Cent Foldover Edge Strike

Robert Risi, a collector and reader of Mint Error News wanted to share one of his rare Lincoln cent major mint errors. It is an exciting 1969-D Lincoln Cent with a very rare combination of mint errors.

It has a beautiful foldover strike that shows the complete portrait and date. Additionally, it is also an edge strike which is a very rare type of mint error. Having this combination of errors together is very special.

An Exciting Lincoln Cent Foldover Edge Strike

Private Mint News

Private mints and their issues have a long and illustrious history, but it is often hard to assemble, often years later without good documentation. When working with sovereign mints like the United States Mint, there is often a lot of archives and records available to research which is not available for private mints.

To address this, Private Mint News is a new online publication focusing on numismatics from by private mints. Private mint issues or creations, often in the form of tokens and medals called exnumia, is a rich and evolving area, however, research information can be thin on both classic and recent issues, especially the latter. The goal of Private Mint News is to assist in rectifying this situation by documenting and discussing issues from Private Mints of all eras.

Coverage includes private mints issuers of all eras and locations with an initial focus on the United States. Modern issuer coverage will include Daniel Carr of Moonlight Mint, Ron Lands of Gallery Mint Museum, Jared Grove of Grove Minting, Provident Metals, and other issuers. Classic issuers will include issuers of tokens, medals and coins including Civil War Tokens, So-Called Dollars, Territorial and Pioneer coins as well as Private Patterns.

Images Courtesy of Heritage Auctions, HA.com

1943 Bronze Cent, AU55 CAC
Noted Transitional Alloy Error
Ex: Donald Partrick

Sold For: \$264,000.00

1943 1C Struck on a Bronze Planchet AU55 PCGS. CAC. Ex: Partrick-Whispering Pines. The copper used for coining bronze cents was needed for the manufacture of munitions during World War II, and zinc-coated steel was selected as a replacement. Much experimentation took place before the government arrived at that decision. Patterns dated 1942, featuring a bust from the Columbian two centavos, were struck in various materials; unusual alternatives included plastic, rubber, bakelite, fiber, and glass. Those substances proved unsuitable for circulating coinage, even during a war emergency. Other candidates for the 1943 cent alloy were zinc, manganese, white metal, aluminum, and lead. The pattern cent Judd-2054 was struck in the zinc-coated steel that proved to be the best option.

Each of the three mints then in operation (Philadelphia, Denver, and San Francisco) produced 1943 cents in great quantities. Altogether, about one billion “steelie” cents -- the only magnetic U.S. coin issue -- were issued during 1943. They quickly became unpopular since the silver color, and a similar diameter, caused them to be accepted as dimes by the unwary. The steel cents also became discolored quickly. Meanwhile, the U.S. military was accumulating a vast quantity of spent copper ammunition cases, negating the need for the new alloy. The zinc-plated steel cent became a one-year experiment when copper returned to the alloy after 1943.

Given the huge mintages of cents during 1943, it is not surprising that a small number of examples would be struck on bronze planchets intended for 1942 cents. Rather than malfeasance on the part of mint employees, the likely theories are: planchets could have been wedged in the trap doors of the bins used to transport them; planchets may have been left over in the feeders; or the bins simply might not have been completely emptied before the transition to the zinc-plated steel cent. In any event, a few bronze cents were struck at each of the three facilities in 1943. In 1944, when the alloy reverted to bronze, again there were some transitional alloy errors, with some coins struck in zinc-plated steel at Philadelphia, Denver, and San Francisco. The 1944 Philadelphia zinc-plated steel cent is somewhat less rare than the 1943 bronze cent, possibly since zinc-plated steel cent planchets were used by the U.S. Mint to strike 1944 two franc pieces for Belgium.

Given the fame of the 1943 bronze cent, it is curious that none were discovered until March 1947, when sixteen-year-old Don Lutes, Jr. received one in his change from his high school cafeteria. He did not immediately report his find, however. The first to do so was Conrad Ottelin, a Cleveland physician, whose letter to *The Numismatist* was published in 1947. It was actually Ottelin's son who noticed the unusual 1943 cent while inspecting the family change. Over the years, additional examples were discovered. The search for examples was partially motivated by an unfounded rumor that the Ford Motor Company would exchange a new car for a bronze 1943 cent.

The number of surviving, genuine 1943 bronze cents is unknown, although generally estimated at about 20 coins from the Philadelphia Mint and perhaps six or seven from the San Francisco Mint. A single 1943-D bronze cent is known. PCGS has certified 13 of these Philadelphia Mint pieces in grades from XF45 to MS63 (11/24). Grades assigned include XF45 (1), AU50 (3), AU55 (2), AU58 (1), MS61 (3, one Red and Brown), MS62 (2), and MS63 Red (1, oddly, this coin does not appear in the PCGS Population Report, but its cert number 32839117 still verifies). Any appearance of a 1943 bronze cent at auction is an important event for the advanced Wheat Cent collector.

The present lightly circulated example displays attractive golden-brown color. Lincoln's cheekbone and jaw show slight wear, but ample luster remains, and there are no consequential marks. The overall presentation is most attractive and the high quality within the grade is confirmed by CAC. The 1943 bronze cent is the best known of all transitional alloy mint errors, and this problem-free Choice AU example will undoubtedly be the subject of intense bidding. The 1943 bronze Lincoln cent is listed among the *100 Greatest U.S. Coins*. Population: 2 in 55, 5 finer. CAC: 2 in 55, 3 finer (11/24).

Ex: Donald G. Partrick; Central States Signature (Heritage, 4/2021), lot 3068 (as AU55 NGC), realized \$240,000.

From The Whispering Pines Collection.

1943 Bronze Cent, AU55 CAC
Noted Transitional Alloy Error
Ex: Donald Partrick

**1944 Zinc-Coated Steel Cent, MS64
Rare Transitional Alloy Error
Tied for Finest Known**

Sold For: \$168,000.00

1944 1C Struck on a Zinc-Coated Steel Planchet MS64 PCGS. Ex: Whispering Pines. The 1943 bronze cent is the most famous transitional alloy mint error in numismatics. Its successor, the 1944 steel cent, is also well-known and undeniably rare. PCGS estimates that only 25 to 30 examples are known. The zinc-coated steel alloy was in official use at the Philadelphia Mint during 1944, used to strike two franc pieces for Belgium (KM-133). This may explain why the 1944 steel cent is more collectible than the 1943 bronze cent, which has an estimate of 10 to 15 survivors.

But whether a given steel planchet was intended for a 1943 Lincoln cent or a 1944 Belgian two franc, it was in the wrong place at the wrong time when struck by 1944 cent dies. The usual explanation is that a few steel cent planchets became lodged in a tote bin trap door, and were freed only when the bin was filled with bronze cent planchets.

NGC has certified only four 1944 steel cents, all in AU grades. PCGS has graded 11 examples, two in AU and eight in Mint State, but none finer than MS64. We can locate only a few prior prices realized at the MS64 level, one of which was a PCGS CAC example that brought \$158,625 as lot 4411 in an August 2013 Stack's Bowers sale. When the current coin appeared in our auctions in 2021, it surpassed that price realized, drawing in \$180,000.

The present coin and the one Stack's offered are different pieces, and this is also not the PCGS MS64 Bob Simpson specimen. The untoned surfaces are free from noticeable marks. The strike shows only slight blending of impression on Lincoln's jaw and cheekbone. Identifiers include a small gray freckle northeast of the second 4 in the date, and another freckle between the EN in CENT.

The U.S. Mint would also strike a few transitional alloy errors in 1983, as the bronze alloy ceded to its copper-plated zinc successor. But those coins are less celebrated, and less coveted, than their predecessors struck during World War II. The winner of the present lot will possess an unsurpassed example of the rare 1944 zinc-coated steel cent, specifically, the coin that holds the auction record for most valuable 1944 steel cent. It is fitting that this top example should carry the Whispering Pines pedigree.

Ex: Dallas Signature (Heritage, 6/2021), lot 3043, realized \$180,000.

From The Whispering Pines Collection.

**2001-D Lincoln Cent, MS65 Red
Muled With a Roosevelt Dime Reverse**

Sold For: \$60,000.00

2001-D Cent Muled with a Dime Reverse Die MS65 Red PCGS. A mule is a coin struck from mismatched dies. In the long history of the U.S. Mint, if patterns are excluded, a total of perhaps 30 to 40 mules are known. Best known of all is the circa 2000 “golden” dollar / quarter mule that pairs a Washington state quarter obverse and a Sacagawea dollar reverse on a Sacagawea dollar planchet. About twenty examples of that mule are confirmed, and they regularly command six figures at auction. The state quarter / Sacagawea dollar mule was ranked #1 in the *100 Greatest U.S. Error Coins* (2012) reference.

Among a multitude of mule possibilities, the Lincoln cent / Roosevelt dime mule is most likely to occur. The diameters for the cent and dime are similar, and both types have annual mintages that often exceed a billion or more pieces.

Nonetheless, mules are great rarities. We know of only seven cent / dime mules:

1. A 2001-D Lincoln cent obverse and a Roosevelt dime reverse on a Lincoln cent planchet. MS65 Red PCGS. **The present coin.**
2. Another. MS66 Red PCGS. FUN Signature (Heritage, 1/2024), lot 4450.
3. Another. MS66 Red PCGS. U.S. Coins Signature (Heritage, 8/2024), lot 4259.
4. Another. MS66 Red PCGS. Long Beach Signature (Heritage, 6/2021), lot 3158; MS65 Red PCGS. Long Beach Signature (Heritage, 9/2024), lot 3094.
5. Another. MS66 Red PCGS. Long Beach Signature (Heritage, 6/2021), lot 3158.
6. Another. MS65 Red PCGS. Long Beach Signature (Heritage, 2/2022), lot 3133.
7. Another. MS65 Red PCGS. Dallas Signature (8/2022), lot 3984.
8. A 1999 Lincoln cent obverse and a Roosevelt dime reverse on a Lincoln cent planchet. MS66 Red PCGS. Bellaire Collection; Central States Signature (Heritage, 4/2006), lot 5271.
9. A 1993-D Lincoln cent obverse and a Roosevelt dime reverse on a Lincoln cent planchet. MS65 Red PCGS. Alfred V. Melson Collection; FUN Signature (Heritage, 1/2010), lot 2383.
10. A 1995 Lincoln cent obverse and a Roosevelt dime reverse on a Roosevelt dime planchet. MS64 NGC. Alfred V. Melson Collection; FUN Signature (Heritage, 1/2010), lot 2384.

Probably, the seven known 2001-D cent / dime mules were struck on the same day, by the same die pair, on the same press. The dime reverse on the present fire-orange example features the characteristic broad rim with raised and recessed elements. The wider rim on the reverse is caused by the comparatively narrow diameter of the dime die. The letters in GOD WE TRUST are lightly brought up as seen on most examples, but the remainder of the strike is sharp.

Over the years, Heritage has auctioned all seven known examples of the 2001-D cent / dime mule, and it is interesting to compare images of these coins. The present lot appears to possess above average eye appeal, because most of the other coins display many minuscule toning flecks or spots. The copper-plated zinc planchet shows tiny trapped gas bubbles similar to those that affect the #7 coin from the list above, in this case appearing as small lumps on and around Lincoln's collar. If nothing else, these lumps are useful for pedigree markers. The appearance of a 2001-D cent muled with a dime is always an important opportunity for the advanced error specialist.

uspatterns.com

The Society of U.S. Pattern Collectors is dedicated to the study of many of the rarest coins struck at the U.S. Mint: patterns, die trials and experimental pieces.

Welcome to The Society of U.S. Pattern Collectors!

For those of you not familiar with this fascinating area of numismatics, patterns are prototypes for coins that, for the most part, were never approved for circulation. Most patterns are very rare, some unique, and others unknown outside of museums.

A good place to start learning about these pieces is our Beginner's Corner which includes a page on How to use this Website or the Photo Gallery which contains examples of many of the different pattern issues.

The United States Mint produced more than 1000 different patterns, as well as many die trials and experimental pieces. Despite the great rarity of many of these individual items, the great variety makes the series surprisingly collectable.

There are relatively few collectors specializing in United States pattern coinage. Most of these collectors target specific areas. For example, there are collectors who specialize in Indian Cent patterns, others collecting Morgan dollar patterns, and so on.

In addition to these specialists, there are thousands of collectors of regular issue United States coins who try to buy a few patterns to complement their collections. Many of these historical coins have wide appeal and are surprisingly affordable. There are many collectors who, for example, would like to own an 1855 Flying Eagle large cent (J-167, about 500 pieces struck) to go with their collection of large cents or with their collection of Flying Eagle small cents.

UNIQUE 1968-S KENNEDY HALF DOLLAR STRUCK ON A MAGNETIC PLANCHET

by Mike Byers (mikebyers.com)

There are many major mint errors known on U.S. proof coins including off-centers, off-metals, double and multiple strikes, bonded coins, and mated coins, but this is the only one known struck on a magnetic planchet.

UNIQUE 1968-S KENNEDY HALF DOLLAR STRUCK ON A MAGNETIC PLANCHET

Over my 45 years dealing in major mint errors, I've never encountered another U.S. proof mint error struck on a magnetic planchet. Fred Weinberg, who had this in his personal collection for decades, sold it in 2024. He stated that "as far as I know, this is the only known

U.S. proof mint error on a magnetic planchet and it is fascinating!"

The pressure of the Kennedy Half proof dies expanded the diameter of the 8.1 gram magnetic planchet to the diameter of a regular Kennedy Half Dollar.

UNIQUE 1968-S KENNEDY HALF DOLLAR STRUCK ON A MAGNETIC PLANCHET

Although authenticated and certified by PCGS as Proof 62, it is *as struck*. The magnetic planchet does not have the reflectivity of a regular polished proof planchet, nor does the cameo portrait show on the obverse. It has the typical look and color of the few mint state U.S. coins that are known to be struck on smaller magnetic washers.

It is amazing that this unique proof rarity survived over a half-century. Obviously this was an intentionally produced proof mint error (*piece de caprice*). This spectacular and enigmatic proof Kennedy Half Dollar struck on a magnetic planchet is in a class by itself.

UNIQUE 1898 BARBER DIME UNCENTERED/OFF-CENTER OBVERSE DIE CAP

by Mike Byers (mikebyers.com)

A die cap is caused when a struck coin sticks to the upper hammer die. Once

the coin is stuck to the die face, the reverse of the struck coin becomes the new die face.

UNIQUE 1898 BARBER DIME UNCENTERED/OFF-CENTER OBTVERSE DIE CAP

When the next blank is fed into the collar and the strike occurs, the reverse design of the adhered struck coin impresses itself into the new blank. This struck coin is a brockage strike. The coin that adhered to the upper die is known as a die cap. This process repeats

itself as more coins are struck by the cap. The greater the number of strikes, the higher the cap metal will be pushed around the upper die shaft. Eventually, the cap brakes away from the die in the shape of a thimble.

UNIQUE 1898 BARBER DIME UNCENTERED/OFF-CENTER OBVERSE DIE CAP

This Barber Dime obverse die cap is unique because the obverse is uncentered and the reverse is slightly off-center. Occasionally a die cap is not centered when it adheres to the upper hammer die.

There are seven Barber Dime Obverse Die Caps known. I have handled five of them including two featured in my book, *World's Greatest Mint Errors* (page 45 and 47).

UNIQUE 1898 BARBER DIME UNCENTERED/OFF-CENTER OBVERSE DIE CAP

This obverse die cap is fresh to the market and is in original mint state condition. In addition to being a die cap, it greatly expanded in size since it is uncentered and off-

center. A spectacular major mint error in the Barber Dime series and perfect for a mint error collection or a collection of Barber coinage.

UNIQUE ANDREW JACKSON PRESIDENTIAL DOLLAR WITH DOUBLED EDGE LETTERING

by Mike Byers (mikebyers.com)

UNIQUE ANDREW JACKSON PRESIDENTIAL DOLLAR WITH DOUBLED EDGE LETTERING

This is the *only known* Andrew Jackson Presidential Dollar struck for circulation with *doubled edge lettering*! Authenticated and certified by PCGS as MS 65, no others have been discovered in

over 15 years. Most doubled edge lettering Presidential Dollar mint errors are on John Adams dollars and there are some known on George Washington dollars.

UNIQUE ANDREW JACKSON PRESIDENTIAL DOLLAR WITH DOUBLED EDGE LETTERING

Although there are some Andrew Jackson dollars with doubled edge lettering known, they all are struck for Special Mint Sets (SMS) with a satin finish.

I have handled thousands of Presidential Dollars with missing edge lettering and hundreds of

Presidential Dollars with doubled edge lettering. This unique Andrew Jackson Presidential Dollar with doubled edge lettering was discovered by a collector and submitted to PCGS. It belongs in a collection of Presidential Dollar mint errors or in a collection of unique mint errors.

NEWLY-DESIGNED JEFFERSON NICKEL REVERSE DIE CAP

by Mike Byers (mikebyers.com)

Although described by PCGS as a *Double Struck and Large Brockage*, it is actually a *Reverse Die Cap*. There are only two known die caps on the

newly-designed Jefferson Nickel (2006-2024). The obverse was designed by Jamie Franki. The reverse is still the original Schlag design.

NEWLY-DESIGNED JEFFERSON NICKEL REVERSE DIE CAP

The creation of this die cap merits an explanation. The hammer die (top die) had the reverse Monticello design. The struck coin adhered to the anvil die (bottom die) which

had the obverse Jefferson design and was struck into incoming planchets. This die cap created brockages as it expanded and cupped upwards.

NEWLY-DESIGNED JEFFERSON NICKEL REVERSE DIE CAP

A fascinating mint error with a complicated sequence of events creating this reverse die cap, one of only two known!

PCGS CoinFacts

Your Online Reference for U.S. Coins

PCGS CoinFacts includes comprehensive information on nearly 30,000 U.S. coins. It offers everything from basic, startup information for new collectors, to a wealth of detailed information the seasoned collector, buyer or seller can't afford to be without.

From the PCGS CoinFacts Home Page, you can access all denominations and major types of U.S. coins. The link will take you to a Series Page, which offers images of the finest PCGS-graded coin in the series, and a nice explanation including the history and why the coins in the series are important.

The real “business end” of PCGS CoinFacts begins with the individual coin pages, which are loaded with photos and information. To view the essential features of PCGS CoinFacts, you can click on them one at a time, or go straight to a particular feature of interest.

SPOTLIGHT ON EYE APPEAL

By Greg Bennick
Exclusive to Mint Error News

*Fresh to Market Dramatic Mint Error
Inspires Immediate Reaction*

"I had to have it."

That's how I described the eye-appeal of the coin I've chosen to focus upon for this column. I was at a major coin show on the east

coast, and happened to walk by a dealer's case, one that doesn't usually contain error coins.

SPOTLIGHT ON EYE APPEAL

The dealer deals exclusively in foreign material, and his case was full of a variety of examples across time...and then I noticed this.

It is a gorgeous 20 Reis from Portugal, dated 1883 both on the reverse, and amidst the partial brockage area on what should have been the obverse. The coin bears the appearance of a reverse die cap, though it likely only struck one pair of coins which were between the dies at the same time: the coin here, and a previously struck coin that was resting approximately 85% across the surface of the obverse of this coin when the dies came together.

That strike impressed the previously struck coin's reverse

design into the obverse of this coin as an incuse image. Thus, the two dates, one on each side. And thus, the massive eye-appeal. Like I said, "I had to have it."

My greatest advice to any collector of choice material is to be willing to pay up for eye-appeal. There are two key reasons to do this. First, you want to enjoy your coins, and when you pay for eye-appeal, you will always be happy looking at your purchases in the future. The second reason is resale value. If you love the coin, so too will others. And if they are smart, when you go to resell, they will be willing to pay up as well, which diminishes your potential for losses and maximizes your potential upside.

SPOTLIGHT ON EYE APPEAL

This coin grabbed me immediately from the case. I asked the dealer how much for it, and he could have said just about any number. The number he said, in the low four figures, was in line with my expectations for what a professional would ask for something of this quality. It was a solid price, but for an exceptional coin. If it had been cheap, my friend would have been selling himself short. At the price I paid, I knew I had a solid and unique treasure, and one that I would always cherish. We had a deal, and I am so happy I made it happen.

When presented with a unique and special error coin, one that is either new to market, or that might not come up again for an extended period of time, take

the plunge, make the effort, and seal the deal. Even if it means stretching your wallet to make it work. You will be happy you did both in the short term as your collection brings you increased joy, and longer term too as your purchase yields you a solid return when it is eventually sold.

Thank you for reading about this interesting error coin and my burning desire to have it! I will be back in the next issue with another eye-catching error coin. If you happen to have fantastic errors for sale, please get in touch with us here at Mint Error News, because we would love to hear from you. Thank you for reading!

CONECA

The Combined Organization
of Numismatic Error Collectors of America

CONECA is an international numismatic organization devoted to the education of error and variety coin collectors. CONECA focuses on many error and variety specialties, including doubled dies, repunched mintmarks, multiple errors, clips, double strikes, off-metals and off-centers -- just to name a few. It publishes an educational journal, The ErrorScope, which is printed and mailed to members bimonthly. CONECA offers a lending library, examination, listing and attribution services; it holds annual meetings at major conventions (referred to as Errorama) around the country. Please visit conecaonline.org and enjoy!

CONECA Variety Attribution Services

CONECA offers attribution services. The service enables members and non-members to send their coins directly to an authorized CONECA attributer.

CONECA Error Examination Services

CONECA offers examination services. The service enables members and non-members to send coins to an authorized CONECA examiner who will return an opinion of each coin's error classification.

MULTIPLE STRUCK OFF-CENTER ERROR COINS

by Christopher Talbot Frank, CTF Error Coins

Dramatic multiple struck error coins are even more dramatic when all the strikes are off-center. The separate strike or strikes can happen one at a time or can be stuck at the same time. A saddle struck coin happens when a planchet is struck by two sets of dies at one time resulting in a slight bend between the two strikes. Even though this error is called a double struck, it is actually struck once by two die pairs.

Coins that are die struck on both sides are preferable to coins that

are struck on one side but struck with another planchet or planchets leaving a uniface strike. Dated multi-struck off-center coins will carry a premium over undated examples. Error coin collectors will certainly want examples of these very dramatic multi-struck off-center error coins in their collection.

UNIQUE MATED PAIR OF PROOF IKE DOLLARS STRUCK OFF-CENTER ON 1¢ PLANCHETS

by Mike Byers (mikebyers.com)

UNIQUE MATED PAIR OF PROOF IKE DOLLARS STRUCK OFF-CENTER ON 1¢ PLANCHETS

This unique proof mated pair of Eisenhower Dollars was sitting in an old-time collection for decades. It was very recently authenticated and certified by NGC.

Two off-center copper Cent planchets were intentionally placed in the Eisenhower Dollar collar at the same time and were struck together. This mated pair is amazing and has tremendous eye appeal. As shown in the overlay below, there was a third planchet in the collar at the same time and a 3-piece clover leaf set was struck. Whether the third Eisenhower Dollar off-center on a Cent planchet will ever surface remains to be seen.

To date, this is the only known mated pair of Eisenhower Dollars struck on Cent planchets. They are in gem proof condition with original toning and it is unbelievable that they survived for 50 years.

Proof coins are struck by technicians who hand feed the blanks into special presses. They are produced, examined and packaged using extreme quality control. It is very unusual to find major proof errors. A few broadstrikes, off-centers, double strikes (in collar) and off-metals have been known to be found in sealed proof sets. Proof errors are aggressively sought after by many error collectors.

Consign Your Coins to mikebyers.com

Terms and Conditions

We are offering this service for error collectors and dealers alike. In order to post your item on our website you must agree to the following terms and conditions.

1. All coins must be certified by PCGS or NGC and have a minimum value of \$5,000 each. All U.S. Mint Errors must be dated prior to 2002.
2. Each item must meet our inventory criteria in terms of desirability and market value.
3. Mike Byers Inc charges a 10% Commission on each sale.
4. The minimum time for any listing is thirty days.
5. Seller agrees to a seven day return privilege from date of receipt.
6. Seller agrees to use an escrow service if requested by the buyer.
7. We reserve the right to deny or cancel any listing at any time.
8. All listing are subject to prior sale.

Scanning Specifications

1. Scan both the obverse and reverse of the entire holder.
2. Scan with a resolution of at least 300 dpi.
3. Save the picture in jpeg format (jpg).

Information Requirements

In addition to e-mailing a photo of your item, please include the following information:

1. Name, Address & Phone Number
2. E-Mail Address
3. Asking Price

After your item is listed, we will contact you by e-mail with any offers and questions. Once a price is agreed upon we will handle the entire sale for a 10% transaction fee, which includes all costs (eBay fees, grading fees, webmaster charges, postage and registration fees, insurance, paperwork, etc.).

If you have a collection for sale or would like to sell your duplicates and do not want to consign your coin(s), we can purchase your entire collection outright. Please contact us at mike@mikebyers.com.

EXTREMELY RARE LINCOLN WHEAT EAR CENT WITH COUNTERBROCKAGE & CLASHED CAP BROCKAGE

by Mike Byers (mikebyers.com)

Although the NGC insert describes this mint error as *Obverse Struck Thru Capped Die*, that is only part of the description for this rare mint error. This is a *Counterbrockage and Clashed Cap Brockage*.

EXTREMELY RARE LINCOLN WHEAT EAR CENT WITH COUNTERBROCKAGE & CLASHED CAP BROCKAGE

This planchet was struck by an obverse die cap. The reverse of the die cap was a brockage of the obverse design. This created a counterbrockage on the obverse of this mint error. It also has an incuse

brockage from a clashed die cap. The die cap contacted the reverse die and created a brockage in the center of the coin. Therefore, it has both a counterbrockage and an incuse brockage on the obverse!

EXTREMELY RARE LINCOLN WHEAT EAR CENT WITH COUNTERBROCKAGE & CLASHED CAP BROCKAGE

An extremely rare mint error on a *Wheat Ear* Lincoln Cent and in very choice mint state.

EXTREMELY RARE LINCOLN WHEAT EAR CENT WITH COUNTERBROCKAGE & CLASHED CAP BROCKAGE

Here is another extremely rare *Counterbrockage and Clashed Cap Brockage* on an Indian Head Cent.

Mint Error News Price Guide

- Updated January 2025 -

This price guide is brought to you by Mint Error News. It has been compiled by many of the top major mint error dealers.

This price guide is a guide. Prices fluctuate due to the date, grade, eye appeal and how dramatic the striking error is. Rarity is also a factor. The price is sometimes based on the rarity and grade of the type of coin as well as how rare the error is. The price can also vary depending on whether two collectors are bidding for the same rare major mint error. When purchasing a mint error, it is important to use multiple resources to determine value, as there are many mint errors that do not fit into one category.

Proof Errors (Updated January 2025)

Proof coins are struck by technicians who hand feed the blanks into special presses. They are produced, examined, and packaged using extreme quality control. It is very unusual to find major proof errors. A few broadstrikes, off-centers, double strikes in collars and off-metals have been known to be found in sealed proof sets. Proof errors are aggressively sought after by many error collectors.

A very small group of Proof errors recently came from a collection that was auctioned by the State of California. The U.S. Secret Service inspected and released this collection to the State of California determining that it was legal to own. The State of California then auctioned the collection and it has been dispersed since the sale.

Denomination	Broadstrikes	Die Trials	Double/Triple Strikes	Off-Center Strikes	Partial Collar Errors
Proof Lincoln Cent	\$1,000 - \$1,500	\$1,000	\$3,000	\$1,500 - \$3,000	\$500
Proof Jefferson Nickel	\$2,500 - \$4,000	\$4,000	\$4,000	\$2,000 - \$5,000	\$1,000
Proof Clad Dime	\$3,000 - \$5,000	\$4,000	\$4,000	\$2,500 - \$5,000	\$1,250

Mint Error News Price Guide

Broadstrikes (Updated January 2025)

A broadstruck error occurs when a coin is struck without the collar to form the rim and edge that is part of the shape of the coin. Coins can be broadstruck on either type one or type two planchets. When a coin is broadstruck the blank being fed into the collar will spread and distort outward as it is being struck because the collar isn't in the correct position to retain it.

Mint Error News Price Guide

Partial Collars (Updated January 2025)

Partial collar strikes occur when there is a malfunction of the striking press. This causes the collar to be in an incorrect position. The lower die (usually the reverse die) is recessed in the collar. This allows the coin which is going to be struck to have a formed rim. After a coin is struck the lower die raises upwards, pushing the struck coin out of the collar and ejecting it. If a blank entering the collar is not properly seated, it will only have partial reeding as it is struck. The edge of this coin will have a partial reeding and a partial blank surface area. Recently, the Mint has installed new machinery where either die can be installed in either position.

Uniface Strikes (Updated January 2025)

Uniface coins occur when there have been two blank planchets in the press at the same time. The other blank will obstruct the die on either the obverse or reverse side, which will prevent it from having that design on the coin. There are many different variations involving uniface errors. In addition to having a 100% blank obverse or reverse, a coin can be struck off-center, with a blank planchet in the collar which will obstruct one side of the off-center. There are also mated pairs which have a combination of multiple errors which can include a side which is uniface. Finally, there are uniface strikes due to a die cap which adhered to the die, forming itself in the shape of a die and striking blank planchets.

Bonded Coins (Updated January 2025)

Bonded coins occur when the feeder system, which supplies blank planchets to the coin press, malfunctions and jams. When this occurs, a struck coin is not properly ejected and another planchet is fed into the collar and is struck. This struck coin will land on top of the previously unejected strike. These coins will then crush and bond together. This may occur many times as more coins bond.

Denomination	2 Planchets	3-4 Planchets	5-10 Planchets
Lincoln Cent Wheat Ears	\$5,000	\$15,000	—
Lincoln Cent Memorial	\$600	\$2,000	\$5,000 - \$10,000

Struck Fragments

(Updated January 2025)

The blanking press takes the coils of metal strips and punches blanks out of it, ejecting the webbing at the other end. The webbing is cut into small scrap pieces to be melted and recycled. Occasionally a scrap piece will be mixed with the blank planchets and struck by the dies. Struck fragments are rare in the larger denominations. These can be uniface or die struck both sides and are very rare on type coins.

Denomination	Uniface	Die Struck Both Sides
Indian Cent	\$1,000	\$2,000
Lincoln Cent Wheat Ears	\$750	\$2,000

Mated Pairs (Updated January 2025)

Mated pairs involve two individual coins with different errors that were struck together at the same time. Mated pair error combinations can be found in most error types and come in many shapes and sizes. Mated pairs can be overlapped when one of the coins is struck off-center on top of another coin. Another type involves a brockage where a struck coin was perfectly centered on a blank and restruck. Some mated pairs involve a die cap where the cap and brockage coin are discovered together, but this is a scarce find.

The rarest mated pair type involves two die caps (obverse and reverse) where both dies were capped at the same time and both die caps are mated. This last type is extremely rare and there are only a few known examples of mated pairs involving an obverse die cap and reverse die cap. There are several of these mated pairs known on Kennedy Halves including two dated 1976, which is the Bicentennial year. One of the most spectacular mated pairs involve two Barber Dimes, an obverse die cap mated to a reverse die cap and are unique.

Mated pairs can also involve an off-metal where a smaller blank planchet or smaller struck coin was struck on top of a larger coin. This type is extremely rare. The most spectacular pair known is a double struck Franklin Half which was mated to a Lincoln Cent. The Lincoln Cent blank was on top of the obverse of the struck Franklin Half. This pair was then struck together. It is unique.

Denomination	Overlapping	Full Brockage	Die Cap	2 Die Caps

Transitional Errors (Updated January 2025)

A transitional error occurs when a coin is struck on a planchet from a previous year with different metal composition. The most famous transitional is a 1943 copper cent struck on a 1942 copper blank. 1943 cents were struck in steel because of the copper shortage during World War II. Other famous transitionals include 1965 coinage struck in silver instead of clad.

There are also transitionals struck on blanks for the next year. An example is 1964 coinage in clad instead of silver. Most recently, transitionals were discovered involving the SBA and Sacagawea Dollars of 1999 and 2000. There are eight known 1999 SBA Dollars struck on the brass planchet for the 2000 Sacagawea Dollar, and four known 2000 Sacagawea Dollars struck on a clad planchet for the 1999 SBA Dollar.

Denomination	Off-Metal Planchet	Circulated	AU	Unc	Choice Unc – Gem

U.S. Gold Errors (Updated January 2025)

Major mint errors on U.S. Gold coins are the most prized category of all mint errors. Gold errors are very rare and a few have traded in the \$75,000 to \$100,000 range. Even a broadstruck U.S. Gold coin can easily sell for \$15,000 to \$30,000 compared to a broadstruck Cent, Nickel, Dime or Quarter which all sell for well under \$10. Many serious collectors of Gold Errors have to wait patiently for months and sometimes even years to acquire that one special piece for their collection.

The prices listed here are for common dates in AU-Unc. Better dates and errors that are in gem condition are worth considerably more.

Denomination	Partial Collar	Broadstruck	Clipped Planchet	3% - 5% Off-Center	10% - 15% Off-Center
\$1 Gold Type 1	\$1,000	\$5,000	\$2,000	\$10,000	\$25,000

Indents (Updated January 2025)

An indent error occurs when two blanks are fed inadvertently into the same collar, with one blank partly overlaying on top of the other. When the hammer die strikes this combination, the upper blank will be forced into the lower blank, creating a depression which is shaped similar to the upper blank. A scarce type of indent occurs when a blank intended for one denomination lands on top of a blank from a different denomination.

Die Caps (Updated January 2025)

Die caps are caused when a struck coin sticks to the upper hammer die. Once the coin is struck to the die face, the reverse of the struck coin becomes the new die face. When the next blank is fed into the collar and the strike occurs, the reverse design of the adhered struck coin impresses itself into the new blank. This struck coin is a brockage strike. The coin that adhered to the upper die is known as a die cap. This process repeats itself as more coins are struck by the cap. The greater the number of strikes, the higher the cap metal will be pushed around the upper die shaft. Eventually, the cap brakes away from the die in the shape of a thimble.

Die Adjustment Strikes (Updated January 2025)

Die adjustment strikes are also known as die trials. This error occurs when a coin is struck from the press with very little pressure. When the press is being set up and adjusted, extremely weak strikes occur as the strike pressure reaches its optimum level. These die trials are destroyed after being struck and are rarely found in circulation.

Double Denominations (Updated January 2025)

One of the most expensive, popular, and desired types of errors are the double denominations. This error happens when a coin is struck on a previously struck coin of a smaller denomination. Examples are a cent on a struck dime, and a nickel on a struck cent. The most dramatic are those with considerable design visible from the original strike. There are a few known double denominations with different dates.

Brockages (Updated January 2025)

A brockage error can only occur when there are two coins involved. One of the coins involved will always be a struck coin which has not ejected properly. That struck coin will find its way back between the dies and will be struck next to a blank planchet which was fed into the collar. The image of that first struck coin will be impressed into that side of the blank planchet. The result will be a second coin which has images of the first coin impressed into it. Those images will be pressed into the coin and the image will be in reverse. This incuse sunken image is known as a brockage.

Double & Multiple Strikes (Updated January 2025)

When a blank planchet is struck by the dies, the normal procedure is for the feeders to eject the struck coin out of the collar and into a chute. If there is a malfunction and the struck coin isn't ejected, it may receive a second or third strike by the dies. A multiple struck coin can happen in many ways and have many combinations of errors.

(Since each double and multiple strike can vary from being 10% off-center to 90% off-center, the prices listed below can be substantially more based on the percent off-center and dramatic overall look.)

Off-Center Strikes (Updated January 2025)

Off-center coins are one of the most common and best known types of errors. This happens when a blank which is supposed to be fed into the press, lands in the collar improperly. When this occurs only part of the blank is between the upper and lower dies. When the dies strike the blank, only that part will be struck with a design.

Mint Error News Price Guide

Off-Metals (Updated January 2025)

Off-metal and wrong planchet errors occur when a correctly made blank from one denomination is accidentally fed into a press for another denomination. Examples are a nickel struck on a cent planchet and a cent struck on a dime planchet. The coin struck on an incorrect blank will weigh exactly what the denomination of that blank would have been. An even more dramatic wrong planchet error is a coin struck on a previously struck coin of a different metal.

Denomination	Off-Metal Planchet	Circulated	AU	Unc	Choice Unc – Gem

Counterbrockages

(Updated January 2025)

A counterbrockage error involves a cap die and a previously struck coin. When a cap die strikes a previously struck coin, the obverse design from that struck coin will be impressed into the cap. The result will be a design where the cap face will be an incuse brockage. When a new blank is struck by this cap die with an incuse brockage image, the obverse will have a raised and spread image from that incuse design of the cap. This brockage impression is known as a counterbrockage.

Mint Error News Price Guide

Fold-Over Strikes (Updated January 2025)

A fold-over coin is one of the most dramatic types of errors. It occurs when the blank is standing vertically between the dies. During the strike, the force is so great that it bends and folds the blank. These fold-overs can be on-center or off-center, and come in many different shapes. There are a few fold-overs with multiple errors, either with an additional strike or fold-over. Denominations above quarters are very scarce.

Denomination	AU	AU Dated	Unc	Unc Dated

Martha Washington Test Pieces (Updated January 2025)

There is one set of a Dime, Quarter and Half struck by Martha Washington dies that are permanently housed in the Smithsonian Institute, embedded in blocks of lucite. According to United States Pattern and Related Issues, by Andrew W. Pollock III, “the only trial pieces purported to have survived metallurgical testing in 1965 were the Dime, Quarter Dollar, and Half Dollar equivalent strikes in copper-nickel clad over copper.”

Mike Byers’ discovery of the Martha Washington Test Piece on a copper-zinc Cent planchet struck 10% off-center with a uniface reverse was a front page Coin World article on August 7th, 2000.

Denomination	Unc	Choice	Gem
Martha Cent	\$4,000	\$5,000	\$6,000
Martha Nickel	\$4,500	\$6,000	\$7,500
Martha Dime	\$7,500	\$10,000	\$12,500
Martha Quarter	\$5,000	\$7,500	\$10,000
Martha Half Dollar	\$5,000	\$7,500	\$10,000
Martha Dollar (SBA Planchet)	\$10,000	\$12,500	\$15,000
Martha Dollar (Sac Planchet)	\$6,000	\$7,500	\$10,000

MINSHULL TRADING

The Principal Owner Lee Minshull has been in the business for over 40 years. Other Partners Brian Hodge (President of Numismatics, PNG) and Balazs Csaki (Chief Financial Officer) have added tremendous value to this legacy. Over the last three decades we have been a leader in the numismatic industry and have grown into a formidable market maker, garnering the respect of every major market player.

We establish and support markets that our customers can rely on, from “Top 100 U.S. Coins” to the most recent U.S. Mint modern releases. We take pride in our unmatched customer service and are recognized industry-wide for our immediate payment.

We are members of every major numismatic organization in the country, including PNG, ICTA, FUN, CSNS, and life members of the ANA. We are a regular Red Book contributor and maintain consistent and up-to-date pricing to sustain healthy markets.

Minshull Trading boasts over \$2.5bn in sales to date and has over 100 years of combined numismatic experience that our customers have come to rely on as a trusted source. We earn repeat business because we do what we say, every time. Give us a call today and find out what sets us apart.

MINSHULL TRADING

1892-O 50¢ NGC SP 66★

\$126,500

SPECIMEN STRIKE. The Finest of 3 Known! Likely struck as a commemorative beginning of the Barber series! SP66★! For many years this coin has been touted as a “Branch Mint Proof” or at least something “very special” from the likes of Walter Breen, David Hall and the catalogers and auctioneers who have placed it on the market in the past. Clearly, consensus has been that this coin IS the Branch Mint Proof it has been proclaimed to be, but since mint records were so sparse in those days there is no existing documentation as to exactly why it was prepared. Of course, a few very plausible conclusions can be made. It’s 1892. It’s the first year of the Barber design and the inauguration of it at the New Orleans Mint, who would have had no reason not to show their prowess in creating a coin of this magnitude.

Numismatic Literary Guild 2013 Best US Coin Book!

United States Pattern and Experimental Pieces of WW II uncovers the range and complexity of Mint experiments during this critical period in our history. Every documented experimental and pattern piece is described, illustrated where possible, and explained in detail. Author Roger W. Burdette untangles the mass of myth and assumption about these enigmatic pieces, and presents never before published research into the 'How' and 'Why' of their creation.

An Exciting New Mint Error Book:

Mint Errors to Die For

A Sampling and Explanation of More Than 250 Error Coins That Escaped the U.S. Mint

Some of the Features in *Mint Errors to Die For* Include:

- Coverage and definitions of numerous error types.
- Detailed explanations on the causes of various Mint errors.
- Dozens of high definition photos to help guide you on what to look for.
- Tools and resources needed to get started as a Mint error collector.
- Why it's important to learn and understand the minting process.
- Methods to help you detect counterfeit and altered coins made to resemble errors.
- How to assess if "damage" on Mint errors is considered desirable or undesirable.
- Suggestions on how to learn the value of your error coins.
- Interesting snippets of "Coin Trivia" and American History.
- Error collecting "Dos" and "Don'ts" that will help save you time, money, and pain.

Mint Errors to Die For

A Sampling and Explanation of More Than
250 Error Coins That Escaped the U.S. Mint

Non-gold Coins Struck on Gold Planchets

1913 photos PCGS® used by permission at PCGS.com/
CoinFacts; NGC label photo courtesy of MikeByers.com

Coin Trivia: Though the 1913 Buffalo nickel is on a \$5 gold Half Eagle planchet, Mint errors on \$2.5 gold planchets include: Indian Head Cents: (3) 1900, 1905, 1906, and 1907. Lincoln Cents: 1911, 1915, and 1927

1913 (Type 2) Buffalo Nickel:

Struck on a \$5 Gold Half Eagle Planchet

Though there are nine known cents (six Indian Heads and three Lincolns) struck on gold Quarter Eagle (\$2.5) planchets, this is the only known Buffalo nickel struck on a gold planchet of any type; in this case, it's likely a \$5 gold Half Eagle planchet. (Some speculate it was made intentionally as were the five known 1913 Liberty nickels). Sadly someone cut into the rim on the reverse at 8 o'clock (see photo below) likely to prove it's just another plated novelty coin. Now even if you're 99.9% sure your suspect coin is a fake, don't ever, ever do that! As a result, PCGS gave it a "Genuine/AU Details" grade. It's no surprise that the psychological impact of PCGS' grade adversely affected its initial selling price: \$78,000 at Heritage Auctions in January of 2021 – a heck of a lot less than what many experts expected despite the damage.

In an interesting twist, Las Vegas rare coin dealer Mike Byers reacquired the coin and advocated it shouldn't have been given a "Genuine" label as there are a few other high-profile straight-graded coins/patterns with post-Mint alterations. NGC agreed and straight-graded it at AU-53; he later sold the coin privately for \$400,000! (Source: MikeByers.com/6324417-001.html)

What the Planchet Was Intended to Become

Below is a 1913 Indian Head \$5 gold Half Eagle, which is likely what the planchet for the featured 1913 Buffalo nickel was supposed to become. Seeing that U.S. Mint control of gold and silver planchets was so tight even back then, it is unknown if this is a true error or a Mint-assisted coin. (Photos courtesy of PCGS®

WORLD PAPER MONEY ERRORS

World Paper Money Errors Explored!

Odd shapes, upside down prints, intriguing cuts and folds, and missing design elements are only a few of the different printing errors examined in this expansive collection on foreign error notes. World Paper Money Errors is a visually compelling avenue into the fascinating and rarely explored area of numismatics that expands on the hobby of collecting paper currency.

Author Morland Fischer's comprehensive collection reflects the attraction and advantages of exploring foreign printing errors. An overview of collecting paper money errors in today's numismatic market offers insights on the great disparity between domestic and world notes. Market values are discussed, acknowledging what variables make an error note precious in the trade. Incorporating these concepts and more, Fischer expands the method of collecting currency errors by introducing a Foreign Error Note (FEN) scale to gauge price levels based on error type.

With over 200 examples of dramatic, colorful and intriguing foreign paper money errors, collectors and spectators alike are exposed to a new form of collecting currency. The numismatic community will benefit from this thorough guide that is unlike any other on the market.

New Edition of Bart's United States Paper Money Errors Available Now

UNITED STATES PAPER MONEY ERRORS

A Comprehensive Catalog & Price Guide

DR. FREDERICK J. BART

FOURTH EDITION

Comprehensive Catalog and Price Guide makes first appearance since 2008

By Coin & Currency Institute....

After a lapse of seven years, a new edition of United States Paper Money Errors, Fred Bart's ground-breaking book is now available. The fourth edition is more than just an update to the third: Bureau of Engraving and Printing (BEP) errors have been added, nearly all the illustrations have been changed, there is a rarity guide for each note—which additionally are now priced in four grades (EF, AU, Choice CU and Gem CU)—and, for the first time, there is a section showing some notes in color.

This has always been an enormously popular book, not only among established collectors but also with newcomers seeking to learn more about their "find." There is no other book like it on the market. More than a price guide, its 296 pages contain a wealth of information on what to look for and what mistakes to avoid. It is a necessity for all dealers, collectors, and anyone who comes into regular contact with paper money.

- The new and improved must-have book for U.S. paper money errors
- Rarity guide for each note
- Prices in four conditions
- The universally-used Friedberg Numbering System™—The standard method for describing U.S. currency
- Invaluable appendices with data found nowhere else
- Hundreds of photos
- 296 pages, 20+ with new info
- Convenient & handy 5.75 x inch format

New From Krause Publications:

Strike It Rich With Pocket Change

Error Coins Bring Big Money

by Brian Allen & Ken Potter
NEW 4th Edition

It takes a keen eye to spot them - and a little know-how - but errors on coins produced by the U.S. Mint occur every year. And these errors can be worth a fortune to coin collectors. *Strike It Rich with Pocket Change* shows the reader how to detect errors, what to look for and how to cash in on them. This book has a strong appeal for someone with a mild to dedicated

interest in coins, while drawing upon the treasure hunter in all of us - anyone who is looking for a hobby that does not require a great up-front investment, yet offers the potential of discovering valuable rarities. Any collector who has completed the standard set of a type or series now has an opportunity to broaden the scope of that collection.

MINT *ERROR* NEWS GLOSSARY

What Are Off-Metal Errors?

Off-metal errors occur when a correctly made blank from one denomination is accidentally fed into a press for another denomination. Examples are a nickel struck on a cent planchet and a cent struck on a dime planchet. The coin struck on an incorrect blank will weigh exactly what the denomination of that blank would have been. An even more dramatic wrong planchet error is a coin struck on a previously struck coin of a different metal.

U.S. & WORLD MAJOR MINT ERRORS

World's Greatest Mint Errors
by Mike Byers

**NLG Award Winner:
Best World Coin Book**

Mike Byers was born in the coin business attending coin shows since he was six years old. When he was seventeen, he issued his first coin catalog. He has been a Market-Maker in U.S. Gold Coins and a dealer in major mint errors. In 1987 he offered limited partnerships and rare coin funds. He has written articles for The Coin Dealer Newsletter and has been featured on the front page of Coin World numerous times with his numismatic rarities. Mike Byers is a contributing author on mint errors for CoinWeek. He also assisted with the mint error section of Coin Facts on the PCGS website. You can visit Mike Byers and view his rarities at the ANA, Central States, FUN show and the Long Beach Coin Expo.

Mike Byers has been a professional numismatist for forty years. He is one of the largest dealers handling U.S. Gold Coins, Patterns and Rarities certified by PCGS and NGC. He has handled major coin collections and attends every major coin convention. Mike Byers carries an extensive inventory as well as solicits want lists and is always looking to purchase fresh inventory and collections.

Mike Byers was a consultant to ANACS for Mint Errors from 2000 to 2006. He is also the Publisher and Editor of Mint Error News Magazine and the Mint Error News Website that was founded in 2003. In 2009, Mike Byers published his first book, *World's Greatest Mint Errors*, which received the NLG Award for Best World Coin Book and is available on Amazon.com.

Mike Byers is a life member of ANA since 1985, a charter member of NGC and a featured dealer/member of PCGS. He is also a life member of the Central States Numismatic Society and the Florida United Numismatists. He is a member of CDN Exchange (BYRS).
